Minutes of the Campus Curricula Committee Meeting
May 10, 2016
12:30 p.m., Room 106B Parker Hall

The following curriculum forms were discussed and approved:

Course Change Forms:
File #4056.6  File #4057.4
File #2077.1  File #1507.1
File #1308.1  File #25.1
File #563.1  File #1009.1
File #1949.1  File #4308
File #1211.1  File #214.1
File #381.1  File #2491.2
File #1920.1  File #1919.1

File #1596.1 was tabled. File #4315 was shredded.

Degree Change Forms:
File #224.1  File #7.11
File #17.4  File #44.23
File #157.12  File #242
File #84.4  File #85.8
File #138.6  File #102.13
File #115.17

Experimental Course Forms:
File #4297  File #4312
File #4313

The meeting adjourned at 1:20 p.m.

Ilene H. Morgan, Chair
Missouri S&T Campus Curricula Committee

Requested: Fall 2016

Effective Change Date: 2014

Department: Materials Science & Engineering
Discipline: Ceramic Engineering (CER ENG)

Course Number: 5220

Title: Advanced Mechanical Properties of Ceramics
Abbreviated Title: Adv Mech Prop Of Ceramics

Catalog Description:
An advanced course. Particular emphasis is placed on how ceramic materials are altered to meet the theory and testing practice related to design based on the mechanical properties needs of ceramics. A specific application. The course also includes a laboratory consisting application and design of experiments ceramics for the characterization of the mechanical properties of ceramics. Electrical industry is discussed. Particular emphasis is placed on how ceramic materials are altered to meet the needs of a specific application. The laboratory acquaints the student with measurements which are used for electrical property evaluation.

Prerequisites:
Graduate standing. Cer Eng 4210.

Requested 
Effective Change Date
Fall Spring 2016

Department 
History and Political Science

Discipline 
History (HISTORY)

Course Number 
4097

Title 
Senior Project

Abbreviated Course Title 
Senior Project

Catalog Description
History majors interested in graduate school or professional school, such as law school, should complete an extended research project, or thesis, under the supervision of a department faculty member.

Prerequisites
History 2790 and senior standing, history majors only.

Field Trip Statement

Credit Hours 
LEC: 3 LAB: 0 IND: 0 RSD: 0 Total: 3

Required for Majors 
No

Elective for Majors 
No

Justification for change:
After extensive discussion about how to make the senior thesis/project more
effective and the importance of meeting the experiential learning requirement, the history department decided to eliminate the senior thesis/project as a requirement for a degree in history, but keep it as an optional, one-semester course for students interested in graduate school or needing an acceptable experiential learning experience. History students seeking teacher certification or taking an internship meet the experiential learning requirement and do not require this additional experience. Removing the senior thesis/project requirement will allow them to take an additional content course.

Semesters
previously
offered as an
experimental
course

**Catalog Description:** An introduction to the fundamental ideas of physics including electricity, magnetism,
and light.

Prerequisites

Preceded by Physics 1111 and preceded by Math 1221 or accompanied by Math 1221 or Math 1215.

Field Trip Statement

Credit Hours

LEC: 4       LAB: 0       IND: 0       RSD: 0       Total: 4

Required for Majors

No

Elective for Majors

No

Justification for change:

In the past Physics has offered two calculus-based introductory Physics sequences - Physics 1111/2111 and Physics 1135/2135. The proposed change allows the first semester of either sequence to serve as the prerequisite for 2111.

**Requested Effective Change Date:** Fall 2016-08/01/2014

**Department:** Physics

**Discipline:** Physics (PHYSICS)

**Course Number:** 2135

**Title:** Engineering Physics II

**Abbreviated Course Title:** Engineering Physics II

**Catalog Description:** An introduction to electricity, magnetism, and light, with emphasis on topics needed by engineering students.

**Prerequisites:** Physics 1135 or Math 1221 or Physics 1111, Math 1221 or Math 1215.

**Field Trip Statement:**

**Credit Hours:** LEC: 1.5  
LAB: 1  
IND: 0  
RSD: 1.5  
Total: 4

**Required for Majors:** Yes

**Elective for Majors:** No

**Justification for change:** Physics had two introductory Physics course sequences for calculus-based physics. They were Physics 1111 and Physics 2111 or Physics 1135 and Physics 2135. We
recently stopped offering the 1111/2111 sequence due to enrollment issues. The proposed change would allow students who began the 1111/2111 sequence to finish with 2135.

Using this Program

Start Term: Fall 2016 08/17/2015
Program Code: AP MATH-MS
Department: Mathematics & Statistics
Title: Applied Mathematics MS

Program Requirements and Description

The program for the M.S. degree without a thesis must include at least 33 hours of graduate credit, nine hours of which must be lecture courses at the 6000-level. For the M.S. degree with thesis, the program must include at least 30 hours of graduate credit, at least six hours of which must be lecture courses at the 6000-level and six or more hours of which must be Graduate Research, MATH 6099 or STAT 6099. MATH 5099 or STAT 5099. Candidates in a non-thesis program must pass a final comprehensive examination while candidates in a thesis program must pass an oral thesis defense. All M.S. candidates are encouraged to include in their program courses in engineering and science which are closely related to their research in mathematics or statistics. For those intending to terminate study at the M.S. level, specializations supporting specific career goals are possible.

Justification for request

We have replaced 5099 with 6099 based on the preferences of the Graduate Studies office. The department also voted to remove the master’s comprehensive exam requirement for non-thesis students.

Program

Start Term Fall 2016 8/1/2014
Program Code CHEM-MI
Department Chemistry
Title Chemistry Minor

Program Requirements and Description

Minor in Chemistry

A minor in chemistry requires a minimum of 19 hours of chemistry course work selected in conjunction with a chemistry faculty advisor. The required courses are CHEM 1100, CHEM 1310, CHEM 1319, CHEM 1320, CHEM 1100, CHEM 1510, CHEM 2210 and either CHEM 2219, CHEM 2289, CHEM 2219, CHEM 2289, CHEM 2219. Five Three additional hours of chemistry are to be selected from CHEM 1510 or CHEM 2510 or other Chem 2000, 3000, and 4000-level courses. A minimum grade of "C" is required for each course counted toward the minor.

Justification for request

(1) For years, the department has allowed students to substitute the formerly required CHEM 1510 course with other chemistry courses. This change makes CHEM 1510 optional (which is in line with the common departmental practice). (2) Requiring a "C" in all courses is in line with requirements for chem majors.. (3) CHEM 2510 does not need to be listed separately as an elective for it falls under the 2000-level courses.

