Minutes of the Campus Curricula Committee Meeting
August 10, 2021
8:15am, Bertelsmeyer 110H and Virtual Zoom
(For Faculty Senate Meeting of September 23, 2021)

Attendees: Steve Raper, Petra Dewitt, Katie Shannon, Michael Gosnell, Cecil Eng Huang Chua, Michael Davis, Kyle Perry, Kristy Giacomelli-Feys, Marita Tibbetts

The following curriculum forms were discussed and approved:

Course Change Forms:
File: 4816   BIO SCI 4663 : Animal Behavior
File: 222.1   CHEM ENG 6085 : Internship
File: 4809   COMP SCI 5409 : Applied Social Network Analysis
File: 4812   HISTORY 3241 : World War I A Global Perspective
File: 2491.6   HISTORY 4097 : Senior Project
File: 1283.1   PHYSICS 1135 : Engineering Physics I

Program Change Forms:
File: 346.11   GEO SCI-CT : Geoenvironmental Science and Engineering CT
File: 379   PROPOSED : UCT - Military and Security Studies
File: 380   PROPOSED : UCT - War and Society

Experimental Course forms:

File: 4810   ECON 5001.003 : Technology Commercialization
File: 4813   EDUC 3001.002 : Educational Technology K-12
File: 4804   ELEC ENG 5001.008 : Protection of Renewable Energy Resources
File: 4819   FRENCH 3001.001 : The French-Speaking World
File: 4818   MKT 5001.003 : Marketing Revolution with Machine Learning
File: 4817   MS&E 6001.005 : Communication in Materials Science and Engineering
File: 4815   RUSSIAN 5001.002 : Advanced Russian Phonetics and Intonation

New Business:

The 2021-2022 CCC Calendar was approved. CCC Meetings will be held on the listed Tuesdays from 8:15-9:30am in Bertelsmeyer 110H throughout the Fall semester. The official dates for Spring 2022 CCC meetings will be determined at a later date.

After further discussion and review, it was agreed upon that all Degree programs requiring changes to reflect the recent Math 1210/1211 changes should be updated from Math 1214 to "Math 1211 or Math 1214" for consistency.

Reviewed and discussed MDHE program change approval requirements. The Registrar's Office will work on a checklist as well as scheduling a training session. It was also mentioned that if any program changes that affect a Secondary Education Emphasis, it must be approved through DESE as well as MDHE.

The meeting adjourned at 8:55 am.

Stephen A. Raper, Chair
Missouri S&T Campus Curricula Committee

An introduction to key concepts in Animal Behavior. Topics include communication, foraging, spatial behavior, parental care, social behaviors, the effects of environment on behavior, phenotypic plasticity, behavioral ecology, and anthropomorphism. The course will consist of lectures and laboratory exercises.

Prerequisites
  Bio Sci 1113 or Bio Sci 1213.

Field Trip
Statement
  The laboratory portion of this course will require three local field trips that will be arranged prior to the beginning of the course.

Credit Hours   LEC: 2   LAB: 1   IND: 0   RSD: 0

Total: 3

Required for Majors	No

In this course students will learn how to use networks to model and analyze relationships between people, artifacts, and ideas. Analyses will include identification of both communities and key individuals, and the modeling of diffusion processes such as the transmission of diseases. Methods will be practiced in programming assignments using Python.

Prerequisites
A grade of "C" or better in Comp Sci 2500.

Field Trip
Statement

Credit Hours	LEC: 3	LAB: 0	IND: 0	RSD: 0
Total: 3				

Required for Majors	No

Elective for Majors	Yes

Justification for
new course:

This course has been offered twice within the last year with good enrollment. It is a contemporary topic that is of interest to students, and teaches many technical skills as well as consideration of ethical issues.

Semesters
previously
offered as an
experimental
course

This course is offered as an experimental course in Summer 2020 and Spring 2021. Summer 2020 (enrollment: 20), Spring 2021 (enrollment: 26)

This course traces the social, cultural, economic, and military factors that
contributed to the First World War, accounts for why it continued for so long, and
explains the aftermath during the 1920s and 1930s from a global, not just a
European or American perspective.

Prerequisites
  History 1200 or History 1310.

Field Trip
Statement

Credit Hours	LEC: 3	LAB: 0	IND: 0	RSD: 0
Total: 3				
Required for Majors	No			
Elective for Majors	Yes			

Justification for
new course:

  The course fills the gap between military history courses taught about the American
  Civil War and World War II. The course is also part of the new undergraduate
  certificate in Military and Security Studies.

Semesters
previously
offered as an

Requested   **Spring 2022** ~~08/14/2018~~
Effective Change
Date

Department   Physics

Discipline   Physics (PHYSICS)

Course Number   1135

Title   Engineering Physics I

Abbreviated   Engineering Physics I
Course Title

Catalog
Description
  An introduction to mechanics, with an emphasis on topics needed by engineering
  students, including kinematics, dynamics, statics, and energetics.

