Agenda
Campus Curricula Committee Meeting
January 15, 2013
10 am, Room 106B Parker Hall

Review of submitted DC forms:
DC #0434, Mining and Nuclear Engineering, Doctor of Philosophy in Explosives Engineering, effective Fall 2013.

DC #0435, History and Political Science, Bachelor of Arts in History, effective Fall 2013.

DC #0436, Chemistry, Chemistry Biochemistry Emphasis area, effective Fall 2013.

DC #0437, History and Political Science, History Secondary Education Emphasis area, effective Fall 2013.

DC #0438, Business and Information Technology, Minor in Entrepreneurship, effective Fall 2013.

DC #0439, Petroleum Engineering, Bachelor of Science in Petroleum Engineering, effective Fall 2013.

DC #0440, Mining Engineering, Master of Engineering in Mining Engineering, effective Fall 2013.

DC #0441, Business and Information Technology, Minor in Electronic and Social Commerce, effective Fall 2013.

Review of submitted CC forms:
CC #8311, History 326, The Reformation, effective Fall 2013.

CC #8312, Ceramic Engineering 364, Refractories, effective Fall 2013.

CC #8313, Explosives Engineering 305, Explosives Handling and Safety, effective Spring 2014.

CC #8414, Business 110, Management and Organizational Behavior, effective Fall 2013.
CC #8415, Business 396, Business Models for Entrepreneurship and Innovation, effective Fall 2013,
CC #8416, Business 350, Customer Focus and Satisfaction, effective Fall 2013.
CC #8417, Marketing 331, Promotions Management, effective Fall 2013.
CC #8418, Information Science and Technology 351, Leadership in Technology-Based Organizations, effective Fall 2013.
CC # 8419, Petroleum Engineering 415, Drilling Simulation and Geomechanics, effective Fall 2013.
CC #8420, Petroleum Engineering 418, Advanced Well Stimulation, effective Spring 2013.
CC #8421, Petroleum Engineering 318, Well Stimulation, effective Spring 2013.
CC #8422, Petroleum Engineering 441, Advanced Well Test Analysis, effective Fall 2013.
CC #8424, Information Science and Technology 361, Information Systems Project Management, effective Fall 2013.
CC #8425, Mining Engineering 476, Sustainability In Mining, effective Fall 2013.
CC #8426, Mining Engineering 424, Underground Mine Design, effective Fall 2013.
CC #8427, Mining Engineering 426, Surface Mine Design, effective Fall 2013.
CC #8428, Biological Sciences 388, Biomedical Problems, effective Fall 2013.
CC #8429, Business 421, Teambuilding and Leadership, effective Fall 2013.
CC #8430, Business 422, International Marketing, effective Fall 2013.
CC #8431, Business 423, Management Information Systems and Databases, effective Fall 2013.
CC #8432, Business 424, Managerial Accounting for Monitoring & Control, effective Fall 2013.
CC #8433, Business 425, Operations and Project Management, effective Fall 2013.

CC #8434, Business 426, Integration of Business Areas, effective Fall 2013.

CC #8435, Business 427, Managerial Finance, effective Fall 2013.

CC #8438, Business 440, Innovations for Business Sustainability, effective Summer 2013.

CC #8439, Information Science and Technology 341, Advanced Electronic and Mobile Commerce, effective Fall 2013.

CC #8441, Economics 344, Introduction to Innovations for Business Sustainability, effective Summer 2013.

CC #8442, Economics 444, Innovations for Business Sustainability, effective Summer 2013.

**Review of submitted EC forms:**

EC #2447, Petroleum Engineering 401, Production Data Analysis, effective Spring 2013.

EC #2448, Biological Sciences 201, Cave Biology, effective Summer 2013.

EC #2450, History 301, The Memory of War in Twentieth-Century France, effective Summer 2013.

EC #2451, Economics 301, Ethical Problems in a Global Environment, effective Summer 2013.
EC #2452, Economics 301, Product Innovation and Development, effective Summer 2013.

**Tabled Items:**
DC #0430, History, Bachelor of Arts/History Teacher Education Program.

CC #8307, Explosives Engineering 411, Research Methods.
Effective Year: 2013
Effective Term: Fall □  Spring □  Summer □
(Creating or modifying a degree program must be effective for a Fall term)

DC # 0434-2012-ExpEng-000-00

Degree Change Form (DC)

This form is to be used for creating or modifying degree programs, emphasis areas, and minors.

Title of degree program, emphasis area, or minor:
Doctor of Philosophy in Explosives Engineering

Department: Mining and Nuclear Engineering

Briefly describe action requested (Attach documentation as appropriate):
Request to approve addition of Doctor of Philosophy in Explosives Engineering.

Attachments: Proposal

(All CBHE forms are generated from the proposal by UM System Academic Affairs.)

Recommended by Department: ___________________________  Date: 10/29/12
(Chair signature)

Recommended by: ___________________________________  Date: 11/15/12

(Revised 9/12/2011)
NEW DEGREE PROGRAM PROPOSAL

Sponsoring Campus: Missouri University of Science and Technology
College or School: N/A
Department: Mining and Nuclear Engineering
Program Title: Explosives Engineering
Degree: Doctor of Philosophy (Ph.D.) in Explosives Engineering
Options (emphasis areas): No options (N/A)

Delivery Site(s): Missouri University of Science and Technology

CIP Classification:
Implementation Date: Fall 2012
Expected Date of First Graduation: May 2014

Author of Proposal: Paul Worsey

Name and Phone Number of Person to Contact for More Information:
Paul Worsey (573) 341-4317

Individual(s) Responsible for Success of Program:
Paul Worsey, Director of Explosives Education
Samuel Frimpong, Department Chairman
Executive Summary

The proposed PhD. degree in Explosives Engineering fulfills campus, state, federal and industry needs, as well as the wishes of prospective students. The proposed degree will attract new graduate students, as well as retain students who have completed M.S. degrees at Missouri S&T. The graduate program will help the campus attract and retain quality faculty with active research programs.