Catalog Pages
Using this Program

Start Term: **Fall 2016 08/17/2015**
Program Code: **ENG MG-BS**
Department: **Engineering Management and Systems Engineering**
Title: **Engineering Management BS**

Program Requirements and Description

**Bachelor of Science Engineering Management**

Entering freshmen intending to study engineering management are admitted to the Freshman Engineering Program. They may, however, state an engineering management preference, which will be used as a consideration for available freshman departmental scholarships. The focus of the Freshman Engineering program is on enhanced advising and career counseling, with the goal of providing to the student the information necessary to make an informed decision regarding the choice of a major.

The bachelor of science degree in engineering management requires a minimum of 128 credit hours. These requirements are in addition to credit received for algebra, trigonometry, and basic ROTC courses. An average of at least two grade points per credit hour must be attained. At least two grade points per credit hour must also be attained in all courses taken in engineering management.

Each student's program of study must contain a minimum of 21 credit hours of course work in general education and must be chosen according to the following rules:

1. All students are required to take one American history course, one economics course, and **ENGLISH 1120**. The history course is to be selected from **HISTORY 1200**, **HISTORY 1300**, **HISTORY 1310**, or **POL SCI 1200**. The economics course may be either **ECON 1100** or **ECON 1200**. All students must choose one additional humanities or social science course from "The Approved List of Humanities and Social Sciences Courses for Engineering Degrees" maintained by the Office of Undergraduate Studies.

2. **Depth requirement.** Three credit hours must be taken in humanities or social sciences at the 2000-level or above and must be selected from the approved list. This course must have as a prerequisite one of the humanities or social sciences courses already taken. Foreign language courses numbered 1180 will be considered to satisfy this requirement. Students may receive humanities credit for foreign language courses in their native tongue only if the course is at the 4000-level or above. All courses taken to satisfy the depth requirement must be taken after graduating from high school.

3. The remaining two courses are to be chosen from the list of approved humanities/social sciences courses and may include one communications course in addition to **ENGLISH 1120**.

4. Any specific departmental requirements in the general studies area must be satisfied.

5. Special topics, special problems and honors seminars are allowed only by petition to and approval by the student's department chair.

The engineering management program at Missouri S&T is characterized by its focus on the scientific basics of engineering and its innovative application; indeed, the underlying theme of this educational program is the application of the scientific basics to engineering practice through attention to problems and needs of the public.
necessary interrelations among the various topics, the engineering disciplines, and the other professions as they naturally come together in the solution of real world problems are emphasized as research, analysis, synthesis, and design are presented and discussed through classroom and laboratory instruction.

Free Electives Footnote:
Free electives. Each student is required to take three hours of free electives in consultation with his/her academic advisor. Credits which do not count towards this requirement are deficiency courses (such as algebra and trigonometry), and extra credits in required courses. Any courses outside of engineering and science must be at least three credit hours.

Example Emphasis Area Programs for Engineering Management Students
One unique aspect of the engineering management degree is the student's ability to select an established emphasis area or create a specialized emphasis. Two examples of established emphasis areas are shown below.

</tr>
</tbody>
</table>

**Note:** All electives must be chosen in consultation with the student's advisor. Students must satisfy the common engineering freshman year course requirements in addition to the sophomore, junior, and senior year requirements listed above with a minimum of 128 hours.

1. Must have a grade of "C" or better in these courses for graduation. MATH 1208 and MATH 1221 may be substituted for MATH 1214 and MATH 1215, respectively.
2. Humanities and social science electives must be approved by the student's advisor. Students must comply with the general education requirements with respect to selection and depth of study. These requirements are specified in the current catalog.
3. Each student is required to take three hours of free electives in consultation with his/her academic advisor. Credits which do not count towards this requirement are deficiency courses (such as algebra and trigonometry), and extra credits in required courses. Any courses outside of engineering and science must be at least three credit hours.
4. Students are required to select an emphasis area and maintain a minimum 2.0 GPA for these courses.
5. All engineering management students must take the fundamentals of engineering (FE) exam prior to graduation. A passing grade on this examination is not required to earn a B.S. degree. This requirement is part of the Missouri S&T assessment process as described in assessment requirements found elsewhere in this catalog.

**Justification for request**
Emgt faculty voted to require the FE exam rather than the AEM exam. This change is more consistent with other engineering programs in the CEC.

Note: History majors are also required to complete HISTORY 1100 and HISTORY 1200 as part of the general education requirements for the B.A. In addition, 9 hours of the 31 major hours must be taken at the 3000 or 4000 level.

Note: History majors interested in graduate or professional school should take HISTORY 4097 as independent research under the guidance of a faculty member in a short period (one semester).

Note: History majors must complete an experiential learning requirement. They can meet this requirement by taking HISTORY 4085 or HISTORY 4097 or study abroad, among other options, in consultation with their advisor.

Note: Entering students will normally take ENGLISH 1120 either semester of the first year.

## Secondary Education Emphasis Area

You may earn a B.A. degree in history from Missouri S&T and certification to teach in the schools of Missouri. This program may be completed in four academic years and student teaching is arranged with public schools within 30 miles of the Rolla campus.

Students interested in the certification program should consult with the advisor for history/education majors in the department of history and political science for requirements particular to those interested in this degree. Students should process a change of major form to designate history with an emphasis area of secondary education.

History students must complete 124 credit hours, including the requirements of the teacher education program listed in this catalog. A minimum grade of “C” is required by the department in all history and political science courses counted towards this degree. Students must take the following courses:

<table>

PSYCH 1101 General Psychology | 3 |

HISTORY 2110 World Regional Geography | 3 |

Natural Sciences: 7 hours = 2 courses and 1 lab

One course in Physics or Chemistry or Geology and one course in Biology

One laboratory in any of the above science courses

Mathematics: 3 hours

MATH 1120 College Algebra (or higher) | 3-5 |

or MATH 1103 Fundamentals Of Algebra |
The History department has decided to no longer make HISTORY 4097 a requirement, instead offering it as an option for students wishing to go to graduate school. History majors or history majors with secondary education emphasis will now have to take an additional content course in the form of a history elective. We also added a note regarding experiential learning.

Program Code: HISTORY-BS

Department: History and Political Science

Title: Bachelor of Science in History

Program Requirements and Description

Students must take a minimum of 120 hours for a Bachelor of Science degree in history, and obtain a grade point average of 2.0. These requirements for the B.S. are in addition to credit received for basic ROTC.

