Catalog Description

History

1. Apr 30, 2014 by lahne (53.1)

The laboratory work accompanying general biology consists of experiments designed to supplement and extend lectures in General Biology and Principles of Biology.

Prerequisites

Preceded or accompanied by either Bio Sci 1113 or Bio Sci 1213.

Field Trip Statement

Credit Hours LEC: **0** ~~1~~ LAB: 1 IND: 0 RSD: 0

Total: **1** ~~2~~

Required for Majors **Yes** ~~No~~

Elective for Majors No

Justification for change:

Instead of offering a "lab lecture" and then lab, the lecture section will be eliminated and there will be one lab session per week

Semesters

previously
offered as an
experimental
course

History

1. Nov 3, 2014 by
barryf (1778.1)

The purpose of this course is to understand the practices and processes of negotiation for negotiating successfully in a variety of settings. The course is designed to be relevant to the broad spectrum of negotiation problems faced by managers, consultants, etc. Because almost everyone negotiates all the time, this course is relevant to almost any student.

Prerequisites

Junior standing or above. At least Junior status.

History

1. Jul 7, 2014 by
Daniel Tauritz
(tauritzd)

Planning/managing incidents and response related to digital forensics; identifying, collecting, and preserving digital evidence; live/dead approaches covering systems as a whole emphasizing file system forensics; analysis and interpretation of artifacts culminating in a final project consisting of a collection, analysis, and report; legal and ethical issues.

Prerequisites

A **grade of "C"** or better **grade** in **Comp Sci** ~~both COMP-SCI 3600 and COMP-SCI~~ 3800.

Field Trip

Statement

Credit Hours

LEC: 3

LAB: 0

IND: 0

RSD: 0

Total: 3

Required for Majors	No
Elective for Majors	Yes

Justification for
change:

CS3600 was changed to CS4610 in Spring 2020. CS4610 is further above what is needed in CS3601. CS3601 really just needs the prerequisite of CS3800.

Agenda post

This course will introduce students to the standards for early childhood programs, emphasizing family partnerships and community resources. Students will survey research on play-based learning, emerging literacy, and family engagement and apply research concepts to design developmentally appropriate activities and spaces.

Prerequisites

Field Trip Statement

Credit Hours	LEC: 3	LAB: 0	IND: 0	RSD: 0
Total: 3				
Required for Majors	No			
Elective for Majors	No			

Justification for

new course:

We need approved courses in the catalog to be able to submit an early childhood program to DESE. We hope to have these courses approved for submission now so the early childhood certification program will be approved by the time the on campus center opens next year.

Learner-Centered Classroom Management ~~School Organization and Administration For Teachers~~

Abbreviated **Classroom Management Sch**
 Course Title ~~Org Adm Elem Sec Tch~~

Catalog
 Description

In this course, students will learn strategies for facilitating collaborative, multicultural, and inclusive classrooms. Students will learn how to build classroom norms that support positive behavioral outcomes and use resources to support learners. Students will **develop professional growth goals** ~~gain knowledge~~ and an understanding of **school legal obligations.** ~~the organizational structure and the general operation and administration of public schools.~~ ~~The student should more clearly understand the role of the classroom teacher in classroom management, school law, equity in education, curriculum/instruction, and professional development.~~

Agenda post

This course is an examination of the regulatory requirements of early childhood programs. Students will discuss ethical issues and advocacy strategies. Students will practice administration skills such as budget management for early childhood programs. Personnel management to promote a positive school culture will be discussed.

Prerequisites

Educ 1221.

History

1. Jan 18, 2019 by ershenb (1174.1)

Study of the psychology of children **with emotional, behavioral, cognitive or other differences.** ~~on both ends of the educational spectrum.~~ The course presents the fundamentals of providing services as well as understanding ~~the abilities and disabilities of~~ children classified as exceptional. **Implications** ~~Includes coverage of various disabilities, and the implications of dealing with~~ personal, family and classroom issues **will be discussed as well as assessment procedures for identification.**

Prerequisites

~~Psych 1101.~~

Field Trip

Statement

Credit Hours	LEC: 3	LAB: 0	IND: 0	RSD: 0
Total: 3				
Required for Majors	No			
Elective for Majors	No			

Justification for
change:

We would like to offer these courses separately instead of co-listing. Both courses (PSYCH 4310 and the newly numbered EDUC 2310) will still fulfill requirements for education.

A very similar course is offered at every community college at the 200 level. Offering this course at the 400 level presents a transfer issue, especially since the courses are fulfilling the same DESE competency and the content appears to be similar.

We have a new faculty member with experience in special education; she will be able to provide real world examples for future teachers. The legal compliance of special education is an essential area of training for future teachers.

--------------	--------	--------	--------	--------

Total: 3

Required for Majors	No
---------------------	----

Elective for Majors	No
---------------------	----

Justification for new course:

This course will be used in the new early childhood program currently under development. We need these courses to have permanent numbers so we can submit them to DESE for approval. The education program does not currently have a degree, so we did not check the boxes for a major requirement.

However, when the B.S. in education degree is approved (it is with University of Missouri system right now), this course will eventually be required for an early childhood emphasis area of that degree.

RSD: 0

Total: **3 6**

Required for

Yes

Majors

Elective for

No

Majors

Justification for

change:

This course will now be 3 hours instead of 6. The prerequisite of EDUC 3340 Assessment for Student Learning is a new course requirement, so the credit hours remain the same for the education requirements.

This course used to be co-taught by one instructor for 4 credit hours and then content area adjunct instructors for 2 credit hours on a separate night. Multiple instructors caused issues for students, and scheduling rooms for different content areas was challenging. This is also no longer feasible with the current budget.

A 3 hour course is easier for scheduling purposes, and this will allow us to use course sharing with UMSL for low enrollment subjects like physics and chemistry. This will give students a better experience if they are able to engage with others in the same content.

This course is the culminating experience to qualify students for Missouri initial teacher certification. Students ~~Student teaching~~ will be placed supervised participation, in a school the content area of certification with a credentialed mentor teacher in the intended area of certification. a Missouri-Certified Cooperating Teacher. Students will be observed and evaluated by university faculty and the mentor teacher. Student teaching is based on 16 weeks and requires the student teacher to demonstrate an ability to be an effective decision-making teacher and an inquiry learner.

Course content is roughly 1/3 power electronics, 1/3 applied control and 1/3 electric machinery and focuses on analysis, simulation, and control design of electric drive based speed, torque, and position control systems.

Prerequisites

Elec Eng ~~3500~~ and Elec Eng 3320.

Field Trip
Statement

Credit Hours	LEC: 3	LAB: 0	IND: 0	RSD: 0
Total: 3				
Required for Majors	No			
Elective for Majors	No			

Justification for
change:

3500 was never needed for the topics covered in 5500. Originally it was added because 5500 is on motor drives and needs some basic understanding of dc machines. However, that introduction to dc machines is already integrated to EE5500 and so if the student is not familiar with those topics, the first chapter of the course will cover those. So 3500 is not needed. However, 3320 is still needed and should be a prerequisite.

Pending CCC
Agenda post

The physical phenomena associated with high voltage dielectric breakdown are presented. Methods of generating and measuring high voltages and currents are explained. Demonstration of design and performance. Field trips to companies for laboratory testing of high voltage according to industry standards will serve as the lab part of the course.

Prerequisites

Senior standing.

Field Trip

Statement

Credit Hours	LEC: 3 2	LAB: 0 1	IND: 0	RSD: 0
Total: 3				

Required for Majors	No
------------------------	----

Elective for Majors	No
------------------------	----

Justification for
change:

The "Lab" credit is combined with the lecture course, so there is always confusion for students when enrolling. Since all elements of the course are taught during the regular lecture time, it makes more sense for this to transition to a 3 credit hour lecture course instead of 2 lectures hours and 1 lab.