With the retirement of Korea and Vietnam era technical experts in the defense base, there is a critical shortage of explosives engineers. In addition, there are over 5,000 engineers that will retire in the next decade from the mining industry (the major user of explosives), and the average age of technical personnel in explosives companies is over 50. The degree is designed to ensure that graduates will have the competencies employers are looking for, especially in their search for people with advanced skills who can move quickly into managerial positions. Academic institutions seek explosives engineers with Ph.D. degrees to teach in their undergraduate programs and national labs also require Ph.D. engineers to perform research and engineering vital for the nation’s security.

The degree is a logical outgrowth of Missouri S&T’s focus as a technological research university and recent expansion in explosives engineering, and is the logical step forward from the current success of the M.S. in explosives engineering. The degree is unique to the nation, if not the world. The number of explosives-related courses that are currently offered by the department of Mining and Nuclear Engineering at Missouri S&T has steadily increased to fourteen (42 credit hours) with a further course in development. The addition of a second explosives faculty member in January 2008 and the use of adjunct instructors have allowed further expansion and frequency of offerings, making a Ph.D. in Explosives Engineering sustainable. It is anticipated that graduates will have successful job placement comparable to related engineering fields.¹

This 72-hour program includes a dissertation, explosives engineering core courses and electives, and a module of courses outside the department, if appropriate. Conservative projections show that the degree will produce revenue that will exceed expenditures after one year.

¹ Supporting job placement statistics are given in Appendix A.
Appendix D - Graduate Catalog Description

Explosives Engineering
Master of Science

The Explosives Engineering program in the department of Mining and Nuclear Engineering offers the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Explosives Engineering for students with bachelor's degrees in engineering, science or technology. Due to the age profile of the explosives industry and attrition of personnel, as well as the rapid change in technology within this field, there is an immediate and growing need for highly trained explosives professionals in both the civilian explosive, mining and civil excavating fields and government and the defense industry. Employers are looking for engineers and scientists with sophisticated skills in the integration of explosives technology into complex systems in a wide range of applications. Employers are also seeking M.S. and Ph.D. graduates because they can move quickly into managerial positions.

Faculty involved in a variety of explosives related research programs teach and direct the program in conjunction with instruction by industry specialists in a wide range of applications. Students will have opportunities to assist the faculty, both in research and teaching, as well as working alongside faculty and graduate students in other engineering and science fields such as Civil, Architectural, Mechanical, Chemical, Aerospace, Electrical, Geological and Materials Engineering and Geology, Geophysics, Chemistry and Physics. The explosives engineering faculty and students will be active in the leading professional societies such as the International Society for Explosives Engineers and those in a wide range of associated areas. A security background check is required for all students in the program.

M.S. Degree Requirements

The M.S. program requires a minimum of 30 hours of graduate credit. A core of four courses is required of all students, and a module of allied courses in departments outside of explosives engineering is encouraged.

M.S. with Thesis: The M.S. degree with thesis requires the completion of 24 hours of graduate course work and six hours of research (Exp Eng 490), and the successful completion and defense of a research thesis. Four of the following core courses are required of all M.S. students in Explosives Engineering:

Exp Eng 307
Exp Eng 350
Exp Eng 351
Exp Eng 402
Exp Eng 406

Principles of Explosives Engineering
Blasting Design and Technology
Demolition of Buildings and Structures
Tunneling and Underground Construction Techniques
Environmental Controls for Blasting
Scientific Instrumentation for Explosives and Blasting

17 Based on past experience with explosives related contracts and other research.
Students select 12 hours of Exp Eng and other appropriate elective courses. M.S. in Explosives Engineering candidates are advised to group out-of-department courses into a module that fits their special interest.

M.S. without Thesis (by coursework): The M.S. degree without thesis requires the completion of 30 hours of graduate coursework with the same stipulations as above. The six hours of research is replaced by an explosives related cooperative work experience (Exp Eng 497) or industry project (Exp Eng 498) with an established company or government agency commonly using explosives and an additional explosives course. In addition the candidate is required to present a formal presentation (oral or poster) with abstract to an established scientific or industry society and present a formal oral and/or electronically recorded presentation with abstract to the Mining/Nuclear/Explosives engineering seminar.

Ph.D. Degree Requirements

The Ph.D. degree requires a minimum of 3 years of full-time study beyond the bachelor's degree, including research work for the dissertation. Minimum requirements for Ph.D. candidates include completing 72 credit hours of graduate credit with at least 24 credit hours of dissertation research (Exp Eng 490) and a minimum of 24 credit hours of coursework, with at least 15 credit hours of course work completed at Missouri S&T. Students are encouraged to enroll in at least 15 credit hours of 400-level lecture courses and are required to pass the qualifying, comprehensive and final oral examinations for the Ph.D. research.