The B.S. in history requires the following:

1. ENGLISH 1120 (entering students will normally take ENGLISH 1120 within their first year of study) and one other writing intensive course outside their major, which may include ENGLISH 1160, ENGLISH 1170, or ENGLISH 3560. (6 hours)

2. Math and Sciences. The general requirements for a B.S. call for at least 18 hours in biological, physical (chemistry, geology, physics), and mathematical (mathematics, statistics, computer science, and information science and technology) sciences. The B.S. in history requires at least one course from each of the biological and physical sciences, one lab, and at least one math course at the level of college algebra or higher. In addition to these requirements, students may count STAT 1115, up to 3 hours from psychology classes (PSYCH 2200 preferred), and up to 3 hours from history of science and technology classes (HISTORY 2510, HISTORY 3510, or HISTORY 2530), but may not use them to satisfy another requirement. (18 hours)

3. Humanities. Students must take 12 hours in humanities other than history with at least one course from literature, philosophy, and fine arts (Art, Music, or Theater Appreciation). Students may take courses in language and humanities other than history to meet the 12 hours requirement. (12 hours)

4. Social Sciences. Students must take 12 hours in social sciences. Students must take POL SCI 1200 and at least one course in two from the three areas: economics, political science, and psychology. At the discretion of the major adviser, students may transfer up to 3 hours of Sociology to meet the 12 hours requirement. (12 hours)

5. History. Students must take 37 hours in required history courses, including HISTORY 1790, HISTORY 1100, HISTORY 1200, HISTORY 1300, HISTORY 1310, HISTORY 2790, and HISTORY 4097. The student must earn a grade of C or better in these required courses. (37)

6. History Electives. Students must take at least 18 hours in history electives, including at least 6 hours in American history and at least 6 hours in European history. Nine of these 18 hours of history electives must be at or above the 3000 level. (18 hours)

7. Electives Credit. Each student will elect sufficient additional courses to complete a minimum of 120 credit hours, which may include up to 12 hours in engineering courses at the discretion of the major adviser. At least 9 hours of these electives must be at the 3000 or above level, although substitutions may be permitted at the discretion of the major adviser. All electives must accumulate to at least a 2.0 grade point average.

Justification for To offer history majors a BS in addition to a BA as this could provide additional
request employment opportunities especially in private industry and to offer science or engineering majors opportunity for a dual major. Dean Roberts approved via email and Provost Marley's approval is attached, as well as a copy of the CBHE forms.

Title: Mathematics MST

Program Requirements and Description

The master of science for teachers program is primarily designed for secondary school teachers in the physical sciences and mathematics. The program of study must include at least 32 hours of courses numbered above 2000 in science and mathematics, three hours of which must be at the 6000-level. No more than six hours may be at the 2000-level; any such courses must be from departments other than mathematics and statistics and are subject to the approval of the student's master's committee.

**Candidates must pass a final comprehensive examination.**

Justification for request

- Department voted to remove the master's comprehensive exam requirement.

Using this Program

Start Term Fall 2016 08/17/2015
Program Code MATH-PHD
Department Mathematics & Statistics
Title Mathematics PhD

Program Requirements and Description

A program for the Ph.D. degree includes about 30 hours of breadth in graduate level mathematics and statistics, about 30 hours of courses in or outside of the department representing a field of specialization, and a minimum of 30 hours devoted to the dissertation. In particular, the Ph.D. requires a total of at least 30 hours of Math/Stat 6099, of which at least 24 hours must be Math/Stat 6099. Math/Stat 6099 hours used to complete an M.S. Students must have passed at least three of the five individual exams in the Ph.D. qualifying exam to be eligible for 6099 credit. A student may be registered for 6099 credit during the semester of his or her qualifying exam, but he or she will need to switch from 6099 to 5099 if at least three individual exams are not passed. Math/Stat 5099 hours used to complete an M.S. thesis cannot be counted toward the doctoral research requirements.

The specific program for a candidate is designed jointly by the candidate and the candidate’s advisory committee. A qualifying examination, usually taken soon after completion of the M.S. degree or equivalent course work, is required. For those obtaining a doctoral degree with emphasis in Mathematics a reading knowledge of one modern foreign language, typically either French, German, or Russian, is required. Those whose doctoral emphasis is computational and applied mathematics, statistics, knowledge in a programming language such as C, C++, or FORTRAN and programming expertise demonstrated through an approved project is required. At times approved by the advisory committee, candidates must pass both written and oral comprehensive examinations. These examinations may cover courses outside the department. The dissertation is expected to represent original research and to meet the standard ordinarily required for publication in one of the journals devoted to reporting research in the selected field.

Justification for request
To comply with the preference of the Graduate Council to have all graduate research be 6099.

Program Requirements and Description

Multiculturalism & Diversity Minor

The Multiculturalism and Diversity Minor prepares students to function more effectively in a global society as well as enhances Missouri S&T graduates’ employment options by providing knowledge, skills, and strategies for appreciating and understanding diverse cultural practices. The minor requires 15 hours in a minimum of 3 of 4 humanities and social sciences (HSS) departments:

- One language course at the third semester or above in a foreign language (German, Spanish, French, or Russian) *
- FRENCH 4360 French Culture And Civilization
- PHILOS 4340 Social Ethics
- RUSSIAN 4360 Russian Civilization
- SP&M S 3235 Intercultural Communication

*Courses offered by these departments that can be included in the minor are listed below. The academic home for this minor will be the arts, languages and philosophy department, department in which the student takes the majority of their classes.

Program Requirements and Description

Bachelor of Science

Physics

A minimum of 128 credit hours is required for a bachelor of science degree in physics and an average of at least two grade points per credit hour must be obtained. These requirements for the B.S. degree are in addition to credit received for algebra, trigonometry, and basic ROTC.

The physics curriculum requires twelve semester hours in humanities, exclusive of foreign language, and must include ENGLISH 1160 or ENGLISH 3560. A minimum of nine semester hours is required in social sciences, including either HISTORY 1300, HISTORY 1310, HISTORY 1200, or POL SCI 1200. Specific requirements for the bachelor degree are outlined in the sample program listed below

Total Credits: 128

**Note:** The minimum credit hours required for a bachelor of science in physics is 128 hours. No more than two of the required physics and mathematics courses with a grade of “D” may be used to meet graduation requirements. Upon petition to and approval by the physics faculty, three semester hours of advanced ROTC (military science or aerospace credit studies) credit can be counted as elective credit to meet requirements for graduation.

1. Electives, in addition to the math/stat electives 2 and Physics electives 3, shall include six hours of social studies and nine hours of humanities, at least three of which must be literature and at least three of which must be at the 3000 level or above not including Special Problems courses (PHILOS 4345 recommended). 19 hours of free electives may be used to develop an emphasis area. 18 hours of elective credit shall be in courses at the 3000 level or above.

2. Six hours of mathematics or statistics beyond MATH 3304 are required. MATH 3108, MATH 5222, MATH 5325, or MATH 5351 are recommended.

3. In addition to the specific physics courses listed [PHYSICS 3311, PHYSICS 3201, PHYSICS 4311, PHYSICS 4211, PHYSICS 3119, PHYSICS 3129, and PHYSICS 4301] two other physics 3000 level or higher courses are required.

4. Alternatively COMP SCI 1971 and COMP SCI 1981; note that this will require one less credit hour than the option listed in the sample schedule.