Denise Sharp
(denises)

Through practical examples and exercises, this course helps you develop linguistic proficiency, intercultural competence, and knowledge of the French-language professional world. Focus on applications in a variety of professional milieux, depending on students' specializations and areas of interest. ~~This course addresses practical reading, speaking, listening, and writing strategies for conducting business~~

~~in French-speaking countries. Students will also improve their knowledge of the contemporary Francophone world.~~ Readings, lectures, and discussions ~~are~~ in French.

Prerequisites

Any French course at the 2000 level or above ~~French 2170.~~

Agenda post

An introduction to differential and integral calculus for students needing extra algebra or trigonometry content. Emphasizes differential calculus along with linear, polynomial, rational, and radical functions and equations. Math 1210 and 1211 combined cover the same calculus content as Math 1214. Credit will be given for only one of Math 1210 or Math 1214.

Prerequisites

A grade of "C" or better in either Math 1120 or Math 1140, or by placement exam.

Field Trip

Majors

Justification for

new course:

As part of the ongoing calculus redesign, we are restructuring our offerings for students who are "not quite ready" for the existing Calculus I. The proposed Calculus I-A (Math 1210, this proposal) and Calculus I-B (Math 1211, see the separate CC form) are designed to, as a two-semester sequence, cover all of the existing Math 1214 course content plus a significant portion of the existing content in college algebra (Math 1120 or 1140) and trigonometry (Math 1160). This will not, however, be a simple repackaging of existing content. Algebra, trigonometry, and calculus content will be interwoven in a thoughtful and pedagogically sound manner so that the interplay of the material can be explored and students are likely to emerge with a stronger understanding of all three content areas than they do when taking the existing 1140, 1160, and 1214 courses consecutively. Furthermore, since many of the current students in 1140 and 1160 have taken courses called "calculus" in high school, we anticipate student satisfaction with these courses to be MUCH higher than the existing courses since they will be in a college course called "calculus" sooner. If students are more satisfied walking in to the course on day 1, they are more likely to be motivated and should thus be more likely to succeed.

With this in mind, it may seem somewhat strange to list Math 1120 or Math 1140 as prerequisite for Math 1210, but this is completely intentional and proper. Students who would currently take Math 1120 (possibly preceded by Math 1103) will still take Math 1120, which covers more of the fundamental, earlier content than will be included in Math 1210 and 1211 (and we are likely to add even more of this foundational content to 1120 going forward). Currently, these students would take Math 1120 one semester, Math 1160 the next, and then Math 1214 in the third semester. Now, rather than taking Math 1160 by itself, most of these students will move from Math 1120 to Math 1210 to Math 1211.

Now that we've explained why Math 1120 is an appropriate prerequisite, let's consider Math 1140. Many transfer courses come in as Math 1140 rather than 1120 (often largely due to credit hour considerations), and students who transfer in Math 1140 credit and still need trigonometry will be better off taking Math 1210 and 1211 instead of 1160 and 1214 since they should emerge from 1210 and 1211 with stronger foundations in algebra, trigonometry, and Calculus I due to the structure of the courses. Thus, we want an explicit prerequisite pathway to exist for these students.

We anticipate most degree programs currently requiring Math 1214 (Calculus I) will list their requirement as "Math 1214; or Math 1210 and 1211." This will be the requirement of the BS in Applied Mathematics degree, for which a DC form is also being submitted in this review cycle.

This is a big change that we expect to positively impact a significant proportion of our incoming freshmen, and we look forward to offering Math 1210 in Fall 2021.

Agenda post

A continuation of Math 1210. Emphasizes differential and integral calculus along with exponential, logarithmic, trigonometric, and inverse functions and equations, plus trigonometric identities and solutions of general triangles. Math 1210 and 1211 combined cover the same calculus content as Math 1214.

Prerequisites

A grade of "C" or better in either Math 1210 or 1214, or by placement exam.

Justification for new course:

As part of the ongoing calculus redesign, we are restructuring our offerings for students who are "not quite ready" for the existing Calculus I. The proposed Calculus

I-A (Math 1210, see the separate CC form) and Calculus I-B (Math 1211, this form) are designed to, as a two-semester sequence, cover all of the existing Math 1214 course content plus a significant portion of the existing content in college algebra (Math 1120 or 1140) and trigonometry (Math 1160). This will not, however, be a simple repackaging of existing content. Algebra, trigonometry, and calculus content will be interwoven in a thoughtful and pedagogically sound manner so that the interplay of the material can be explored and students are likely to emerge with a stronger understanding of all three content areas than they do when taking the existing 1140, 1160, and 1214 courses consecutively. Furthermore, since many of the current students in 1140 and 1160 have taken courses called "calculus" in high school, we anticipate student satisfaction with these courses to be MUCH higher than the existing courses since they will be in a college course called "calculus" sooner. If students are more satisfied walking in to the course on day 1, they are more likely to be motivated and should thus be more likely to succeed.

For the prerequisite, listing Math 1210 seems perfectly normal and completely expected, but Math 1214 seems entirely out of place here. Fortunately, things aren't always as they seem. Many students arrive at S&T with credit for Calculus I (Math 1214) yet their trigonometry placement results demonstrate that they do not have the trig background to be successful in Calculus II. Thus, we currently have a nontrivial group of students who arrive at S&T with Calculus I credit, spend their first semester taking trigonometry (Math 1160), and then move directly into Math 1215 (Calculus II) in the second semester. Since the majority of the trigonometry content (except for extraordinarily basic trigonometry content) will be contained in 1211 rather than 1210, these students can take 1211 instead of 1160 and reinforce both their calculus and trigonometry knowledge. This should be a strongly preferable path for these students, and they will still end up in Calculus II their second semester on campus. (It is for these reasons that we did not add a clause regarding the ability to earn credit for both 1214 and 1211 - students may arrive with 1214 credit and have very good reason to take 1211.)

We anticipate most degree programs currently requiring Math 1214 (Calculus I) will list their requirement as "Math 1214; or Math 1210 and 1211." This will be the requirement of the BS in Applied Mathematics degree, for which a DC form is also being submitted in this review cycle.

This is a big change that we expect to positively impact a significant proportion of our incoming freshmen, and we look forward to offering these courses in upcoming academic year.

Elective for
Majors

No

Justification for
change:

This course is frequently (and appropriately) taken by biology majors and economics majors in addition to business majors, so calling the course "Business Calculus" no longer seems appropriate. "Survey of Calculus" is a very common title for this sort of course. We are not intending to change the content of the course - it has long included examples from the life sciences (and the title of the textbook which has been in use for years references business, economics, and the life sciences), and have simply updated the course description to reflect the reality of what is being taught.

On the prerequisite, we are now including the new Math 1210 (Calculus I-A) course, for which a separate CC form is being submitted. Math 1210 will contain enough algebra content to easily meet the prerequisite for this course, and a student who comes to campus intending on majoring in engineering and later decides to change to biology, economics, or business may prefer taking Math 1212 instead of Math 1211 (Calculus I-B, a separate CC form is also being submitted) to fulfill their calculus requirement. While we do not anticipate a large number of students using Math 1210 to fulfill the prerequisite for Math 1212, we want to make sure it is an explicit option available to the students.

Justification for
change:

Since Math 1214 is now the primary Calculus I course and is taken by a significant number of non-engineers, we are removing "for Engineers" from the title. However, since the primary audience is still students in engineering and the sciences, retaining the reference to "Applications in physical science and engineering" is thoroughly appropriate.