Faculty

Faculty involved in the program include existing faculty from the Department of Mining and Nuclear Engineering at Missouri S&T and instructors from industry augmented by faculty from the Department of Civil Engineering at Missouri S&T and faculty from UMC and New Mexico Institute of Technology.

Professor

Paul Worsely, Ph.D., University of Newcastle upon Tyne (Missouri S&T)
Richard Bullock, D. Eng., Missouri School of Mines Emeritus (Missouri S&T)
Sam Kiger, Ph.D., University of Illinois at Urbana (University of Missouri Columbia)
Bruce Freeman, Ph.D., University of California Davis (Ktech, formerly at Texas A & M) ¹⁸

Associate Professor

Jason Baird, Ph.D., University of Missouri Rolla (Missouri S&T)
Braden Lusk, Ph.D., University of Missouri-Rolla (University of Kentucky) ³

¹⁸These have acknowledged interest in working with the program on an adjunct basis offering distance courses (from their current location), subject to S&T hiring policies & procedures.
John Myers, Ph.D., Texas-Austin  
Brandon Weeks, Ph.D., University of Cambridge  
(Missouri S&T)  
(Texas Tech)  

Assistant Professor

Soekbin Lim, Ph.D., University of Missouri-Rolla  
Gillian Worsey, Ph.D., University of Missouri-Rolla  
(New Mexico Institute of Technology)  
Adjunct (Missouri S&T)

Adjunct Industry Instructors Currently Teaching Courses at Missouri S&T

Greg Shapiro, B.S., University of Missouri Columbia  
Steel Blasting  
Matt Sutcliffe  
Premier Pyrotechnics  
Stephen Hall, B.S., University of Missouri-Rolla  
Hercules (Retired)

We hope to broaden the scope of the program to involve professors from other disciplines on campus, such as Civil and Architectural Engineering (for example, blast resistance design), Chemistry (examples: explosive formulation, chemistry of high explosives), Chemical Engineering (examples: treatment of explosive process streams, explosion evaluation) and History (example: history of explosives) as the offering of courses expands. We have already made exploratory contacts.

Catalog Description of Explosives Engineering Courses

The majority of the following courses are currently listed under an Exp Eng prefix. However, those classes that are directly mining related are co listed.

Exp Eng 301 (3) Special Topics
This course is designed to give the department an opportunity to test a new course.

Exp Eng 305 (3) Explosives Handling and Safety
Basic handling and safety for explosives, explosive devices and ordnance related to laboratory handling, testing, manufacturing and storage, for both civil and defense applications. Prerequisites: Min Eng 151, Exp Eng 307, successful background check.

Exp Eng 307/Min Eng 307 (3) Principles of Explosives Engineering
Theory and application of explosives in the mining industry; explosives initiating systems, characteristics of explosive reactions and rock breakage, fundamentals of blast design, drilling and blasting, regulatory and safety considerations. Prerequisites: Min Eng 151; accompanied or preceded by Civ Eng 215 or Geology 220 or Geology 125; Successful background check.

Exp Eng 309 (3) Commercial Pyrotechnics Operations
Provide participants with training preparing for Missouri Licensed Display Operator (Outdoor) License and advanced lead pyrotechnic operator training. Class work will be complemented by practical training in laboratory sessions, culminating in a full
pyrotechnic show, from start to finish. Prerequisites: Both Chem 1 & Chem 2 or their equivalent, US Citizen or permanent resident, Successful background check, resident enrollment at Missouri S&T.

**Exp Eng 313 (3) Stage Pyrotechnics and Special Effects**
Use of energetic materials in close proximity to audiences. Provide participants with training preparing for Missouri Pyrotechnics Display Operators License. Covers: close proximity, indoor and outdoor pyrotechnics and special effects. Working with stage crews and talent, safety and permitting. Prerequisites: Both Chem 1 and Chem 2 or their equivalent; US Citizen or permanent resident, successful background check, resident enrollment at Missouri S&T.

**Exp Eng 350/Min Eng 350 (3) Blasting Design and Technology**
Advanced theory and application of explosives in excavation; detailed underground blast design; specialized blasting including blast casting, construction and pre-splitting. Introduction to blasting research. Examination of field applications. Prerequisite: Exp Eng 307/Mi Eng 307. Student must be at least 21 years of age. Successful background check.

**Exp Eng 351 (3) Demolition of Buildings and Structures**
Provide participants with basics and solid grounding in the equipment, techniques and processes required for the demolition and remediation of mine plant and processing equipment sites and non-mining structures such as buildings, factories, bridges etc. Field trip required. Prerequisites: Proceeded or accompanied by IDE 50 or IDE 140; US citizen or permanent resident; successful background check.

**Min Eng 383 (3) Tunneling & Underground Construction Techniques**
Cover both mechanical excavation and conventional excavation techniques for underground tunneling and construction. The emphasis will be on equipment selection and prediction of performance expected of the equipment. Ground control systems will be covered as technology emerges. Excavation methods and support of large caverns, often found in civil structures, will also be discussed. A limited focus will be on underground construction specifications and underground advance rate and cost estimation techniques. Prerequisites: Min Eng 331, Min Eng 324 or Civ Eng 215, Civ Eng 216 or Geo Eng 371.

**Exp Eng 400 (variable) Special Problems**
Problems or readings on specific subjects or projects in the department. Consent of instructor required.