5. Alternatively students may substitute Math 1214 for Math 1208. Note that this is one less credit hour than Math 1208.

6. Alternatively students may substitute Math 1215 for Math 1221. Note that this is one less credit hour than Math 1221.
7 Alternatively students may substitute Physics 1135 for the combination of Physics 1111 and 1119. Note that this is one less credit hour than Physics 1111/1119.

8 Alternatively students may substitute Physics 2135 for the combination of Physics 2111 and 2119. Note that this is one less credit hour than Physics 2111/2119.

Students may develop an emphasis area in secondary education by satisfying the requirements for a bachelor of science in physics and by completing the following additional requirements:

a. Take the education professional requirements courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 1040</td>
<td>Perspectives In Education</td>
<td>2</td>
</tr>
<tr>
<td>EDUC 1174</td>
<td>School Organization &amp; Adm For Elementary &amp; Secondary Teachers</td>
<td>2</td>
</tr>
<tr>
<td>EDUC 2216</td>
<td>Teaching Reading In Content Area</td>
<td>3</td>
</tr>
<tr>
<td>EDUC 2251</td>
<td>Historical Foundation Of American Education</td>
<td>3</td>
</tr>
<tr>
<td>EDUC 3280</td>
<td>Teaching Methods And Skills In The Content Areas</td>
<td>6</td>
</tr>
<tr>
<td>EDUC 4298</td>
<td>Student Teaching Seminar</td>
<td>1</td>
</tr>
<tr>
<td>PSYCH 2300</td>
<td>Educational Psychology</td>
<td>3</td>
</tr>
<tr>
<td>PSYCH 3311</td>
<td>Psychological &amp; Educational Development Of The Adolescent</td>
<td>3</td>
</tr>
<tr>
<td>PSYCH 4310</td>
<td>Psychology Of The Exceptional Child</td>
<td>3</td>
</tr>
</tbody>
</table>

Fifteen of these credit hours may be used to substitute for six hours of mathematics electives, six hours of physics electives, and three hours of computer science courses.

b. Take the education clinical experience courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 1104</td>
<td>Teacher Field Experience</td>

<td>History of Science</td>
<td>3</td>
</tr>
</tbody>
</table>

A 3 hour Art/Music/Theater elective

3 of 4 4/21/2016 10:10 AM

d. Complete the requirements for teacher certification listed in this catalog.

e. PHYSICS 1135 and PHYSICS 2135 may be substituted for: MATH 1214 and MATH 1215 may be substituted for:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1208</td>
<td>Calculus With Analytic Geometry I</td>
<td>5</td>
</tr>
<tr>
<td>MATH 1221</td>
<td>Calculus With Analytic Geometry II</td>
<td>5</td>
</tr>
<tr>
<td>PHYSICS 1111</td>
<td>General Physics I</td>
<td>4</td>
</tr>
<tr>
<td>PHYSICS 1119</td>
<td>General Physics Laboratory</td>
<td>1</td>
</tr>
<tr>
<td>PHYSICS 2111</td>
<td>General Physics II</td>
<td>4</td>
</tr>
<tr>
<td>PHYSICS 2119</td>
<td>General Physics Laboratory</td>
<td>1</td>
</tr>
</tbody>
</table>

Justification for request

First change is to allow option of Math 1214 for Math 1208. This is because math 1208 is no longer offered.
Second change is to allow option of Math 1215 for Math 1221. This is because transfer credit for Calculus II is always Math 1215 instead of math 1221. This will save many substitution/waiver forms.

Third change is to allow option of Physics 1135 for Physics 1111/1119. We are no longer routinely offering Physics 1111 so it is now necessary for students to take 1135 instead.

Fourth change is to allow option of Physics 2135 for Physics 211/2119. We are no longer routinely offering Physics 2111 so it is now necessary for students to take 2135 instead.

Fifth change is to eliminate Comp Sci 1970 and 1980 since neither are offered any longer.

Supporting Documents

Course Reviewer: imorgan (04/19/16 12:49 pm): Minor correction.

Comments: imorgan (04/20/16 10:27 am): Changed HISTORY 2530 (Course Not Found) to HISTORY 3530 (new course number).
kleb6b (04/21/16 9:14 am): Update effective term
kleb6b (04/21/16 9:50 am): Rollback: Rollback per Dr. Morgan
imorgan (04/21/16 9:59 am): Minor clean-up in consultation with Dr. Waddill.
imorgan (04/21/16 10:00 am): Minor clean-up.

https://nextcatalog.mst.edu/courseleaf/courseleaf.cgi?page=/courseadmin...
Justification for new course:

This course is a required course for student entrepreneurial leads entering the newly awarded NSF I-Corps™ Site program (Dr. Bachman is PI for this new innovation and entrepreneurship center on campus). The I-Corps Site program will be rolled out to the UM System as well, where this course will be a shared course between campuses. This course is also the fifth required course in a proposed sequence of courses for the Technical Innovation and Entrepreneurship campus minor (special program) which is supported by 18 full-time tenured or tenure-track professors across 24 degree programs. It is modeled on the entrepreneurship and innovation curriculum first developed by Stanford University and subsequently became known as the NSF I-Corps curriculum and is now taught all over the world. This course was developed with assistance (two grants-2014 and 2015) from Epicenter, the National Science Center for Engineering Pathways to Innovation, funded by NSF and directed by Stanford University. Novel in its content and experiential learning approach, it is team taught and has a wide variety of external mentors such as entrepreneurs, intrapreneurs, venture capitalists, incubator directors and small business development directors that coach students throughout the semester. It leverages our students’ traditional, technical strengths with a learning process where students have the freedom to develop knowledge and skills from direct experiences outside the typical academic framework while working in interdisciplinary teams.

The development of this course, Experiential Entrepreneurship, is also part of the International Affairs Study Abroad faculty grant and program for South Africa and Oman.

The campus Strategic Plan calls for more entrepreneurial content in the curriculum and this course helps meet those goals. Further, this course is in alignment with the Accreditation Board for Engineering and Technology (ABET), which requires students to demonstrate specific abilities in both technical and non-technical skills (e.g., address real-world problems, perceive opportunities, lead others, work in multidisciplinary teams, communicate effectively, react and adapt with flexibility in uncertain times and deal well with risk and failure).

Comments from students who have taken the CompSci 5001 course (precursor to the proposed Econ 5001/co-listed EngMgt 5001) include:

"Can you build a program like this class (CompSci 5001) and I-Corps where we get to work on our projects and experience the whole process of understanding customer context, needs and opportunities, and how to be creative, design the right thing, and how to build it so it solves real problems?"

"We aren't Silicon Valley where this is everyday stuff, but we're eager to learn. Can you give us the opportunity to do great things while learning a lot and developing..."
the skills we need to have an impact in today's world?"