Prerequisites
  A grade of "C" ~~Math 1208~~ or **better in Math 1208 or Math 1211 or Math** 1214.

Field Trip
Statement

Credit Hours   LEC: 1.5   LAB: 1   IND: 0   RSD: 1.5
  Total: 4

Required for   **Yes** ~~No~~
Majors

Elective for   No
Majors

Justification for
change:
  The change in the prerequisites serves two purposes:
  (i) We are adding the new Math 1211 course as a way to fulfill the Calculus I
  requirement.
  (ii) We are adding the requirement of a grade C or better for Calculus I. An extensive
  data analysis by the professors in charge of Engineering Physics has shown a strong

correlation between the receiving a D in Calculus 1 and poor performance (D or F) in Physics 1135. It thus seems better for the students (both academically and financially) to bring up their Calculus 1 grade to a C *before* they attempt (and potentially fail) Physics 1135. As most students need a grade C in Calculus 1 for their major, this change should not erect additional barriers for students progress towards their degrees.

We have informed the chairs of departments whose students need Physics 1135 of this change and only received positive feedback.

Geoenvironmental Science and Engineering

The graduate certificate in Geoenvironmental Science and Engineering is designed to provide graduate students with the geoscience and engineering backgrounds they will need to be successful in the geoenvironmental consulting or regulatory fields.

The Geoenvironmental Science and Engineering Certificate Program is open to all persons holding a B.S., M.S., or Ph.D. degree in Geology, Geophysics, Geological Engineering, Civil Engineering, or Biology or are currently accepted into a graduate degree program in one of these fields at Missouri S&T. Once admitted to the program, the student must take the four designated courses (provided in the curriculum section). In order to receive a Graduate Certificate, the student must have an average cumulative grade point of 3.0 or better in the certificate courses. Once admitted to the program, a student will be given three years to complete the program.

Students admitted to the Geoenvironmental Science and Engineering Certificate Program will have non-degree graduate status, however, they will earn graduate credit for the courses they complete. If the student completes the four-course sequence with a grade of B or better in each of the courses taken, they, upon application, will be admitted to the non-thesis M.S. degree program in Geology and Geophysics. The certificate credits taken by the students admitted to the M.S. degree program will count towards their master's degree. Students who do not have all of the prerequisite courses necessary to begin the courses in the Geoenvironmental Science and Engineering Certificate Program will be allowed to take "bridge" courses at either the graduate or undergraduate level to prepare for the formal certificate courses.

One of the following courses is required:		
GEOLOGY 4411	Hydrogeology	3
GEO ENG 5331	Subsurface Hydrology	3
GEO ENG 5332	Fundamentals of Groundwater Hydrology	3
Three of the following courses are required:		
GEOLOGY 4431	Methods Of Karst Hydrogeology	3
GEOLOGY 4451	Aqueous Geochemistry	3
GEOPHYS 5782	Environmental and Engineering Geophysics	3
GEO ENG 5174	Geological Engineering Field Methods	3
GEO ENG 5233	Risk Assessment In Environmental Studies	3
GEO ENG 5235	Environmental Geological Engineering	3
GEO ENG 5237	Geological Aspects Of Hazardous Waste Management	3

GEO ENG 5381	Intermediate Subsurface Hydrology And Contaminant Transport Mechs	3

The undergraduate certificate in Military and Security Studies is designed to provide students with background in the understanding of war-making and peace building, the effects of war, the history of armed conflict and armed forces, and national security in relation to the development of society. Students who complete this certificate will understand more fully how integrated the perspectives of the humanities and the social sciences are in fostering a deep understanding of the many ways in which military and security issues continue to shape public policy and discourse. Students will learn the valuable quality of knowing how their work is shaped by, and in turn shapes, social values and contexts in an increasingly interconnected world. This certificate aims to prepare students for careers in security and national defense by developing skills and competency conducive to professional success in these field, such as analytical, research, leadership and communication abilities, interpretation of complex problems, interdisciplinary collaboration, and inclusive deliberation of contentious topics.