As a result of the new Calculus I-A and I-B courses, we are removing the former clause which allowed some students to take both 1160 and 1214 simultaneously. This was typically not a good option for students, and we were only granting departmental approval in a very small number of cases (typically less than 5 students per semester in recent years), so this change will have an exceedingly minimal impact. We, of course, retain the ability to make this waiver in extraordinary

circumstances, but it's better to not advertise the possibility when it is granted only on a very rare basis.

Justification for
change:

Since Math 1215 is now the primary Calculus II course and is taken by a significant number of non-engineers, we are removing "for Engineers" from the title. However, since the primary audience is still students in engineering and the sciences, retaining the reference to "Applications in physical science and engineering" is thoroughly appropriate.

As a result of the new Math 1210 (Calculus I-A) and Math 1211 (Calculus I-B), we need to modify the prerequisite so that all possible prerequisite paths are addressed. (See the justification on the CC form for Math 1211 for why the seemingly strange prerequisite path of 1214 and 1211 is appropriate.)

Finally, we removed the reference to transcendental functions from the course description. As a result of the introduction of 1210 and 1211, we are moving more of the transcendental functions content to Math 1214 (and thus 1210 and 1211). The 1214 description already mentioned transcendental functions, and since the vast majority of that will be in 1214, it is no longer appropriate to mention it in the 1215 description. This change will be a BIG positive for most students, since they will now see the derivatives and integrals of exponential and logarithmic functions earlier and they will thus be even better prepared for Physics 1135 and other subsequent coursework than they are currently. This change should not cause any negative issues whatsoever for any courses which list 1214 and/or 1215 as a prerequisite.

Description

An introduction to multivariable calculus. Vector valued functions, curves and surfaces in two and three dimensions, partial differentiation, multiple integration, line and surface integrals, the major theorems of vector calculus, and applications of these ideas are studied.

Prerequisites

A grade of "C" ~~Math 1215~~ or **better in either Math 1215** ~~Math 1221 with a grade of "C"~~ or **Math 1221. better.**

Field Trip

Statement

Credit Hours LEC: 3 LAB: 1 IND: 0 RSD: 0
 Total: 4

Required for Majors	Yes
Elective for Majors	No

Justification for
change:

Two very tiny changes. First, I removed the "with Analytic Geometry" from the title so that the titles of 1214, 1215, and 2222 now are of equal simplicity. Second, I reworded the prerequisite so the wording of the prerequisites of 1214, 1215, and 2222 now match.

This change will have an impact on precisely zero other courses, programs, academic departments, etc. and will require very minimal changes on the Registrar's end.

Compared to some of the other CC forms we're submitting this cycle, this one should be nice and easy!

Justification for new course:

This course was successfully offered in Fall 2019 and Fall 2020 by Dr. Xiaoming He, and we intend to continue offering this course on a regular basis. As we grow the

computational offerings in the department, having a very clearly defined introductory course both for majors and non-majors is important. Students earning a BS in Applied Mathematics with a Computational Mathematics emphasis will be required to take this course starting with the Fall 2021 catalog (a separate DC form is being submitted with changes to the computational emphasis), other mathematics undergraduates are likely to choose this course as part of their upper level math courses, and graduate students in their first semester on campus who are focusing on computational mathematics may also need this course.

History

1. Jul 7, 2014 by
Ilene Morgan
(imorgan)

Implementation and theoretical analysis of the finite element method for the approximate solution of partial differential equations. Implementation of finite element methods for elliptic and parabolic equations. Theoretical analysis of convergence, accuracy, and stability of approximate solutions.

Prerequisites

Math 5601, ~~Any 4000 or higher level Mathematics course, or~~ any instructor approved **4000-level or higher** ~~4000 or higher level~~ course from another discipline with a significant computational component.

Field Trip

Credit Hours LEC: 3 LAB: 0 IND: 0 RSD: 0

Total: 3

Required for No

Majors

Elective for
Majors

Yes ~~No~~

Justification for
change:

As we work to both improve and streamline our computational course offerings in the department, it became apparent that this course was a better fit at the 5000-level, particularly as part of a two-semester sequence with the new Math 5601 (a separate CC form has been submitted to acquire a permanent course number now that the new Math 5601 has been offered twice as a 5001 experimental course). Making this course a 5000-level course makes it far more attractive to students from outside the department (who typically find this course very useful), and also makes it more attractive to undergraduates in the department who may choose to take the course as an upper-division math elective and will no longer need special permission to take a 6000-level course.

Do Google, Airbus, and Samsung owe their success to the wisdom and foresight of government actors? This course explores whether and how public policy can foster the advancement of science, technology, and innovation. The course analyzes and compares how national innovation systems have evolved and function in the United States, Europe, and Asia.

Prerequisites

Pol Sci 1200 or History 1200 or History 1310

Field Trip

Statement

Credit Hours	LEC: 3	LAB: 0	IND: 0	RSD: 0
Total: 3				
Required for Majors	No			
Elective for Majors	Yes			

Justification for new course:

This course has been taught experimentally twice before, though with differing requirements each time. Normally, it would not be eligible for a permanent course number without being run twice with the same prerequisites.

However, we are submitting it here as a distribution requirement for a certificate in Technology, Philosophy, and Ethical Futures (proposal submitted), housed in ALP. It will also be a requirement for a certificate in Science, Technology, and Society, housed in History and Political Science (though this proposal has not yet been submitted).

GGPE has also expressed interest in including this course in a graduate certificate, which is why we are proposing it here as a 4000-level course. In the past, it has not drawn huge enrollments, but 1) it has historically been difficult to do so in the absence of a Political Science major, on campus, 2) its inclusion in new certificates at potentially both the graduate and undergraduate level should increase enrollments significantly, and 3) one of our three Political Science professors will be retired (without immediate replacement) effective Fall 2021, and so there will be significantly fewer options for upper-level Political Science courses. All of these issues indicate that the course should have no trouble filling in the future.

Minor in Artificial Intelligence and Machine Learning in Business

The Minor requires 15 credit hours, as follows:

BUS 5730	Machine Learning and Artificial Intelligence for Business	3
IS&T 5535	Machine Learning Algorithms and Applications	3
IS&T 3420	Introduction to Data Science and Management	3
And two courses from the following list:		
STAT 3111	Statistical Tools For Decision Making	3
IS&T 3333	Data Networks and Information Security	3
IS&T 3343	Systems Analysis	3
IS&T 4450	Introduction to Information Visualization	3

IS&T 5420	Business Analytics and Data Science	3
IS&T 5450	Course IS&T 5450 Not Found	3
IS&T 5520	Data Science and Machine Learning with Python	3
ERP 5410	Use of Business Intelligence	3

Justification for request

Strong overlap in machine learning and data science. Update to reflect course renumbering.

Bachelor of Science Applied Mathematics

A minimum of 128 credit hours is required for a bachelor of science degree in applied mathematics. A minimum grade of "C" is required by the department in each course counted toward the math/stat requirement for the B.S. in applied mathematics. Moreover, the department requires that an average of at least two grade points per credit hour must be obtained for all courses taken within the department. These requirements for the B.S. degree are in addition to credit received for algebra, trigonometry, and basic ROTC.

The applied mathematics curriculum requires fifteen semester hours of technical electives, except where this requirement is reduced to compensate for extra requirements of emphasis areas, in addition to basic courses in chemistry or biology, physics, computer science, and economics. Two semesters of language and communication, [ENGLISH 1160](#) or [ENGLISH 3560](#), and either [HISTORY 1300](#), [HISTORY 1310](#), [HISTORY 1200](#), or [POL SCI 1200](#) are also required. Specific requirements for the bachelor's degree are outlined in the sample program below.