**Exp Eng 401 (3) Special Topics**
This course is designed to give the department an opportunity to test a new course.

**Exp Eng 402/Min Eng 402 (3) Environmental Controls for Blasting**
Advance blast mechanics; overbreak control including comprehensive coverage of perimeter and smoothwall specialist blasting techniques and geotechnical factors affecting blast vibration, including limits, analysis, monitoring and control; air blast control including
limits, monitoring and atmospheric and topographic effects. Prerequisites: Exp Eng 307/Min Eng 307, successful background check.

**Exp Eng 406 (3)** Scientific Instrumentation for Explosives Testing and Blasting
Application of scientific principles, equipment description and operation for instrumentation of explosive events including blasting. Topics: Blast chamber design, set up, high-speed photography, motion detection and measurement, explosives sensitivity testing, explosives properties testing, vibration measurement and analysis, destruction and demilitarization. Prerequisite: Exp Eng/Min Eng 307 and successful background check.

**ExpEng 407/MinEng 407 (3)** Theory of High explosives
Study of the application of chemical thermodynamics and the hydrodynamic theory to determine the properties of high explosives; application of detonation theory to steady-state detonations in real explosives; application of the above to the blasting action of explosives. Prerequisite: Successful background check and graduate standing.

**Exp Eng 408 (3)** Regulatory Issues in the Explosives Industry
Comprehensive coverage of the federal regulations governing the explosives industry, including those governing storage of explosives (ATF), transportation of explosives (DOT and TSA), the environment (EPA) and use of explosives (OSM, MSHA & OSHA). Prerequisite: Graduate standing.

**Exp Eng 490 (3)** Research
Investigations of an advanced nature leading to the preparation of a thesis or dissertation. Consent of instructor required.

**Exp Eng 497 (0-6)** Graduate Cooperative Experience
Students on an approved internship will complete a project designed by the advisor and employer. The project selected must require that the student apply critical thinking skills and discipline specific knowledge in the work setting. A major report and a formal presentation are required. Prerequisite: 12 hours Exp Eng coursework.

**Exp Eng 498 (0-6)** Industry Project
Students who are currently employed may complete a project in their work setting designed by the advisor and employer. The project selected must require that the student apply critical thinking skills and discipline specific knowledge. A major report and a formal presentation are required. Prerequisite: 12 hours Exp Eng coursework.
Effective Year: 2013  Effective Term: Summer □  Fall □  Spring □
(Creating or modifying a degree program must be effective for a Fall term)

Degree Change Form (DC)
This form is to be used for creating or modifying degree programs, emphasis areas, and minors.

Title of degree program, emphasis area, or minor:
History Major, Bachelor of Arts

Department: History & Political Science

Briefly describe action requested (Attach documentation as appropriate):
We are adding the Hist 310 Seminar as an option for the senior capstone course. Currently, the capstone course is Hist 397: Senior Thesis. Students taking Hist 310 would be required to produce a research paper the same length and quality as that currently required by the senior thesis, but the seminar would offer a more structured, classroom environment that we believe would be beneficial to many history majors.

Notes:

Grade Requirements: Students must complete a minimum of 131 credit hours for the Bachelor of Science in Chemistry degree. A minimum grade of "C" is required for each Chemistry course counted towards the degree.

ROTC: Basic ROTC may be taken in the freshman and sophomore years, but is not countable towards a degree.

Electives: There are eleven (11) hours of electives. Students planning to attend graduate school are encouraged to incorporate additional higher level chemistry electives, math, and foreign language, including a scientific literature course. Recommended courses include but are not limited to the following.

• Biology, 200 and 300 level
• Math 200 and 300 level, especially 204, 208 and 325
• Physics 200 and 300 level, especially 208, 221, 323 & 341
• Statistics, 200 & 300 level, especially 343, 346 & 353
• Ceramic Engineering 391 and 392, or Geology 381
• A foreign language series, French, German or Russian are recommended.

Chem 328-Organic Syn & Spec Analy ........................... 3
Social Sciences Elective ....................................... 3
Elective ......................................................... 2

TOTAL 15

Notes:

Grade Requirements: Students must complete a
minimum of 131 credit hours for the Bachelor of
Science in Chemistry degree. A minimum grade of "C"
is required for each Chemistry course counted toward
the degree.

ROTC: Basic ROTC may be taken in the freshman
and sophomore years, but is not countable toward a
degree.

Electives: There are eleven (11) hours of
electives. Students planning to attend graduate school
are encouraged to incorporate additional higher level
chemistry electives, math, and foreign language,
including a scientific literature course. Recommended
courses include but are not limited to the following:

- Biology, 200 and 300 level, especially 315, 335, 375,
  383, 387
- Math 200 and 300 level, especially 204, 208 and 325
- Physics 200 and 300 level, especially 208, 221, &
  323
- Statistics, 200 & 300 level, especially 343, 346 &
  353
- A foreign language series, French, German or
  Russian are recommended.
Effective Year: 2013  Effective Term: Summer □ Fall □ Spring □

This form is to be used for creating or modifying degree programs, emphasis areas, and minors.

Title of degree program, emphasis area, or minor:
History/Teacher Education  BA History, Secondary Education

Department: History & Political Science

Briefly describe action requested (Attach documentation as appropriate):
We are adding the Hist 310 Seminar as an option for the senior capstone course. Currently, the capstone course is Hist 397: Senior Thesis. Students taking Hist 310 would be required to produce a research paper the same length and quality as that currently required by the senior thesis, but the seminar would offer a more structured, classroom environment that we believe would be beneficial to many history majors.