General Requirements: Must take FOUR courses, at least one of which MUST be in a discipline other than History.		
Core Required Course: Must take ONE of the following (3 hours):		
HISTORY 3443	The American Military Experience	3
POL SCI 3300	Principles Of Public Policy	3
POL SCI 4500	Geopolitics and International Security	3

Elective Courses: Must take THREE of the following (9 hours) as approved by certificate advisor:		
BUS 5910	Privacy and Information Security	3
HISTORY 3241	Course HISTORY 3241 Not Found	
HISTORY 3325	Revolutionary America, 1754-1789	3

HISTORY 3345	Civil War And Reconstruction	3
HISTORY 3440	20th Century Americans In Combat	3
HISTORY 3441	The United States In World War II	3
HISTORY 3442	The United States in Vietnam	3
HISTORY 3443	The American Military Experience	3
HISTORY 4085	Internship [1]	3
or POL SCI 4085	Political Science Internship	
HISTORY 4097	Senior Project [2]	3
or POL SCI 4097	Course POL SCI 4097 Not Found	
POL SCI 3300	Principles Of Public Policy	3
POL SCI 3310	Public Policy Analysis	3
POL SCI 3760	The American Presidency	3
or HISTORY 3760	The American Presidency	
POL SCI 3761	U.S. Diplomatic History to World War II	3
or HISTORY 3761	U.S. Diplomatic History to World War II	
POL SCI 3762	American Foreign Policy Since 1945	3
or HISTORY 3762	American Foreign Policy Since 1945	
POL SCI 4500	Geopolitics and International Security	3
MIL AIR 4110	National Security, Leadership Responsibilities & Commissioning Preparation I	2.5
MIL AIR 4120	National Security, Leadership Responsibilities & Commissioning Preparation II	2.5
MIL ARMY 3500	Leadership in Changing Environments	3
MIL ARMY 4250	Developing Adaptive Leaders	3
MIL ARMY 4500	Leadership in a Complex World	3

[1] In order to count towards the certificate, the History or Pol Sci 4085 internship need to be taken for at least 3 credit hours and with an organization related to the certificate topic. Requires certificate advisor approval.

[2] In order to count towards certificate, the History or Pol Sci 4097 senior project needs to be on topic related to the certificate. Requires certificate advisor approval.

Justification for request

The purpose for this certificate is to enrich students' careers in security and national defense with courses that develop skills and competencies conducive to professional success in these fields. Careers for which this certificate is an asset include, but are not limited to, those in every branch of the military, the defense industries, cybersecurity in both industry and government, civilian-employing government agencies responsible for defense, intelligence, and homeland security, and non-governmental organizations (NGOs) focused on security, defense, and international cooperation.

The undergraduate certificate in War and Society is designed to provide students with a strong understanding of the history of war and its social effects. The American Revolution, the French Revolution, and the wars of the nineteenth and twentieth centuries completely transformed politics, culture, and society. The effects of these wars continue to influence our ideas and our actions even today. Understanding this transformational role is thus essential in creating global citizens and engaging with the consequences of armed conflict.

To receive S&T's undergraduate certificate in War and Society, a student must take FOUR of the following courses		
HISTORY 3230	Europe In The Age Of The French Revolution And Napoleon	3
HISTORY 3240	Contemporary Europe	3
HISTORY 3241	Course HISTORY 3241 Not Found	
HISTORY 3325	Revolutionary America, 1754-1789	3
HISTORY 3345	Civil War And Reconstruction	3
HISTORY 3440	20th Century Americans In Combat	3
HISTORY 3441	The United States In World War II	3
HISTORY 3442	The United States in Vietnam	3
HISTORY 3443	The American Military Experience	3
HISTORY 4085	Internship [1]	3
HISTORY 4097	Senior Project [2]	3
HISTORY 4245	Nazi Germany and the Holocaust	3
HISTORY 4246	War and Society in Twentieth-Century Europe	3

[1]   In order to count towards the certificate, the History 4085 internship needs to be taken for at least 3 credit hours and with an organization related to the certificate topic, such as a military history museum. Requires certificate advisor approval.

[2]   In order to count towards certificate, the History 4097 senior project needs to be on topic related to the certificate. Requires certificate advisor approval.

Justification for request

Student interest and enrollment in classes that are currently offered in the department of History and Political Science with a focus on war remains strong. Our geographic location near Fort Leonard Wood, our active ROTC programs, and our student veteran populations means we attract students with an interest in the topic. We also have several faculty members with research and teaching strengths in war and society. This certificate allows students - both majors and non-majors - to recognize formally a concentration within their degree plans. War is an enduring world challenge and this certificate allows students to engage with the human issues surrounding the political decisions to wage war.

Market adoption of new technologies is of concern to researchers interested in creating economic value from their research and attracting research. This course helps technologists understand the complex issues around enhancing the value proposition of novel technologies and overcoming barriers to adoption through strategic partnerships or venture creation.

Prerequisites
Econ 1100, Econ 1200 or Eng Mgt 1210.

Field Trip
Statement
Potential visit to St. Louis: Venture Café, Incubator, or other suitable entrepreneurial event/location. (TBD). Use of university van or gas will be reimbursable to individuals, no rental cars will be used. Students are responsible for their own meals. 6-8 hours (including travel time of about 2.5-3 hours).

Credit Hours	LEC: 2	LAB: 1	IND: 0	RSD: 0
Total: 3				

Justification for
new course:
   Co-listed with Eng Mgt 5001.