Freshman Year			
First Semester	Credits	Second Semester	Credits
MATH 1101	1	MATH 1215 or 1221 ¹	4
MATH 1208 or MATH 1214; OR 1210 AND 1211 ¹	4-8	Science Requirement ⁵	5
CHEM 1100	1	COMP SCI 1500	3
ENGLISH 1120	3	Language and Communication Requirement ³	3
Campus History Requirement ²	3	Basic ROTC (if elected) ⁴	0
Language and Communication Requirement ³	3		
Basic ROTC (if elected) ⁴	0		
	15-19		15
Sophomore Year			

First Semester	Credits	Second Semester	Credits
MATH 2222 ¹	4	MATH 3304 ¹	3
MATH 3108 ¹	3	MATH 3109 ¹	3
COMP SCI 1570	3	Statistics Requirement ^{1,6,7}	3
COMP SCI 1580	1	ECON 1100 or 1200	3
PHYSICS 1135	4	PHYSICS 2135	4
ENGLISH 1160 ⁸	3	Basic ROTC (if elected) ⁴	0
Basic ROTC (if elected) ⁴	0		
	18		16
Junior Year			
First Semester	Credits	Second Semester	Credits
MATH 4209 ¹	3	MATH 4211 ¹	3
Literature	3	Literature	3
Electives-Math or Stat ^{1,7,9}	3	Electives-Math or Stat ^{1,7,9}	3
Electives-Technical ¹⁰	3	Electives-Technical ¹⁰	3
Electives	3	Electives	3
	15		15
Senior Year			
First Semester	Credits	Second Semester	Credits
Capstone Course ^{1,7,11}	3	Electives-Math or Stat ^{1,7,9}	3
Electives-Math or Stat ^{1,7,9}	3	Electives-Technical ¹⁰	3
Electives-Technical ¹⁰	6	Electives	10
Electives	6		
	18		16
Total Credits: 128-132			

¹ A minimum grade of "C" is required by the department in each course counted toward the math/stat requirement for the B.S. in applied mathematics. Moreover, the department requires that an average of at least two grade points per credit hour must be obtained for all courses taken within the department.

² May be met by [HISTORY 1200](#), [HISTORY 1300](#), [HISTORY 1310](#), or [POL SCI 1200](#).

³ This requirement will be satisfied by either (1) six credits of Speech and Media Studies course work; or (2) a modern language approved by the advisor with competency at the level of second semester college/university course work or, with approval of the department, by completion of Level III of a foreign language in high school.

⁴ Basic ROTC may be elected in the freshman and sophomore years, but is not creditable toward a degree. Up to six credit hours of advanced ROTC may be credited as free electives towards a degree.

⁵ May be met by [CHEM 1310](#) and [CHEM 1319](#) or by [BIO SCI 1113](#) and [BIO SCI 1219](#).

⁶ May be met by [STAT 3113](#), [STAT 3115](#), or [STAT 3117](#).

⁷ No course may be used to satisfy more than one degree requirement, except as otherwise noted.

⁸ May also be satisfied by [ENGLISH 3560](#).

⁹ The student must choose two from the following five groups and then complete six hours in each of the chosen groups

1. [MATH 5105](#), [MATH 5106](#), [MATH 5107](#), [MATH 5108](#)
2. [MATH 5105](#), [MATH 5215](#), [MATH 4530](#) or [MATH 5530](#), [MATH 5351](#), [MATH 5585](#)
3. [MATH 5222](#), [MATH 5302](#), [MATH 5325](#), [MATH 5351](#), [MATH 5483](#), [MATH 5603](#), [MATH 5604](#)
4. [STAT 5814](#), [STAT 5643](#), [STAT 5644](#), [STAT 5346](#), [STAT 5353](#), [STAT 5755](#), [STAT 5756](#)
5. [COMP SCI 3200](#), [COMP SCI 5201](#), [COMP SCI 5202](#), [MATH 5603](#), [MATH 5604](#), [MATH 5737](#), [STAT 5260](#), [STAT 5346](#), [STAT 5755](#), [STAT 5756](#), [STAT 5814](#).

10 Courses in biology, chemistry, computer science, economics, engineering, geology, mechanics, or physics approved by advisor. The general math curriculum requires 15 credit hours; actuarial science emphasis area, 12 credit hours; algebra/discrete math emphasis area, 15 credit hours; computational math emphasis area, 9 credit hours; statistics emphasis area, 12 credit hours.

11 The capstone experience for all applied mathematics majors (other than students completing the secondary education emphasis area) consists of a course chosen from the following list: [MATH 4098](#) (three credits), [MATH 4099](#) or [STAT 4099](#) (three credits), [MATH 5107](#), [MATH 5215](#), [MATH 5603](#), [STAT 5346](#), [STAT 5353](#), [STAT 5755](#), or [STAT 5756](#).

Emphasis Areas at the Bachelor of Science Level

Note: It is not required that students complete an emphasis area to obtain the bachelor of science degree in applied mathematics. The emphasis area requirements often specify most, if not all, of the electives in mathematics, statistics and computer science as well as many technical or free electives.

Actuarial Science Emphasis Area

Required courses:

STAT 5643	Probability And Statistics	3
STAT 5644	Mathematical Statistics	3
ECON 1100	Principles Of Microeconomics	3
ECON 1200	Principles Of Macroeconomics	3
ECON 2200	Intermediate Macroeconomic Theory	3
MATH 5737	Financial Mathematics	3
And six hours from:		6
STAT 5814	Applied Time Series Analysis	3
STAT 5346	Regression Analysis	3
STAT 5353	Statistical Data Analysis	3
STAT 5755	Statistical Models in Actuarial Science	3
STAT 5756	Statistical Models for Life Contingencies	3

In addition, the student must pass the first actuarial science exam. Note that the capstone requirement is included in, not separate from, this list of courses.

When selecting a 3000-level statistics course to satisfy the major requirements, it is recommended that students pursuing an Actuarial Science emphasis select Stat 3117.

Algebra/Discrete Mathematics Emphasis Area

Required courses:

MATH 5105	Modern Algebra I	3
MATH 5106	Modern Algebra II	3
or MATH 6105	Finite Fields And Applications	
MATH 5107	Combinatorics And Graph Theory (Satisfies Capstone requirement)	3
MATH 5108	Linear Algebra II	3

STAT 5643	Probability And Statistics	3
Select one of the following:		3
STAT 5644	Mathematical Statistics	3
COMP SCI 2200	Theory of Computer Science	3
COMP SCI 3200	Introduction To Numerical Methods	3
COMP SCI 5200	Analysis Of Algorithms	3

Computational Mathematics Emphasis Area

Required courses:

STAT 5353	Statistical Data Analysis (Satisfies Capstone requirement)	3
STAT 5346	Regression Analysis	3
COMP SCI 1575	Data Structures	3
COMP SCI 3200	Introduction To Numerical Methods	3
Select three of the following:		
MATH 5302	Intermediate Differential Equations	3
MATH 5325	Partial Differential Equations	3
MATH 5603	Methods of Applied Mathematics	3
MATH 5604	Introduction to Numerical Methods for Differential Equations	3
Select one of the following:		3
COMP SCI 5201	Object-Oriented Numerical Modeling I	3
COMP SCI 5402	Introduction to Data Mining	3
MECH ENG 5139	Computational Fluid Dynamics	3
AERO ENG 5139	Computational Fluid Dynamics	3
MECH ENG 5212	Introduction to Finite Element Analysis	3
AERO ENG 5212	Introduction to Finite Element Analysis	3
MECH ENG 5830	Applied Computational Methods	3
AERO ENG 5830	Applied Computational Methods	3

Applied Analysis Emphasis Area

Required:

COMP SCI 3200	Introduction To Numerical Methods	3
and two of groups 3, 4, and 5 under Mathematics and Statistics electives (plus the Capstone requirement) must be satisfied,		
and choose Technical Electives and Free Electives to satisfy one of the following two options:		

Engineering Option

Required courses:

CIV ENG 2200	Statics	3
CIV ENG 2210	Mechanics Of Materials	3
Select one of the following:		