"Can we have more than one class that helps us learn how to take our ideas out of the labs and find out if they can make it to the marketplace?"

Although CS 5001 has been taught successfully 2 times (Fall 2014 and Fall 2015), Computer Science will not be making this a numbered course, nor offer it and therefore, to keep this course alive, two other departments (Economics and Engineering Management) will be team teaching it going forward.

Semester(s) previously taught: Taught as CS 5001 in FS20014 and FS2015 with different prereqs and course description.

Experimental Catalog Description

Student teams work on a practical economics research project, mentored by the instructor & professional economists from economic research institutes or industry. Experiential learning will be achieved by working with real economic data & by delivering their conclusions in a professional presentation and/or research paper. Field trip with expenses.

Prerequisites

- Stat 3111 or Stat 3113 or Stat 3115 or Stat 3117 or Stat 5643 and Econ 2100 or Econ 2200.

Field Trip Statement

One single day trip to the Federal Reserve Bank of St. Louis. Students are responsible for the associated costs, such as travel expenses. Arrangements will be made to avoid conflicts.

## Catalog Description

An advanced course. **Particular emphasis is placed on how ceramic materials are altered to meet the requirements of ceramics.** A specific application. The course also includes a laboratory consisting of application and design of experiments for the characterization of the mechanical properties of ceramics. **Electrical industry is discussed.** Particular emphasis is placed on how ceramic materials are altered to meet the needs of a specific application. The laboratory acquaints the student with measurements which are used for electrical property evaluation.

## Prerequisites

**Graduate standing.** Cer Eng 4210.

## New Course Proposal

**Date Submitted:** 04/05/16 1:56 pm  
**Viewing:** FRENCH 4330: Business French  
**File:** 4308  
**Last edit:** 04/07/16 7:56 pm

Changes proposed by: denises

| Requested Effective Change Date |
|-------------------------------|------------------|
| Fall 2016                     |

**Department:** Arts, Languages, & Philosophy  
**Discipline:** French (FRENCH)  
**Course Number:** 4330  
**Title:** Business French  
**Abbreviated Course Title:** Business French

**Catalog Description:**  
This course addresses practical reading, speaking, listening, and writing strategies for conducting business in French-speaking countries. Students will also improve their knowledge of the contemporary Francophone world. Readings, lectures, and discussions are in French.

**Prerequisites:**  
French 2170.

**Field Trip Statement:**

**Credit Hours:**   
| LEC: 3 | LAB: 0 | IND: 0 | RSD: 0 | Total: 3 |

**Required for Majors:** No  
**Elective for Majors:** Yes

**Justification for new course:**  
Course has been offered twice and should be included in the catalog.

   dewittp: Approved for Arts & Humanities DSCC Chair

**History**

1. Oct 19, 2015 by
effective and the importance of meeting the experiential learning requirement, the history department decided to eliminate the senior thesis/project as a requirement for a degree in history, but keep it as an optional, one-semester course for students interested in graduate school or needing an acceptable experiential learning experience. History students seeking teacher certification or taking an internship meet the experiential learning requirement and do not require this additional experience. Removing the senior thesis/project requirement will allow them to take an additional content course.

Program

Program Requirements and Description

The program for the M.S. degree without a thesis must include at least 33 hours of graduate credit, nine hours of which must be lecture courses at the 6000-level. For the M.S. degree with thesis, the program must include at least 30 hours of graduate credit, at least six hours of which must be lecture courses at the 6000-level and six or more hours of which must be Graduate Research, MATH 6099 or STAT 6099. MATH 5099 or STAT 5099. Candidates in a non-thesis program must pass a final comprehensive examination while candidates in a thesis program must pass an oral thesis defense. All M.S. candidates are encouraged to include in their program courses in engineering and science which are closely related to their research in mathematics or statistics. For those intending to terminate study at the M.S. level, specializations supporting specific career goals are possible.

Justification for request

We have replaced 5099 with 6099 based on the preferences of the Graduate Studies office. The department also voted to remove the master’s comprehensive exam requirement for non-thesis students.

Program

Start Term Fall 2016
Program Code CHEM-MI
Department Chemistry
Title Chemistry Minor

Program Requirements and Description

Minor in Chemistry

A minor in chemistry requires a minimum of 19 hours of chemistry course work selected in conjunction with a chemistry faculty advisor. The required courses are CHEM 1100, CHEM 1310, CHEM 1319, CHEM 1320, CHEM 1510, CHEM 1520, and either CHEM 2219 or CHEM 2289. Five additional hours of chemistry are to be selected from CHEM 1510 or CHEM 2510, or other Chem 2000, 3000, and 4000-level courses. A minimum grade of "C" is required for each course counted toward the minor.

Justification for request

(1) For years, the department has allowed students to substitute the formerly required CHEM 1510 course with other chemistry courses. This change makes CHEM 1510 optional (which is in line with the common departmental practice). (2) Requiring a "C" in all courses is in line with requirements for chem majors. (3) CHEM 2510 does not need to be listed separately as an elective for it falls under the 2000-level courses.

Department
Engineering Management and Systems Engineering

Title
Engineering Management BS

Program Requirements and Description

Bachelor of Science Engineering Management

Entering freshmen intending to study engineering management are admitted to the Freshman Engineering Program. They may, however, state an engineering management preference, which will be used as a consideration for available freshman departmental scholarships. The focus of the Freshman Engineering program is on enhanced advising and career counseling, with the goal of providing to the student the information necessary to make an informed decision regarding the choice of a major.

The bachelor of science degree in engineering management requires a minimum of 128 credit hours. These requirements are in addition to credit received for algebra, trigonometry, and basic ROTC courses. An average of at least two grade points per credit hour must be attained. At least two grade points per credit hour must also be attained in all courses taken in engineering management.

Each student's program of study must contain a minimum of 21 credit hours of course work in general education and must be chosen according to the following rules:

1. All students are required to take one American history course, one economics course, and English 1120. The history course is to be selected from HISTORY 1200, HISTORY 1300, HISTORY 1310, or POL SCI 1200. The economics course may be either ECON 1100 or ECON 1200. All students must choose one additional humanities or social science course from "The Approved List of Humanities and Social Sciences Courses for Engineering Degrees" maintained by the Office of Undergraduate Studies.

2. Depth requirement. Three credit hours must be taken in humanities or social sciences at the 2000-level or above and must be selected from the approved list. This course must have as a prerequisite one of the humanities or social sciences courses already taken. Foreign language courses numbered 1180 will be considered to satisfy this requirement. Students may receive humanities credit for foreign language courses in their native tongue only if the course is at the 4000-level or above. All courses taken to satisfy the depth requirement must be taken after graduating from high school.

3. Any specific departmental requirements in the general studies area must be satisfied.

4. Special topics, special problems and honors seminars are allowed only by petition to and approval by the student's department chair.