Revised November 2012
Undergraduate Minor in Entrepreneurship
Offered by the Business and Information Technology Department

Purpose:

Change and growth in Missouri and America require the training, nourishing, and flourishing of entrepreneurs. Many individuals are unaware of their capacity and ability to develop the mindset and skills required to successfully engage in entrepreneurship. Recent entrepreneurship research, however, indicates that many skills and much of the knowledge of successful entrepreneurs can be developed and taught in a classroom setting.

The Department of Business and Information Technology (BIT) thus proposes an undergraduate minor in Entrepreneurship. This program is designed to create successful technological entrepreneurs by developing skills and a mindset that will provide opportunities for succeeding in today's fast-paced world.

To that end, the program focuses on the following competencies:

- Recognizing opportunity
- Assessing opportunity
- Planning under uncertainty
- Fostering innovation
- Mastering creativity
- Building and managing networks
- Leveraging resources
- Mitigating and managing risk
- Focus and adaptability
- Design thinking
- Implementing new ideas

Admission:

The Minor in Entrepreneurship is open to all students at Missouri S&T enrolled in an undergraduate degree. A special focus will be placed on recruiting undergraduates from outside the BIT department and across the Missouri S&T campus.

Contributing Faculty:

Cassandra Elrod (Business and Information Technology)
Ralph Hanke (Business and Information Technology)
Nick Lockwood (Business and Information Technology)
Fiona Nah (Business and Information Technology)
Hong Sheng (Business and Information Technology)
Keng Siau (Business and Information Technology)
Sarah Stanley (Business and Information Technology)
Undergraduate Minor in Entrepreneurship
Offered by the Business and Information Technology Department

Course Descriptions:

Core Courses:

BUS 110: Introduction to Management and Entrepreneurship
The course provides an introduction to the basic concepts of management and organization to give all majors an awareness of what functions and challenges are faced by managers and entrepreneurs in today's global environment; their applications to the organization, operations, and resources are discussed.

BUS 396: Business Models for Entrepreneurship and Innovation
This course uses problem based learning to expand student insight into the nature, development, and application of business models. It increases the practical skills and knowledge required to generate original models of value creation for both entrepreneurial start-ups and corporate innovation. Prerequisite: Senior or Graduate standing.

MKT 331: Digital Marketing and Promotions
This course will touch on the concepts of integrated marketing communication (IMC) and creativity, with a focus on digital media and new marketing concepts. Specifically, we will look at innovative marketing techniques such as viral marketing, brand communities, experiential marketing and guerilla tactics. Students will be asked to work in small groups as they learn to solve marketing problems by thinking outside the box. Prerequisite: Psych 50.

Elective Courses:

BUS 340: Introduction to Business Innovation for Sustainability
Applies an entrepreneurial mindset to the environmental and social opportunities and challenges facing the global community. Topics are examined from multiple perspectives: nonprofit, hybrid, and for-profit organizations. Credit cannot be earned for both Bus 340 and Bus 440. Prerequisite: Bus 330 or equivalent.

BUS 350: Customer Focus and Satisfaction
Major emphasis is given to the concept of customer focus, with coverage of techniques for obtaining customer needs, measuring customer satisfaction, developing products and services to satisfy customers, and maximizing the benefits of customer feedback. A semester long HoQ project will be done. Prerequisite: MKT 311 or MKT 307 or Eng Mgt 251. (Co-listed with MKT 350)

BUS 380: Strategic Management
Study of the formulation and implementation of corporative, business and functional strategies designed to achieve organizational objectives. Case studies and research reports may be used extensively. Prerequisites: MKT 311 or Eng Mgt 251; Finance 250 or Eng Mgt 252; Senior standing.

IST 241: E-Commerce
Undergraduate Minor in Entrepreneurship
Offered by the Business and Information Technology Department

Introduction to fundamental concepts of management and application to Information Technologies. This course examines the use of IT in business processes and the management issues of integrating IT into organization processes to gain a competitive advantage. Topics include: management; organizations and information systems; development life cycle; project management and systems engineering; process reengineering; and organization learning. Prerequisites: IST 50, IST 286.

IST 286: Web and Digital Media Development
This course covers techniques and tools for design and development of web-based media, including text, graphics, animation, audio, and video. Prerequisite: IST 50.

IST 335: Fundamentals of Mobile Technology for Business
A broad overview of mobile technology use in business environments. Topics include the mobile industry; mobile network and wireless standards; mobile devices; mobile web design and app development; social and user experience issues; mobile marketing and commerce. Cannot take both IST 335 and IST 435. Prerequisites: IST 223 and IST 233.

IST 351: Leadership in Technology Based Organizations
The course focuses on the knowledge and skills necessary for the development and implementation of effective strategies for the management of technology-based organizations. This involves: developing a general management perspective on technology and innovation, examining the problems of new product development, identifying distinctive technological competencies, licensing and marketing technologies, assessing the organizational and industrial context of technology. Prerequisite: Senior or Graduate Standing.

IST 354: Multi-Media Development and Design
Students will learn current practices for development and design of interactive multimedia. The course covers tools for development of 2-D and 3-D graphics, video, audio, animation, and integrated multimedia environments. Prerequisites: IST 51 or Comp Sci 53 or Comp Sci 73 or Comp Sci 74.

IST 386: Human-Computer Interaction Prototyping
This course covers designs, methods and tools for creating low and high fidelity prototypes of information technology systems, which is part of the iterative design cycle commonly used for the creation of usable information technologies. Prerequisites: IST 286 or web design experience; preceded or accompanied by IST 385.