MECH ENG 2350	Engineering Mechanics-Dynamics	
MECH ENG 2360	Dynamics	3
Select three of the following:		9
Courses, which have any of the listed courses as prerequisites, may also be used to fulfill this requirement.		
AERO ENG 3613	Aerospace Mechanics I	3
AERO ENG 5313	Intermediate Dynamics of Mechanical and Aerospace Systems	3
AERO ENG 5614	Spaceflight Mechanics	3
CHEM ENG 2100	Chemical Engineering Material & Energy Balances	4
CHEM ENG 2110	Chemical Engineering Thermodynamics I	3
ELEC ENG 2800	Electrical Circuits	3
MECH ENG 3313	Machine Dynamics	3
MECH ENG 2519	Thermodynamics	3
or MECH ENG 2527	Thermal Analysis	
MECH ENG 5131	Intermediate Thermofluid Mechanics *	3
NUC ENG 3103	Interactions Of Radiation With Matter	3
NUC ENG 4203	Reactor Physics I	3
PET ENG 4621	Fundamentals Of Petroleum Reservoir Simulation	3
CIV ENG 3330	Engineering Fluid Mechanics	3
or NUC ENG 3221	Reactor Fluid Mechanics	
or MECH ENG 3131	Thermofluid Mechanics I	
CIV ENG 5207	Computer Methods of Structural Analysis	3
CIV ENG 5333	Intermediate Hydraulic Engineering	3
ELEC ENG 5370	Introduction to Neural Networks and Applications	3
MECH ENG 5307	Vibrations I	3
MECH ENG 5211	Introduction To Continuum Mechanics	3
MECH ENG 5234	Stability of Engineering Structures *	3
MECH ENG 5254	Variational Formulations Of Mechanics Problems	3
GEO ENG 4115	Statistical Methods in Geology and Engineering	3
GEOPHYS 3221	Potential Field Theory	3

* Courses with an asterisk (*) are co-listed in more than one department.

Physics Option

Required courses:

PHYSICS 2311	Modern Physics I	3
PHYSICS 3311	Modern Physics II	3
And take at least nine additional hours of physics courses at the 2000 level or above.		9

Note that the requirements for a minor in physics will be satisfied with this option.

Secondary Education Emphasis Area

You may earn a B.S. degree in applied mathematics from Missouri S&T and certification to teach at the secondary level in the schools of Missouri with this emphasis area program. This program can be completed in four academic years.

Students interested in this emphasis area should consult with the advisor for mathematics education majors in the mathematics and statistics department.

In order to successfully complete this emphasis area, students must maintain a cumulative GPA of at least 2.75 and attain at least a 3.0 GPA in all mathematics, statistics, and education courses. Current Missouri S&T or transfer students who wish to pursue this emphasis area must meet these GPA requirements to be accepted into the program. Students must also meet all requirements listed under teacher education in the catalog. Students who do not meet all the teacher certification requirements will not be eligible for the secondary education emphasis area, even if they have completed all coursework.

A degree in this emphasis area requires 128 credit hours. The required courses and a sample four-year program are provided below. (A minimum grade of "C" is required by the department in all mathematics and statistics courses counted toward this degree. No course may be used to satisfy more than one degree requirement, except as otherwise noted.)

Freshman Year			
First Semester	Credits	Second Semester	Credits
MATH 1101	1	MATH 1215 or 1221	4
MATH 1208 or MATH 1214 OR MATH 1210 AND MATH 1211	4 or 8	BIO SCI 1113	3
CHEM 1100	1	BIO SCI 1219 (Science Lab Requirement) ¹	1
ENGLISH 1120	3	PSYCH 1101	3
HISTORY 1300 or 1310	3	EDUC 1164	2

ENGLISH 3170	3	Fine Art Elective ²	3
EDUC 3216	3	PSYCH 2300 or EDUC 2102	3
	15		18
Senior Year			

First Semester	Credits	Second Semester	Credits
Electives-Math or Stat ⁴	6	EDUC 4298 & EDUC 4299 ³	13
PSYCH 4310 or EDUC 4310	3		
POL SCI 1200	3		
Literature	3		
Electives	2		
	17		13
Total Credits: 127-131			

- ¹ May be met by [BIO SCI 1219](#) or [CHEM 1319](#), but if [CHEM 1319](#) is used, one extra hour must be attained in any elective area to fulfill the 128 total hour requirement.
- ² Any three-hour course from the areas of foreign language, music, theater, philosophy or art.
- ³ Student Teaching satisfies the capstone requirement for students completing this emphasis area.
- ⁴ Any two three-hour courses from the following list with the approval of the mathematics education advisor. [MATH 5105](#), [MATH 5106](#), [MATH 5107](#), [MATH 5108](#), [MATH 5215](#), [MATH 5222](#), [MATH 5302](#), [MATH 5325](#), [MATH 5351](#), [MATH 5483](#), [MATH 5585](#), [STAT 5643](#), [STAT 5644](#), [STAT 5346](#), [STAT 5353](#), [COMP SCI 3200](#), [COMP SCI 5201](#), [COMP SCI 5202](#), [MATH 5737](#).
- ⁵ [COMP SCI 1570](#) if not transferred in will require [COMP SCI 1580](#), requiring one extra credit hour which will count either towards technical electives or free electives.

Statistics Emphasis Area

Required courses:

STAT 5643	Probability And Statistics	3
STAT 5644	Mathematical Statistics	3
STAT 5346	Regression Analysis	3
STAT 5353	Statistical Data Analysis (Satisfies Capstone requirement)	3
Select two of the following:		6
BIO SCI 2223	General Genetics	3
COMP SCI 3200	Introduction To Numerical Methods	3
COMP SCI 5402	Introduction to Data Mining	3
STAT 5260	Statistical Data Analysis Using SAS	3
STAT 5814	Applied Time Series Analysis	3
And complete either A or B:		6
(A) Complete the following 2 courses:		
MATH 5215	Introduction To Real Analysis	3
MATH 5351	Introduction To Complex Variables	3
(B) Complete 6 hours from:		
MATH 5107	Combinatorics And Graph Theory	3
MATH 5108	Linear Algebra II	3
MATH 5603	Methods of Applied Mathematics	3

Justification for request

As part of the current calculus redesign, we will be offering new Math 1210 and Math 1211 courses (see separate CC forms) which, combined, cover the same calculus content as Math 1214. We want our majors to have the option to take either 1214 or the 1210-1211 sequence, so we have added that option.

To maintain consistent degree hours, students taking the 1210-1211 sequence will need four fewer free electives, so the degree audit should be built so that the free electives constitute sufficient additional coursework to reach the 128 hour requirement.

Bachelor of Arts Biological Sciences Degree Requirements

Specific requirements for the B.A. degree in biological sciences include a minimum of 120 semester hours of credit, including 30 hours of biology core courses. A "C" or better is required for all Biological Science courses.