   There is an increasing recognition of the importance of understanding the process
   and behavioral sides of technology commercialization, given that most new
   technologies fail to reach the market. Greater commercialization success rates
   increase the return on investment from research, increase the likelihood that useful
   novel technologies are used by the market, and increase the prospect of obtaining
   research funding.
   Technology commercialization integrates a process and behavioral framework, to
   help students understand the stage nature of the commercialization process, its
   behavioral implications, and how the commercialization process can influence the
   research path. The technology commercialization course focuses on integrating the
   technological, market and business risks associated with technological research and
   innovation, into a framework, that helps the student understand which question to
   ask at each stage of the commercialization process, challenging the traditional view
   that commercialization only happens once the technical research is complete.
   This course is intended primarily for upper level or graduate science or engineering
   students, who either wish to pursue a research career, or an industrial career
   involving the adoption of new technology solutions into new products. This course is
   designed to integrate with research projects, so that students can apply the
   principles either to their own research projects, or to ones with which they are
   familiar. The course is designed to allow students to learn about the theory of
   technology commercialization, and then to apply the practical lessons, which
   integrate different diverse perspectives, to a real project, using examples and case
   studies from their own knowledge, experience, or research.

This course will introduce students to emerging technologies that can be integrated into K-12 classrooms. Students will create an online portfolio. International Society for Technology in Education Standards will be aligned to lesson plans exploring digital citizenship. Students will also examine current models for integrating technology into education.

Prerequisites
  None

Field Trip
Statement

Credit Hours   LEC: 3   LAB: 0   IND: 0   RSD: 0
  Total: 3

Justification for
new course:

This would be an elective for education majors. Currently we integrate technology
into our methods courses and feel there is more that we need to address with
regards to Google Classroom and other technologies that teachers need to be
familiar with when they get into a classroom. This course would give us an
opportunity to explore more technology with students and help them be more
comfortable with technology that will be in K-12 classrooms before they student
teach.

Protection/analysis of utility-scale photovoltaic, wind generators & interconnected system fault for abnormal conditions. Fuse, protective relay, circuit breaker, & surge arrester application in accordance with IEEE, NERC, & PRC (Protective Relaying & Control) standards for such dispersed power producing and/or inverter-based resources.

Prerequisites
Elec Eng 3540.

Field Trip
Statement

Credit Hours	LEC: 3	LAB: 0	IND: 0	RSD: 0
Total: 3				

Justification for
new course:

Massive renewable energy resources are being engineered worldwide at all voltage levels. Proper protection of these electrical generators and their system interconnection is imperative. Classical power system analysis generally cannot be used because they are not synchronous generators. This course will teach Senior level and masters students the concepts and skills required.

Emerging technologies force marketers to revolutionize the way of implementing innovation. Reflecting this trend, this course introduces machine learning and artificial intelligence applications in marketing innovation contexts through case studies, and explores the underlining mathematics and implements algorithms using R programming language.

Prerequisites
Math 1212 or Math 1214 or graduate standing.

Field Trip
Statement

Credit Hours	LEC: 3	LAB: 0	IND: 0	RSD: 0
Total: 3				

Justification for
new course:

CO-LISTED WITH MATH 5001

• Currently, the department does not offer any marketing courses on machine learning. Reflecting this marketing focus, the proposed course focuses on how companies utilize machine learning in innovation activities, and building customer-centric organization. Additionally, we will employ latest academic articles in marketing journals, such as Journal of Academy of Marketing Science, International Journal of Research in Marketing as a theoretical foundation of the course. This focus on marketing and innovation makes MKT/MATH 5001 different from other machine learning courses in the department.

• MKT 5410, Big Data consumer analytics focuses on analyzing and extracting insights from consumer Big Data, particularly unstructured data (e.g., texts from social media), and exploring marketing strategy around the use of Big Data. In contrast, MKT/MATH 5001 focuses on machine learning as an enabler for marketing innovation activities.

• Today, majority of the marketing innovation applications of machine learning and AI are focused more on incremental innovation than on radical/breakthrough innovation. To overcome these challenges of firms and guide them to take better advantage of machine learning and AI, the course focuses on the impacts of machine learning and AI on radical/ breakthrough innovation in relation to marketing activities.

• A collaborative instruction by both marketing faculty and computational and applied mathematics faculty makes the course unique not just in marketing area, but also in machine learning in general. The course will offer students hands-on experiences to transform theoretical mathematics and machine learning techniques into marketing and industrial applications through case studies. Additionally, students will learn the mathematical foundation of the machine learning techniques and algorithms through implement algorithms using R programming language. Consequently, this proposed course would bridge the gap between marketers and data scientists in relation to disruptive innovation in marketing, and break through the boundary of traditional disciplines (marketing, and mathematics).