Eng Mgt 320: Technical Entrepreneurship
Student teams develop a complete business plan for a company to develop, manufacture and distribute real technical/product service. Lectures & business fundamentals, patents, market/technical forecasting, legal and tax aspects, venture capital, etc., by instructor and successful technical entrepreneurs. Prerequisite: Senior or graduate standing.

Eng Mgt 374: Engineering Design Optimization
This course is an introduction to the theory and practice of optimal design as an element of the engineering design process. The use of optimization as a tool in the various stages of product
realization and management of engineering and manufacturing activities is stressed. The course stresses the application of nonlinear programming methods. Prerequisite: Math 204 or 229.

Degree Change Form (DC)

This form is to be used for creating or modifying degree programs, emphasis areas, and minors.

Title of degree program, emphasis area, or minor:
Petroleum Engineering BS

Department: Geological Sciences and Engineering

Briefly describe action requested (Attach documentation as appropriate):
1. List PE 357 (Petroleum Economics and Asset Valuation) in second semester Junior year.
2. List Mech Eng 227 (Thermal Analysis) in first semester of senior year.

   These two courses are being swapped to allow Petroleum Economics to be taught in the Spring term.

3 Modified English 65 in second semester of senior year to reflect current course title "Introduction to Technical Communications" and added footnote 6:
   
   6) students may also select Engl 60, or Engl 160

   Any of these three courses are acceptable and currently being substituted.

4. Modified IDE 50 and IDE 110 to CE 50 and CE 110 as Civil Engineering is now teaching these courses and has changed the name.

11/27/12

(Revised 1/31/2008)
## Petroleum Engineering Curriculum (Feb 2011)

### Freshman Year
**First Semester**
- Fr Eng 10 - Study and Careers in Engineering: 1 Hr
- Chem 1 - General Chemistry: 4 Hrs
- Chem 2 - General Chemistry Laboratory: 4 Hrs
- Math 14 - Calculus for Engineers I: 1 Hr
- History 112, Hist 179, Hist 176 or Poly Sci 90: 3 Hrs
- English 20 - Exposition and Argumentation: 3 Hrs
- Total: 16 Hrs

**Second Semester**
- Math 15 - Calculus for Engineers II: 4 Hrs
- Physics 23 - Engineering Physics: 4 Hrs
- IDE 20 - Eng Design with Computer Applications: 3 Hrs
- Ge Eng 50 or Geo 51 - Geology for Engineers/Physical Geology: 3 Hrs
- Pet Eng 121 - Intro to Petroleum Engineering: 1 Hr
- Total: 15 Hrs

### Sophomore Year
**First Semester**
- Math 22 - Calc w/Analytic Geom III: 4 Hrs
- Physics 24 - Eng. Physics II: 4 Hrs
- Geo 220 - Structural Geology: 4 Hrs
- Pet Eng 240 - Properties of Petroleum Fluids: 3 Hrs
- CE 50 - Statics: 3 Hrs
- Total: 18 Hrs

**Second Semester**
- Math 204 - Elem Diff Equations: 3 Hrs
- Pet Eng 241 - Petroleum Reservoir Engineering: 3 Hrs
- Pet Eng 242 - Petroleum Reservoir Lab: 1 Hr
- IDE 150 - Dynamics: 2 Hrs
- GE 110 - Mechanics of Materials: 3 Hrs
- Geo 223 - Stratigraphy and Sedimentation: 3 Hrs
- Total: 15 Hrs

### Junior Year
**First Semester**
- Geo 340 - Petroleum Geology: 3 Hrs
- Geop 377 - Seismic Interpretation (3D Seismic): 3 Hrs
- Pet Eng 313 - Drilling and Well Design: 3 Hrs
- Civ Eng 230 - Fluid Mechanics: 3 Hrs
- Econ 121 or 122 - Prin of Economics: 3 Hrs
- Pet Eng Reservoir Engineering Elective: 3 Hrs
- Total: 18 Hrs

**Second Semester**
- Pet Eng 232 - Well Logging: 3 Hrs
- Pet Eng 316 - Well Performance and Production Systems: 3 Hrs
- Pet Eng 397 - Petroleum Economics and Asset Valuation: 3 Hrs
- Humanities/Social Sci Elective: 3 Hrs
- Pet Eng 338 - Finite Element Analysis with Applications in Petroleum Engineering: 3 Hrs
- Total: 16 Hrs

### Senior Year
**First Semester**
- Pet Eng 310 - Seminar: 3 Hrs
- Mech Eng 227 - Thermal Analysis: 3 Hrs
- Pet Eng 341 - Well Testing: 3 Hrs
- Pet Eng Elective: 3 Hrs
- Humanities/Soc Science Elective: 3 Hrs
- Pet Eng 366 - Mechanical Earth Modeling: 3 Hrs
- Total: 16 Hrs

**Second Semester**
- Pet Eng 347 - Petroleum Engineering Design: 3 Hrs
- Ge Eng 315 - Geostatistical Methods in Eng and Geology: 3 Hrs
- Pet Eng Elective: 3 Hrs
- Humanities/Social Science Elective: 3 Hrs
- Engl 65 - Intro to Technical Communications: 3 Hrs
- Total: 15 Hrs
1) All freshmen Petroleum Engineering students must enroll for Chem 4.

2) Humanities/Social Science electives are to be selected from a list of approved courses to be taken in accordance with the University policy. Petroleum Engineering students are especially encouraged to study foreign languages.