Core Courses		
BIO SCI 1201	Biological Sciences Freshman Seminar	1
BIO SCI 1113	General Biology	3
or BIO SCI 1213	Principles of Biology	
BIO SCI 1219	General Biology Lab	1
BIO SCI 1223	Biodiversity	3
BIO SCI 1229	Biodiversity Lab	1
BIO SCI 2213	Cell Biology	3
BIO SCI 2219	Cell Biology Laboratory	1
BIO SCI 2223	General Genetics	3
BIO SCI 2263	Ecology	3
BIO SCI 3233	Evolution	3
BIO SCI 4010	Seminar	1
Advanced courses, 2000 level or higher (at least one with laboratory and one 3000 or 4000 level)		9
Chemistry		
CHEM 1310 & CHEM 1319 & CHEM 1320 & CHEM 1100	General Chemistry I and General Chemistry Laboratory and General Chemistry II and Introduction To Laboratory Safety & Hazardous Materials	9

CHEM 2210 & CHEM 2220	Organic Chemistry I and Organic Chemistry II	6
Mathematics & Physical Science		
Various courses in mathematics, physics, and/or geology chosen in consultation with academic advisor. (Note: Proficiency in College Algebra must be demonstrated by a grade of "C" or better in a College Algebra course or by examination)		9
Computer Science/Statistics (Select one of the following:)		3-4
COMP SCI 1570 & COMP SCI 1580	Introduction To C++ Programming and Introduction To Programming Laboratory	
or COMP SCI 1971 & COMP SCI 1981	Introduction To Programming Methodology and Programming Methodology Laboratory	
STAT 3111	Statistical Tools For Decision Making	
STAT 3425	Introduction to Biostatistics	4
General Requirements for BA		
English Composition		6
ENGLISH 1120	Exposition And Argumentation	
One additional composition course		
Western Civilizations		6
HISTORY 1100	Early Western Civilization	
HISTORY 1200	Modern Western Civilization	
Foreign Language (three semesters of a foreign language)		12
Humanities (including one class in each of literature, philosophy, and fine arts)		12
Social Sciences (including classes in two of the following three subjects: economics, political science, psychology)		12

Elective credits: In consultation with his or her advisor, each student will elect sufficient additional courses to complete a minimum of 120 credit hours.

Bachelor of Arts Biological Sciences Pre-Medicine Emphasis Area Degree Requirements

The student will fulfill the requirements for a bachelor of arts in biological sciences as outlined above. The following classes are also required:

CHEM 2219 & CHEM 2229	Organic Chemistry I Lab and Organic Chemistry II Lab	2
2 semesters of Physics and labs:		8-10
PHYSICS 1145	College Physics I	
or PHYSICS 1135	Engineering Physics I	
PHYSICS 2145	College Physics II	
or PHYSICS 2135	Engineering Physics II	

The following classes are highly recommended:

BIO SCI 3333	Human Anatomy and Physiology I	3
BIO SCI 3339	Human Anatomy Physiology I Lab	1
BIO SCI 3343	Human Anatomy and Physiology II	3
BIO SCI 3349	Human Anatomy and Physiology II Laboratory	1
CHEM 4610	General Biochemistry	3

Bachelor of Arts Biological Sciences Secondary Education Emphasis Area Degree Requirements

You may earn a B.A. degree in biological sciences from Missouri S&T and certification to teach at the secondary level in the schools of Missouri with this emphasis area. This program can be completed in four academic years, and student teaching is arranged with public schools within 30 miles of the Rolla campus.

Students interested in this emphasis area should consult with the advisor for biological sciences education majors in the biological sciences department.

In order to successfully complete this emphasis area, students must maintain a cumulative GPA of at least 2.75, and attain at least a 3.0 GPA average for all biology courses and professional education courses. Current Missouri S&T or transfer students who wish to pursue this emphasis area must meet both these GPA requirements to be accepted into the program. Students must also meet all requirements listed under the teacher education program in this catalog. Students who do not meet all the teacher certification requirements will not be eligible for the secondary education emphasis area, even if they have completed all required course work.

A degree in this emphasis area requires 131 credit hours. The required courses are provided below. A minimum grade of "C" is required by the department in all biological sciences courses counted toward this degree.

Humanities: 18 semester hours		
ENGLISH 1120	Exposition And Argumentation	3
ENGLISH 1160	Writing And Research	3
or ENGLISH 3560	Technical Writing	
SP&M S 1185	Principles Of Speech	3
At least one course in each of the following: Literature, Philosophy and Fine Arts		9
Social Sciences: 15 semester hours		
HISTORY 3530	History of Science	3
HISTORY 1100	Early Western Civilization	3
HISTORY 1200	Modern Western Civilization	3
POL SCI 1200	American Government	3
PSYCH 1101	General Psychology	3
Mathematics/Physical Science: 9 semester hours		
MATH 1103	Fundamentals Of Algebra	3
PHYSICS 1145	College Physics I	3
or PHYSICS 1505	Introductory Astronomy	
GEOLOGY 1110	Physical And Environmental Geology	3
Computer Science/Statistics: 3 semester hours		

3 semester hours of Computer Science or Statistics		3
Chemistry: 17 semester hours		
CHEM 1310 & CHEM 1319 & CHEM 1320 & CHEM 1100	General Chemistry I and General Chemistry Laboratory and General Chemistry II and Introduction To Laboratory Safety & Hazardous Materials	9
CHEM 2210 & CHEM 2220	Organic Chemistry I and Organic Chemistry II	6
Biological Sciences: 27 semester hours		
BIO SCI 1201	Biological Sciences Freshman Seminar	1
BIO SCI 1213	Principles of Biology	3
or BIO SCI 1113	General Biology	
BIO SCI 1219	General Biology Lab	1
BIO SCI 1223 & BIO SCI 1229	Biodiversity and Biodiversity Lab	4
BIO SCI 1173	Introduction to Environmental Sciences	3
BIO SCI 2213 & BIO SCI 2219	Cell Biology and Cell Biology Laboratory	4
BIO SCI 2223	General Genetics	3
BIO SCI 2263	Ecology	3
BIO SCI 3233	Evolution	3
BIO SCI 4010	Seminar	1
Education: 42 semester hours		
EDUC 1040	Perspectives In Education	2
EDUC 1104	Teacher Field Experience I	2
EDUC 1164	Teacher Field Experience II	2
EDUC 1174	School Organization and Administration For Teachers	2
EDUC 3216	Teaching Reading in Content Area	3
EDUC 3280	Teaching Methods and Skills in Content Areas	6
EDUC 4298	Student Teaching Seminar	1
EDUC 4299	Student Teaching	12
ENGLISH 3170	Teaching And Supervising Reading and Writing	3
PSYCH 2300	Educational Psychology	3
PSYCH 3310	Developmental Psychology	3
PSYCH 4310	Psychology Of The Exceptional Child	3

Bachelor of Science Biological Sciences Degree Requirements

A minimum of 124 credit hours is required for a Bachelor of Science degree in Biological Science.

A minimum grade of "C" is required for each Biological Science course used to fulfill the B.S. degree requirements.

These requirements for the B.S. degree are in addition to credit that is received for basic ROTC.

The Biological Science B.S. degree must include ~~48~~ 49 semester hours of biological sciences course work, to include:

BIO SCI 1201	Biological Sciences Freshman Seminar	1
BIO SCI 1113	General Biology	3
or BIO SCI 1213	Principles of Biology	
BIO SCI 1219	General Biology Lab	1
BIO SCI 1223	Biodiversity	3
BIO SCI 1229	Biodiversity Lab	1
BIO SCI 2213	Cell Biology	3
BIO SCI 2219	Cell Biology Laboratory	1
BIO SCI 2223	General Genetics	3
BIO SCI 2263	Ecology	3
BIO SCI 3233	Evolution	3
BIO SCI 4010	Seminar	1
Advanced biological sciences or approved course work in other departments for a total of 49 credit hours of biology-related classes to include at least one laboratory course from the following:		25
BIO SCI 3319	Microbiology Lab	
or BIO SCI 3339	Human Anatomy Physiology I Lab	
or BIO SCI 3349	Human Anatomy and Physiology II Laboratory	
or BIO SCI 4329	Molecular Genetics Laboratory	
19 semester hours of chemistry to include general chemistry		19