The engineering management program at Missouri S&T is characterized by its focus on the scientific basics of engineering and its innovative application; indeed, the underlying theme of this educational program is the application of the scientific basics to engineering practice through attention to problems and needs of the public. The
necessary interrelations among the various topics, the engineering disciplines, and the other professions as they naturally come together in the solution of real world problems are emphasized as research, analysis, synthesis, and design are presented and discussed through classroom and laboratory instruction.

Free Electives Footnote:
Free electives. Each student is required to take three hours of free electives in consultation with his/her academic advisor. Credits which do not count towards this requirement are deficiency courses (such as algebra and trigonometry), and extra credits in required courses. Any courses outside of engineering and science must be at least three credit hours.

</tr>
</tbody>
</table>

**Note:** All electives must be chosen in consultation with the student's advisor. Students must satisfy the common engineering freshman year course requirements in addition to the sophomore, junior, and senior year requirements listed above with a minimum of 128 hours.

1. Must have a grade of "C" or better in these courses for graduation. MATH 1208 and MATH 1221 may be substituted for MATH 1214 and MATH 1215, respectively.
2. Humanities and social science electives must be approved by the student's advisor. Students must comply with the general education requirements with respect to selection and depth of study. These requirements are specified in the current catalog.
3. Each student is required to take three hours of free electives in consultation with his/her academic advisor. Credits which do not count towards this requirement are deficiency courses (such as algebra and trigonometry), and extra credits in required courses. Any courses outside of engineering and science must be at least three credit hours.
4. Students are required to select an emphasis area and maintain a minimum 2.0 GPA for these courses.
5. All engineering management students must take the fundamentals of engineering (FE) exam prior to graduation. A passing grade on this examination is not required to earn a B.S. degree. This requirement is part of the Missouri S&T assessment process as described in assessment requirements found elsewhere in this catalog.

---

**Justification for request**

Emgt faculty voted to require the FE exam rather than the AEM exam. This change is more consistent with other engineering programs in the CEC.

### Secondary Education Emphasis Area

You may earn a B.A. degree in history from Missouri S&T and certification to teach in the schools of Missouri. This program may be completed in four academic years and student teaching is arranged with public schools within 30 miles of the Rolla campus.

Students interested in the certification program should consult with the advisor for history/education majors in the department of history and political science for requirements particular to those interested in this degree. Students should process a change of major form to designate history with an emphasis area of secondary education.

History students must complete 124 credit hours, including the requirements of the teacher education program listed in this catalog. A minimum grade of "C" is required by the department in all history and political science courses counted towards this degree. Students must take the following courses:

<table>
<thead>
<tr>
<th>Communication Skills: 9 hours</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>ENGLISH 1120</strong></td>
</tr>
<tr>
<td><strong>ENGLISH 1160</strong></td>
</tr>
<tr>
<td><strong>SP&amp;M S 1185</strong></td>
</tr>
</tbody>
</table>

Humanities: 12 hours with at least one course from the first three areas

- Art or Music or Theater Appreciation
- Philosophy
- Literature

<table>
<thead>
<tr>
<th>Foreign Language</th>
</tr>

</tr>
<tr>
<td>or <strong>ECON 1200</strong></td>
</tr>
<tr>
<td><strong>PSYCH 1101</strong></td>
</tr>
<tr>
<td><strong>HISTORY 2110</strong></td>
</tr>
</tbody>
</table>

Natural Sciences: 7 hours = 2 courses and 1 lab

- One course in Physics or Chemistry or Geology and one course in Biology
- One laboratory in any of the above science courses

<table>
<thead>
<tr>
<th>Mathematics: 3 hours</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>MATH 1120</strong></td>
</tr>
<tr>
<td>or <strong>MATH 1103</strong></td>
</tr>
</tbody>
</table>

Note: History majors are also required to complete **HISTORY 1100** and **HISTORY 1200** as part of the general education requirements for the B.A. In addition, 9 hours of the 31 major hours must be taken at the 3000 or 4000 level.

Note: History majors interested in graduate or professional school should take **HISTORY 4097** as independent research under the guidance of a faculty member in a short period (one semester).

Note: History majors must complete an experiential learning requirement. They can meet this requirement by taking **HISTORY 4085** or **HISTORY 4097** or study abroad, among other options, in consultation with their advisor.

Note: Entering students will normally take **ENGLISH 1120** either semester of the first year.
Justification for request

The History department has decided to no longer make HISTORY 4097 a requirement, instead offering it as an option for students wishing to go to graduate school. History majors or history majors with secondary education emphasis will now have to take an additional content course in the form of a history elective. We also added a note regarding experiential learning.

Changes proposed by: dewittp

Start Term Fall 2016
Program Code HISTORY-BS
Department History and Political Science
Title Bachelor of Science in History

Program Requirements and Description

Students must take a minimum of 120 hours for a Bachelor of Science degree in history, and obtain a grade point average of 2.0. These requirements for the B.S. are in addition to credit received for basic ROTC.

The B.S. in history requires the following:

1. ENGLISH 1120 (entering students will normally take ENGLISH 1120 within their first year of study) and one other writing intensive course outside their major, which may include ENGLISH 1160, ENGLISH 1170, or ENGLISH 3560. (6 hours)

2. Math and Sciences. The general requirements for a B.S. call for at least 18 hours in biological, physical (chemistry, geology, physics), and mathematical (mathematics, statistics, computer science, and information science and technology) sciences. The B.S. in history requires at least one course from each of the biological and physical sciences, one lab, and at least one math course at the level of college algebra or higher. In addition to these requirements, students may count STAT 1115, up to 3 hours from psychology classes (PSYCH 2200 preferred), and up to 3 hours from history of science and technology classes (HISTORY 2510, HISTORY 3510, or HISTORY 2530), but may not use them to satisfy another requirement. (18 hours)

3. Humanities. Students must take 12 hours in humanities other than history with at least one course from literature, philosophy, and fine arts (Art, Music, or Theater Appreciation). Students may take courses in language and humanities other than history to meet the 12 hours requirement. (12 hours)

4. Social Sciences. Students must take 12 hours in social sciences. Students must take POL SCI 1200 and at least one course in two from the three areas: economics, political science, and psychology. At the discretion of the major adviser, students may transfer up to 3 hours of Sociology to meet the 12 hours requirement. (12 hours)

5. History. Students must take 37 hours in required history courses, including HISTORY 1790, HISTORY 1100, HISTORY 1200, HISTORY 1300, HISTORY 1310, HISTORY 2790, and HISTORY 4097. The student must earn a grade of C or better in these required courses. (37)

6. History Electives. Students must take at least 18 hours in history electives, including at least 6 hours in American history and at least 6 hours in European history. Nine of these 18 hours of history electives must be at or above the 3000 level. (18 hours)

7. Electives Credit. Each student will elect sufficient additional courses to complete a minimum of 120 credit hours, which may include up to 12 hours in engineering courses at the discretion of the major adviser. At least 9 hours of these electives must be at the 3000 or above level, although substitutions may be permitted at the discretion of the major adviser. All electives must accumulate to at least a 2.0 grade point average.