3) All Petroleum Engineering students must take the Fundamentals of Engineering Examination prior to graduation. A passing grade on this examination is not required to earn a B.S. degree, however, it is the first step to becoming a registered professional engineer. This requirement is part of the Mo S&T assessment process as described in the Assessment Requirements found elsewhere in this catalogue. Students must sign a release form giving the University access to their Fundamentals of Engineering Examination score.

4) This is a reservoir engineering elective. Students should choose from Pet Engnr 329, 360, 335, 308 or 320.

5) Select Petroleum Engineering electives in accordance with interest area. Students interested in reservoir engineering select from topics in advanced reservoir engineering, simulation, natural gas engineering, and formation characterization. Students interested in drilling/completions and production select Petroleum electives such as advanced drilling, well completions, stimulation. Other general interest Petroleum electives may be selected as available.

The total number of credit hours required for a degree in Petroleum Engineering is 129.

Petroleum Engineering students must earn the grade of "C" or better in all Petroleum Engineering courses to receive credit toward graduation.

6) Students may also select Engl 60, or Engl 160.
Degree Change Form (DC)

This form is to be used for creating or modifying degree programs, emphasis areas, and minors.

Title of degree program, emphasis area, or minor: Master of Engineering (ME) in Mining Engineering

Department: Mining and Nuclear Engineering

Briefly describe action requested (Attach documentation as appropriate):

Additional policies for the ME program distance education in Mining Engineering:

- Applicants for the Master of Engineering (ME) in Mining Engineering program shall be exempt from providing GRE scores if he or she has at least 5 years of experience in the mining industry or any related field.

- Reduce the number of credit hours from 33 credits (11 courses) to 30 credits (10 courses) distributed as follows: 5 core courses, 4 technical electives and 1 design project

Minor in Electronic and Social Commerce
Offered by the Business and Information Technology Department

Purpose:

The Department of Business and Information Technology (BIT) proposes the Minor in Electronic and Social Commerce. This program is designed to create successful students by developing skills in technological business practices that will provide opportunities for succeeding in today's fast paced world.

To that end, the program focuses on the following competencies:
- Management concepts applied to IT
- Management concepts applied to support of electronic commerce
- Use of business processes in IT integration
- Competitive advantage through IT
- Electronic commerce through collaborative shopping

Admission:

The Minor in Electronic and Social Commerce is open to all students at Missouri S&T enrolled in an undergraduate degree.

Contributing Faculty:

Barry Flachsbart (Business and Information Technology)
Nobuyuki Fukawa (Business and Information Technology)
Richard Hall (Business and Information Technology)
Nick Lockwood (Business and Information Technology)
Fiona Nah (Business and Information Technology)
Hong Sheng (Business and Information Technology)
Sarah Stanley (Business and Information Technology)
Vincent Yu (Business and Information Technology)

Course Descriptions:

Core Course:

IST 241: Electronic and Mobile Commerce
Introduction to fundamental concepts of management and application to IT and support of commerce. Examines the use of IT in business processes and the management issues of integrating IT into organization processes to gain a competitive advantage.

Elective Courses:

IST 335: Fundamentals of Mobile Technology for Business
A broad overview of mobile technology use in business environments. Topics include the mobile industry; mobile network and wireless standards; mobile devices; mobile web design and
Minor in Electronic and Social Commerce
Offered by the Business and Information Technology Department

app development; social and user experience issues; mobile marketing and commerce. Cannot take both IST 335 and IST 435. Prerequisites: IST 223 and IST 233.

IST 351: Technological Innovation Management and Leadership
The course focuses on the knowledge and skills necessary for the development and implementation of effective strategies for the management of technology-based organizations. This involves: developing a general management perspective on technology and innovation, examining the problems of new product development, identifying distinctive technological competencies, licensing and marketing technologies, assessing the organizational and industrial context of technology. Prerequisite: Senior or Graduate Standing.

IST 352: Advanced Web Development
Advanced Web development techniques to provide dynamic interaction; methods for extracting and delivering dynamic information to/from Web servers - a hands-on approach. Emphasis on interaction with servers; mobile software development, processing of graphics & web video. Project work is required.

IST 368: Law and Ethics in E-Commerce
Provides the ethical framework to analyze the ethical, legal, and social issues that arise for citizens and computer professionals regarding the computerization of society. Topics include: free speech, privacy, intellectual property, product liability, and professional responsibility. (Co-listed with Philos 368).

IST 385: Human Computer Interaction
Introduction to the field of Human-Computer Interaction (HCI). Students examine issues and challenges related to the interaction between people and technology. The class explores the social and cognitive characteristics of people who use information systems. Students learn techniques for understanding user needs, interface prototyping, and interface evaluation. Prerequisite: Psych 50.

IST 386: Human-Computer Interaction Prototyping
This course covers designs, methods and tools for creating low and high fidelity prototypes of information technology systems, which is part of the iterative design cycle commonly used for the creation of usable information technologies. Prerequisites: IST 286 or web design experience; preceded or accompanied by IST 385.

MKT 331: Digital Marketing and Promotions
This course will touch on the concepts of integrated marketing communication (IMC) and creativity, with a focus on digital media and new marketing concepts. Specifically, we will look at innovative marketing techniques such as viral marketing, brand communities, experiential marketing and guerilla tactics. Students will be asked to work in small groups as they learn to solve marketing problems by thinking outside the box.