CHEM 1310 & CHEM 1319 & CHEM 1320 & CHEM 1100	General Chemistry I and General Chemistry Laboratory and General Chemistry II and Introduction To Laboratory Safety & Hazardous Materials	
CHEM 2210 & CHEM 2219 & CHEM 2220 & CHEM 2229	Organic Chemistry I and Organic Chemistry I Lab and Organic Chemistry II and Organic Chemistry II Lab	
2 semesters of College (Engineering) Physics and labs		8
PHYSICS 1145	College Physics I	
or PHYSICS 1135	Engineering Physics I	
PHYSICS 2145	College Physics II	
or PHYSICS 2135	Engineering Physics II	
Math and Statistics		8-9
MATH 1208	Calculus With Analytic Geometry I	
or MATH 1214	Calculus For Engineers I	
or MATH 1212	Business Calculus	
STAT 3425	Introduction to Biostatistics	4
12 semester hours of humanities, excluding foreign language, and to include:		12
ENGLISH 1120 & ENGLISH 1160	Exposition And Argumentation and Writing And Research (entering students will normally take ENGLISH 1120 either semester of the first year)	
9 hours of social sciences, to include		9
HISTORY 1200	Modern Western Civilization (or equivalent)	
or HISTORY 1300	American History To 1877	
or HISTORY 1310	American History Since 1877	
or POL SCI 1200	American Government	
Total Credits		108- 109

Elective credits: In consultation with his or her advisor, each student will elect sufficient additional courses to complete a minimum of 124 credit hours.

Justification for request

Gen Bio lab change from 2 to 1 hour

Minor in Cybersecurity Management and Information Assurance

This minor requires the following 15 hours of coursework:

The following three courses are required:

BUS 5910	Privacy and Information Security Law	3
--------------------------	--------------------------------------	---

IS&T 4780	Human and Organizational Factors in Cybersecurity	3
IS&T 5780	Course IS&T 5780 Not Found	3
IS&T 3333	Data Networks and Information Security	3

Two of the following ~~three~~ courses must also be taken:

ERP 5240	Enterprise Application Development and Software Security	3
IS&T 4335	Fundamentals of Mobile Technology for Business	3
IS&T 3420	Introduction to Data Science and Management	3
IS&T 4641	Digital Commerce and the Internet of Things	3
BUS 5910	Privacy and Information Security Law	3

Justification for request

There is a data science element in information assurance. Update to reflect course renumbering.

Energy/Technology Minor

(15 hours)

Required courses:		
ECON 1100	Principles Of Microeconomics	3
ECON 1200	Principles Of Macroeconomics	3
ECON 2100	Intermediate Microeconomic Theory	3
And 6 hours from:		
ECON 4330	Course ECON 4330 Not Found	3
ECON 4300	Research Methods and Applications in Economics and Business	3
ECON 4430	Cost-Benefit Analysis	3
ECON 4440	Environmental And Natural Resource Economics	3
ECON 4540	Energy Economics	3
ECON 4130	Network Economy	3

Justification for request

Course 4330 doesn't exist and was a mistake in switching to four-digit courses. 4300 replaces 4330. Since this is an Energy minor, Energy Economics should be on the list of possible courses as well (4540). Network Economy is related to technology and should be available as an elective as well.

International Economics Minor

(15 hours)

Required courses:		
ECON 1100	Principles Of Microeconomics	3
ECON 1200	Principles Of Macroeconomics	3
ECON 2200	Intermediate Macroeconomic Theory	3
And 6 hours from:		
ECON 4710	International Trade	3
ECON 4720	International Finance	3
ECON 4730	Economic Development	3
ECON 4350	Statistical Models in Actuarial Science	3

Justification for request

In the switch to four-digit courses Econ 4350 replaced the course that should have been on the list. International Finance (4720) should be included in a minor in International Economics.

Degree Requirements

M.S. with thesis: The M.S. degree with thesis requires the completion of 24 hours of graduate course work (5000-level or above), 6 hours of research, and the successful completion and defense of a research thesis.

M.S. without thesis: The M.S. degree without thesis requires the completion of 30 hours of graduate course work (5000-level and above). Courses below the 5000-level will not count toward the M.S. degree, even if they are taken to fulfill prerequisites.

The following core courses are required of all M.S. students in information science and technology. These courses are designated to ensure that all IS&T masters students study the four information systems perspectives of networks and web design, human perception, application implementation, and organizational systems.

IS&T 5251	Technological Innovation Management and Leadership
IS&T 5885	Human-Computer Interaction (IST 6251 – Technological Innovation, Entrepreneurship, and Economic Development)
IST 6251 – Technological Innovation, Entrepreneurship, and Economic Development	
IS&T 6261	Advanced Information Systems Project Management
IS&T 6336	Foundations of Internet Computing

Justification for request

This new course, IST 6251, will be a more advanced version of IST 5251 that is particularly appropriate as a 6000-level class, particularly for MS IST students. IST 5251 will be restructured to mainly focus on undergraduate students.

Premedicine Minor

It is recommended that students seeking the Pre-Medicine minor declare their intentions as soon as possible. Students completing the Pre-Medicine minor curriculum in addition to their BA/BS curriculum will have completed all requirements for admission to most Medical, Dental, Veterinary or other health profession programs. However, it is important to consult with a member of the Pre-Health Professions Advisory Committee to ensure you are completing the necessary coursework for your desired profession. The Pre-Medicine minor is not intended for a student majoring in Chemistry, Biological Sciences or Chemical and Biochemical Engineering which already offer a Pre-Medicine approved curriculum. Required courses for the Pre-Medicine minor are:

BIO SCI 1213 & BIO SCI 1219	Principles of Biology and General Biology Lab	4
or BIO SCI 1113 & BIO SCI 1219	General Biology and General Biology Lab	
BIO SCI 2213 & BIO SCI 2219	Cell Biology and Cell Biology Laboratory	4
CHEM 1310 & CHEM 1319 & CHEM 1320 & CHEM 1100	General Chemistry I and General Chemistry Laboratory and General Chemistry II and Introduction To Laboratory Safety & Hazardous Materials	9
CHEM 2210 & CHEM 2219 & CHEM 2220 & CHEM 2229	Organic Chemistry I and Organic Chemistry I Lab and Organic Chemistry II and Organic Chemistry II Lab	8
PHYSICS 1145	College Physics I	4
or PHYSICS 1135	Engineering Physics I	
PHYSICS 2145	College Physics II	4
or PHYSICS 2135	Engineering Physics II	
Mathematics two semesters to include:		
MATH 1208	Calculus With Analytic Geometry I	
or MATH 1212	Business Calculus	
or MATH 1214	Calculus For Engineers I	
One of the following courses (taking all four courses is strongly encouraged):		
BIO SCI 2223	General Genetics	
BIO SCI 3333	Human Anatomy and Physiology I	
BIO SCI 3343	Human Anatomy and Physiology II	
CHEM 4610	General Biochemistry	
PREMED 3010	Communication Workshop for the Pre-Health Student (Suggested but not required)	1

Theatre Minor Curriculum

A minor in Theatre requires a minimum of **15 +6** hours comprised of the following courses:

Required Courses (6 credits):

THEATRE 1190	Theatre via Video	3
THEATRE 2144	Acting I	3
THEATRE 1142	Stage Productions, Performers	4
or THEATRE 3220	Theatre Ensemble	
THEATRE 1143	Stage Productions, Technicians	4
THEATRE 2143	Stagecraft	3
THEATRE 1150	Course THEATRE 1150 Not Found	
THEATRE 2143	Stagecraft	3

In addition to the courses listed above, **students are the student is** required to choose **3 a concentration and complete enough hours from one** of the **courses below (9 credits): following concentration areas to meet the minimum 16 hours.**

THEATRE 2141	Acting I	3
THEATRE 3241	Acting II	3
THEATRE 3243	Entertainment Design	3
THEATRE 4341	Directing	3

Acting/Directing

THEATRE 3244	Acting II	3
THEATRE 4341	Directing	3
THEATRE 3242	Course THEATRE 3242 Not Found	3
or MUSIC 1114	Individual Music Instruction I	

Technical Theatre

THEATRE 3242	Course THEATRE 3242 Not Found	3
THEATRE 3244	Acting II	3

~~or THEATRE 4344~~

Directing

Justification for request

The curriculum for the introductory theatre course needs serious updating, so we are getting rid of Theatre 1190: Theatre via Video and replacing it with Theatre 1150: Theatre for Social Change, which would be a required course for the Theatre Minor. This would put S&T in line with other universities around the country with theatre curriculum offered to non-majors.