Justification for To offer history majors a BS in addition to a BA as this could provide additional
request employment opportunities especially in private industry and to offer science or engineering majors opportunity for a dual major. Dean Roberts approved via email and Provost Marley's approval is attached, as well as a copy of the CBHE forms.

Program Requirements and Description

The master of science for teachers program is primarily designed for secondary school teachers in the physical sciences and mathematics. The program of study must include at least 32 hours of courses numbered above 2000 in science and mathematics, three hours of which must be at the 6000-level. No more than six hours may be at the 2000-level; any such courses must be from departments other than mathematics and statistics and are subject to the approval of the student's master's committee.

Candidates must pass a final comprehensive examination.

Justification for request

Department voted to remove the master's comprehensive exam requirement.

Start Term Fall 2016 08/17/2015
Program Code MATH-PHD
Department Mathematics & Statistics
Title Mathematics PhD

Program Requirements and Description

A program for the Ph.D. degree includes about 30 hours of breadth in graduate level mathematics and statistics, about 30 hours of courses in or outside of the department representing a field of specialization, and a minimum of 30 hours devoted to the dissertation. In particular, the Ph.D. requires a total of at least 30 hours of Math/Stat 5099 or 6099, of which at least 24 hours must be Math/Stat 6099. Math/Stat 6099 hours used to complete an M.S. Students must have passed at least three of the five individual exams in the Ph.D. qualifying exam to be eligible for 6099 credit. A student may be registered for 6099 credit during the semester of his or her qualifying exam, but he or she will need to switch from 6099 to 5099 if at least three individual exams are not passed. Math/Stat 5099 hours used to complete an M.S. thesis cannot be counted toward the doctoral research requirements.

The specific program for a candidate is designed jointly by the candidate and the candidate’s advisory committee. A qualifying examination, usually taken soon after completion of the M.S. degree or equivalent course work, is required. For those obtaining a doctoral degree with emphasis in Mathematics a reading knowledge of one modern foreign language, typically either French, German, or Russian, is required. Those whose doctoral emphasis is computational and applied mathematics, statistics, knowledge in a programming language such as C, C++, or FORTRAN and programming expertise demonstrated through an approved project is required. At times approved by the advisory committee, candidates must pass both written and oral comprehensive examinations. These examinations may cover courses outside the department. The dissertation is expected to represent original research and to meet the standard ordinarily required for publication in one of the journals devoted to reporting research in the selected field.

Justification for request

To comply with the preference of the Graduate Council to have all graduate research be 6099.

Program Requirements and Description

Multiculturalism & Diversity Minor

The Multiculturalism and Diversity Minor prepares students to function more effectively minor requires 15 hours in a global society as well as enhances Missouri S&T graduates’ employment options by providing knowledge, skills, and strategies for appreciating and understanding diverse cultural practices. The minor requires 15 hours in a minimum of 3 of 4 humanities and social sciences (HSS) departments: the departments of arts, languages and philosophy; English and technical communication; history and political science; and psychological science. The academic home for this minor will be the arts, languages and philosophy department, in which the student takes the majority of their classes. Courses offered by these departments that can be included in the minor are listed below.

Arts, Languages & Philosophy:

- One language course at the third semester or above in a foreign language (German, Spanish, French, or Russian)

<table>

Title Physics BS

Program Requirements and Description

Bachelor of Science
Physics

A minimum of 128 credit hours is required for a bachelor of science degree in physics and an average of at least two grade points per credit hour must be obtained. These requirements for the B.S. degree are in addition to credit received for algebra, trigonometry, and basic ROTC.

The physics curriculum requires twelve semester hours in humanities, exclusive of foreign language, and must include ENGLISH 1160 or ENGLISH 3560. A minimum of nine semester hours is required in social sciences, including either HISTORY 1300, HISTORY 1310, HISTORY 1200, or POL SCI 1200. Specific requirements for the bachelor degree are outlined in the sample program listed below

Total Credits: 128

Note: The minimum credit hours required for a bachelor of science in physics is 128 hours. No more than two of the required physics and mathematics courses with a grade of “D” may be used to meet graduation requirements. Upon petition to and approval by the physics faculty, three semester hours of advanced ROTC (military science or aerospace credit studies) credit can be counted as elective credit to meet requirements for graduation.

1 Electives, in addition to the math/stat electives 2 and Physics electives 3, shall include six hours of social studies and nine hours of humanities, at least three of which must be literature and at least three of which must be at the 3000 level or above not including Special Problems courses (PHILOS 4345 recommended). 19 hours of free electives may be used to develop an emphasis area. 18 hours of elective credit shall be in courses at the 3000 level or above.

2 Six hours of mathematics or statistics beyond MATH 3304 are required. MATH 3108, MATH 5222, MATH 5325, or MATH 5351 are recommended.

3 In addition to the specific physics courses listed (PHYSICS 3311, PHYSICS 3201, PHYSICS 4311, PHYSICS 4211, PHYSICS 3119, PHYSICS 3129, and PHYSICS 4301) two other physics 3000 level or higher courses are required.

4 Alternatively COMP SCI 1971 and COMP SCI 1981; note that this will require one less credit hour than the option listed in the sample schedule.

5 Alternatively students may substitute Math 1214 for Math 1208. Note that this is one less credit hour than Math 1208.

6 Alternatively students may substitute Math 1215 for Math 1221. Note that this is one less credit hour than Math 1221.
Alternatively students may substitute Physics 1135 for the combination of Physics 1111 and 1119. Note that this is one less credit hour than Physics 1111/1119.

Alternatively students may substitute Physics 2135 for the combination of Physics 2111 and 2119. Note that this is one less credit hour than Physics 2111/2119.