MKT 380: Marketing Strategy
Identification and analysis of strategic managerial marketing issues. Integration of marketing concepts through theoretical overview and practical analysis, including extensive use of simulation. Prerequisite: MKT 311 or MKT 407 or Eng Mgt 251.

   Present: Min Eng 151, Exp Eng 307, successful background check
   Proposed: none

8. Required for Majors: □ Elective for Majors: □

9. Justification: See the attached page.

10. Semesters previously offered as an experimental course (101, 201, 301, 401):

11. List all co-listed courses, initialied by Dept. Chair, if signature does not appear below.
   1) min Eng 305 3) 5)
   2) 4) 6)
   Recommended by Department ____________________________ Date: 11/18/12
   (Chair signature)

   Recommended by DSCC ____________________________ Date: 11/28/12
   (Chair signature)

   Approved by Curricula Committee: ____________________________ Date: __________
   (Chair signature)

   Approved by Faculty Senate: ____________________________ Date: __________
   (Chair signature)

(Revised October 2012)
Item 9. Justification: The course no longer requires Mining 151, Exp 307, or a background check because Exp 305 has no lab component and the students are not in contact with energetic materials. The current prerequisite requirements are barring out-of-department students and students in their sophomore year from advantages they may gain by taking the course.

Experimental Course Form (EC)

An EC form must be submitted before an experimental course is to be offered. EC forms approved SP2009 or later allow the course to be offered twice at any time during the following three year period. After an experimental course has been offered twice, a CC form may be submitted to request a permanent course number.

A new course that is required as part of a degree program, minor, or graduate certificate may be submitted on a CC form to receive a permanent course number.

Co-listed offerings should be submitted on one form, originating from the primary discipline.

Department: Geological Engineering

Discipline and Course Number: GE301

Course Title: Introduction to Asteroid Resource Utilization

Abbreviated Title (24 spaces or less): Asteroid Mining

Instructor(s): Gertsch, Pernicka

Credit Hours: Lecture: 3 Lab: 0 Total: 3

Prerequisites: IDE 150 or AE 160, MA 204

Semester(s) previously taught: none

Brief Course Description: (40 words or less)
Introduction to the fundamentals of mining engineering and aerospace engineering as applied to the sustainable utilization of the natural resources of asteroids and comets. May not be used as 300-level technical elective credit for AE majors.

List all co-listed courses: Include initials of Dept. Chair, if signature is not already included below.

Department: Biological Sciences
Discipline and Course Number: BIO201
Course Title: Cave Biology
Abbreviated Title (24 spaces or less): Cave Biology
Instructor(s): Maria Potter
Credit Hours: Lecture 1 Lab 1 Total 2
Prerequisites: any geology, environmental engineering, or biology class except Bio 102
Semester(s) previously taught: N/A
Brief Course Description (360 character spaces or less): In Biospeleology we will study cave organisms and cave ecosystems. We will cover such topics as growth of speleothems, caves as a natural laboratory, behavior of cave animals, and regressive characteristics of cave species. We will investigate the relationship between Karst topography (caves, springs, sinkholes) and underground water contamination.

A new course that is required as part of a degree program, minor, or graduate certificate may be submitted on a CC form to receive a permanent course number.

Co-listed offerings should be submitted on one form, originating from the primary discipline.

Department: Economics

Discipline and Course Number: Econ 301

Course Title: Ethical Problems in a Global Environment

Abbreviated Title (24 spaces or less): Ethical Probs Global Env

Instructor(s): Dr. Bonnie Bachman

Credit Hours: Lecture: 3  Lab: 0  Total: 3

Prerequisites: Senior or graduate standing.

Semester(s) previously taught: Sum 12 as BUS 301-Int. Bus Eth

Brief Course Description: (40 words or less)
Focuses on the international dimension of ethics including corporate responsibility from economic, social, and environmental perspectives. It addresses the ethical challenges of corporate decision making, corporate citizenship, stakeholder engagement, partnerships, and governance at micro- (personal), meso- (organization), and macro- (system) levels.

List all co-listed courses: Include initials of Dept. Chair, if signature is not already included below.

Department: Economics

Discipline and Course Number: Econ 301

Course Title: Product Innovation and Development

Abbreviated Title (24 spaces or less): Prod Innovation Dev.

Instructor(s): Dr. Bonnie Bachman

Credit Hours: Lecture: 3 Lab: 0 Total: 3

Prerequisites: Senior or graduate standing.

Semester(s) previously taught: None

Brief Course Description: (40 words or less)
This interdisciplinary course investigates new product development processes and focuses on inherent risks and strategies for overcoming them. Special emphasis is placed on understanding the role of sustainability in product innovation and issues related to the Fuzzy Front End (FFE).

List all co-listed courses: Include initials of Dept. Chair, if signature is not already included below.

Degree Change Form (DC)

This form is to be used for creating or modifying degree programs, emphasis areas, and minors.

Title of degree program, emphasis area, or minor:
History major: History Teacher Education Program

Department: History & Political Science

Briefly describe action requested (Attach documentation as appropriate):
We are adding a new course (tentatively Hist 396, Research Seminar in History, see accompanying ccoform), that history majors would be able to take in place of the Hist 397 Senior Thesis requirement, or as an upper-division history elective in preparation for the senior thesis. Students in the research seminar will be required to produce a research paper the same length and quality as that currently required by the senior thesis, but the research seminar would offer a more structured, classroom environment (as opposed to the independent study format of Hist 397) that we believe would be beneficial to many history majors.