Students may develop an emphasis area in secondary education by satisfying the requirements for a bachelor of science in physics and by completing the following additional requirements:

a. Take the education professional requirements courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 1040</td>
<td>Perspectives In Education</td>
<td>2</td>
</tr>
<tr>
<td>EDUC 1174</td>
<td>School Organization &amp; Adm For Elementary &amp; Secondary Teachers</td>
<td>2</td>
</tr>
<tr>
<td>EDUC 2216</td>
<td>Teaching Reading In Content Area</td>
<td>3</td>
</tr>
<tr>
<td>EDUC 2251</td>
<td>Historical Foundation Of American Education</td>
<td>3</td>
</tr>
<tr>
<td>EDUC 3280</td>
<td>Teaching Methods And Skills In The Content Areas</td>
<td>6</td>
</tr>
<tr>
<td>EDUC 4296</td>
<td>Student Teaching Seminar</td>
<td>1</td>
</tr>
<tr>
<td>PSYCH 2300</td>
<td>Educational Psychology</td>
<td>3</td>
</tr>
<tr>
<td>PSYCH 3311</td>
<td>Psychological &amp; Educational Development Of The Adolescent</td>
<td>3</td>
</tr>
<tr>
<td>PSYCH 4310</td>
<td>Psychology Of The Exceptional Child</td>
<td>3</td>
</tr>
</tbody>
</table>

Fifteen of these credit hours may be used to substitute for six hours of mathematics electives, six hours of physics electives, and three hours of computer science courses.

d. Complete the requirements for teacher certification listed in this catalog.

e. PHYSICS 1135 and PHYSICS 2135 may be substituted for: MATH 1214 and MATH 1215 may be substituted for:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1208</td>
<td>Calculus With Analytic Geometry I</td>
<td>5</td>
</tr>
<tr>
<td>MATH 1221</td>
<td>Calculus With Analytic Geometry II</td>
<td>5</td>
</tr>
<tr>
<td>PHYSICS 1111</td>
<td>General Physics I</td>
<td>4</td>
</tr>
<tr>
<td>PHYSICS 1119</td>
<td>General Physics Laboratory</td>
<td>1</td>
</tr>
<tr>
<td>PHYSICS 2111</td>
<td>General Physics II</td>
<td>4</td>
</tr>
<tr>
<td>PHYSICS 2119</td>
<td>General Physics Laboratory</td>
<td>1</td>
</tr>
</tbody>
</table>

Justification for request

First change is to allow option of Math 1214 for Math 1208. This is because math 1208 is no longer offered.
Second change is to allow option of Math 1215 for Math 1221. This is because transfer credit for Calculus II is always Math 1215 instead of math 1221. This will save many substitution/waiver forms.

Third change is to allow option of Physics 1135 for Physics 1111/1119. We are no longer routinely offering Physics 1111 so it is now necessary for students to take 1135 instead.

Fourth change is to allow option of Physics 2135 for Physics 211/2119. We are no longer routinely offering Physics 2111 so it is now necessary for students to take 2135 instead.

Fifth change is to eliminate Comp Sci 1970 and 1980 since neither are offered any longer.

Justification for new course:

This course is a required course for student entrepreneurial leads entering the newly awarded NSF I-Corps™ Site program (Dr. Bachman is PI for this new innovation and entrepreneurship center on campus). The I-Corps Site program will be rolled out to the UM System as well, where this course will be a shared course between campuses. This course is also the fifth required course in a proposed sequence of courses for the Technical Innovation and Entrepreneurship campus minor (special program) which is supported by 18 full-time tenured or tenure-track professors across 24 degree programs. It is modeled on the entrepreneurship and innovation curriculum first developed by Stanford University and subsequently became known as the NSF I-Corps curriculum and is now taught all over the world. This course was developed with assistance (two grants-2014 and 2015) from Epicenter, the National Science Center for Engineering Pathways to Innovation, funded by NSF and directed by Stanford University. Novel in its content and experiential learning approach, it is team taught and has a wide variety of external mentors such as entrepreneurs, intrapreneurs, venture capitalists, incubator directors, and small business development directors that coach students throughout the semester. It leverages our students’ traditional, technical strengths with a learning process where students have the freedom to develop knowledge and skills from direct experiences outside the typical academic framework while working in interdisciplinary teams.

The development of this course, Experiential Entrepreneurship, is also part of the International Affairs Study Abroad faculty grant and program for South Africa and Oman.

The campus Strategic Plan calls for more entrepreneurial content in the curriculum and this course helps meet those goals. Further, this course is in alignment with the Accreditation Board for Engineering and Technology (ABET), which requires students to demonstrate specific abilities in both technical and non-technical skills (e.g., address real-world problems, perceive opportunities, lead others, work in multidisciplinary teams, communicate effectively, react and adapt with flexibility in uncertain times and deal well with risk and failure).

Comments from students who have taken the CompSci 5001 course (precursor to the proposed Econ 5001/co-listed EngMgt 5001) include:

"Can you build a program like this class (CompSci 5001) and I-Corps where we get to work on our projects and experience the whole process of understanding customer context, needs and opportunities, and how to be creative, design the right thing, and how to build it so it solves real problems?"

"We aren't Silicon Valley where this is everyday stuff, but we're eager to learn. Can you give us the opportunity to do great things while learning a lot and developing
the skills we need to have an impact in today's world?"

"Can we have more than one class that helps us learn how to take our ideas out of the labs and find out if they can make it to the marketplace?"

Although CS 5001 has been taught successfully 2 times (Fall 2014 and Fall 2015), Computer Science will not be making this a numbered course, nor offer it and therefore, to keep this course alive, two other departments (Economics and Engineering Management) will be team teaching it going forward.

Semester(s) previously taught: Taught as CS 5001 in FS20014 and FS2015 with different prereqs and course description.

Department: Economics

Discipline: Economics (ECON)

Course Number: 5001

Topic ID: 002

Experimental Title: Applied Economic Research

Experimental Abbreviated Course Title: App Econ Research

Instructors: Ichim, Ana

Experimental Catalog Description

Student teams work on a practical economics research project, mentored by the instructor & professional economists from economic research institutes or industry. Experiential learning will be achieved by working with real economic data & by delivering their conclusions in a professional presentation and/or research paper. Field trip with expenses.

Prerequisites

- Stat 3111 or Stat 3113 or Stat 3115 or Stat 3117 or Stat 5643 and Econ 2100 or Econ 2200.

Field Trip Statement

One single day trip to the Federal Reserve Bank of St. Louis. Students are responsible for the associated costs, such as travel expenses. Arrangements will be made to avoid conflicts.
Credit Hours | LEC: 2 | LAB: 1 | IND: 0 | RSD: 0 | Total: 3  
--- | --- | --- | --- | --- | ---
**Justification for new course:**
This course offers students the opportunity to immerse themselves in the economic research process from “conception to completion,” which will enhance their understanding of economic concepts, theories, and real world applications. Class projects may lead to new research ideas and OURE applications or internships. Students will have the opportunity to interact and work with economics professionals outside academia.

For the Fall 2016 semester we will be collaborating with the American Institute of Economic Research.

Experimental Catalog Description

This class will enable students to develop and refine personal leadership skills. Students will increase their knowledge of exemplary leadership practices through classroom and hands-on activities. Leadership skills covered will include communication, leading teams, being a team member, and goal settings.

Justification for new course:

Leadership theory is currently taught in existing Psychological Science and Engineering Management classes. Leadership experiences and training is offered by Student Affairs. This class seeks to combine theories and principles of leadership.
with hands-on experience. The lab portion of the class will consist of group activities, events offered by Student Affairs, and individual applications of leadership principles.