The previous Theatre minor requirements were confusing to students. There were two separate concentration areas that overlapped too generally and offered no extreme differences. We want the Theatre minor to be in line with other minors in the department in structure and aesthetic, so we are streamlining the requirements and making it clearer to the students. We believe this small structure change will have positive effects and will be clearer to students wanting to explore theatre during their time at Missouri S&T.

AI, Machine Learning and Automation in Business

Artificial Intelligence is a disruptive technology in the business realm with transformational impact. From detecting malware and preventing money laundering to automating insurance claims and optimizing inventory and improving product recommendations and more, AI will continue to necessitate changes in core business processes and models. Within the past few years, machine learning, while not fully tapped in the business sphere, has become more effective and widely utilized. Tomorrow's leaders and managers will need to integrate machine learning where appropriate, incorporating its capabilities with those of humans. The design and implementation of new combinations of technologies with human skills to meet customers' needs will require critical thinking skills, creativity, and project planning.

Required Core Courses:

BUS 5730 Machine Learning and Artificial Intelligence for Business

IS&T 5535 Machine Learning Algorithms and Applications

Elective courses (choose two):

IS&T 5420 Business Analytics and Data Science

IS&T 5520 Data Science and Machine Learning with Python

IS&T 6443 Information Retrieval and Analysis

IS&T 5445 Course IS&T 5445 Not Found

BUS 6723 Artificial Intelligence, Robotics, and Information Systems Management

ERP 6220 Data Modeling & Visualization Prototyping for Enterprise Decision Dashboards

~~A student admitted to this graduate certificate must complete four courses: Required Courses: BUS 5730 Machine Learning and Artificial Intelligence for Business IS&T 5535 Machine Learning Algorithms and Applications Elective Courses (choose two): BUS 6723 Artificial Intelligence, Robotics, and Information Systems IS&T 5520 Data Science and Machine Learning with Python IS&T 6443 Information Retrieval and Analysis IS&T 6445 Database Marketing IST6450: Information Visualization ERP5410: Use of Business Intelligence~~

Justification for request

Added data science courses to the elective mix.

Automation Engineering Certificate

An undergraduate certificate in Automation Engineering will require the following:

Required courses:		
ELEC ENG 3340	Basic Programmable Logic Controllers (must pass with a "C" or better)	3
Pass one of the following courses with a "C" or better:		
ELEC ENG 3320	Control Systems	3
MECH ENG 4479	Automatic Control Of Dynamic Systems	3
CHEM ENG 4110	Chemical Engineering Process Dynamics And Control	3
Pass 6 additional hours of coursework from the following list: (A "C" or better is required for all 6 hours)		
CHEM ENG 4140	Chemical Process Safety	3
CHEM ENG 4241	Process Safety in the Chemical and Biochemical Industries	3
CHEM ENG 4310	Interdisciplinary Problems In Manufacturing Automation	3
or MECH ENG 5644	Interdisciplinary Problems In Manufacturing Automation	
CHEM ENG 5190	Plantwide Process Control	3
or ELEC ENG 5350	Plantwide Process Control	
CHEM ENG 5355	Course CHEM ENG 5355 Not Found	
or ELEC ENG 5355	Course ELEC ENG 5355 Not Found	
ELEC ENG 4380	Practicum in Automation Engineering (no more than one can be applied to the Automation Engineering Minor)	3
ELEC ENG 5340	Advanced PLC	3

ELEC ENG 5345	PLC Motion Control	3
ELEC ENG 5870	Mechatronics	3
or MECH ENG 5478	Mechatronics	
MECH ENG 5420	Signal Processing for Instrumentation and Control	3
MECH ENG 5449	Robotic Manipulators and Mechanisms	3
MECH ENG 5655	Manufacturing Equipment Automation	3

Justification for request

Add new course to list of courses for "Pass 6 additional hours of coursework..."

Chem Eng 5355 Process Control System Safety, Security and Alarms

or Elec Eng 5355 Process Control System Safety, Security and Alarms

Automation Engineering and PLC

This graduate certificate program is designed to provide specialized graduate level education in the area of automation engineering and PLC.

Admission

The automation engineering and PLC graduate certificate program is open to all persons holding a B.S. degree in any field of engineering from an ABET accredited undergraduate program or a degree in a closely related technical field such as physics or mathematics. The minimum overall GPA in the B.S. degree program should be at least 2.5.

Once admitted to the program, the student must take four designated courses as given below. In order to receive a graduate certificate, the student must have an average graduate grade point average of 3.0 or better in the certificate courses taken.

Students admitted to the certificate program will have non-degree graduate status. If the four-course sequence is completed with a grade of B or better in each of the courses taken, they will be admitted to the M.S. program in chemical engineering, electrical engineering, or mechanical engineering, provided that all other program prerequisites and admission requirements are met. The certificate courses taken by students admitted to the M.S. program will count towards their master's degrees. Students who do not have all of the prerequisite courses necessary to take the courses in the certificate program will be allowed to take "bridge" courses at either the graduate or undergraduate level to prepare for the formal certificate courses.

Once admitted to the program, a student will be given three years to complete the program so long as he/she maintains a B average in the courses taken.

Curriculum

Students enrolled in this graduate certificate program will take two required courses and two elective courses. Alternative courses may be substituted with the departmental approval dependent on the availability of the courses listed below:

Required courses:	
CHEM ENG 5190/ELEC ENG 5350	Plantwide Process Control
ELEC ENG 5340	Advanced PLC
Choose two of the following:	
CHEM ENG 5140	Course CHEM ENG 5140 Not Found
CHEM ENG 5355	Course CHEM ENG 5355 Not Found
or ELEC ENG 5355	Course ELEC ENG 5355 Not Found
ELEC ENG 5345	PLC Motion Control
ELEC ENG 5870/MECH ENG 5478	Mechatronics
MECH ENG 5449	Robotic Manipulators and Mechanisms
MECH ENG 5655	Manufacturing Equipment Automation

Justification for request

Add course to "Choose two of the following:"

CHEM ENG 5355/ELEC ENG 5355 Process Control System Safety, Security and Alarms

This is a proposed new course.

Delete CHEM ENG 5140 - no longer in catalog

Business Intelligence

Interest in business intelligence has been a recent strong theme among employers. Medium and large-sized businesses are especially interested. In order to make appropriate decisions, upper-level administration of an organization needs to draw data together from different systems in order to get a unified picture of the status and performance of an organization and present it in helpful ways. Examples include the development of organizational scorecards, dashboards, and other tools that provide a picture of how an organization is performing. People capable of creating and maintaining such information are needed.

This graduate certificate focuses on the technologies that allow an organization to make effective business decisions based on operational data pulled together from many different sources inside and organization. The target audience consists of any individual who would manage any type of IT professionals, database administrators, business analysts, and any person who would need to understand the technologies and their capabilities.

A student admitted to this graduate certificate must complete four courses:

Required core courses:	
ERP 5410	Use of Business Intelligence
IS&T 6444/ERP 6444	Essentials of Data Warehouses
Two courses from the following list:	
ERP 5110	Enterprise Resource Planning Systems Design and Implementation
ERP 5210	Performance Dashboard, Scorecard and Data Visualization
ERP 6610	Advanced Customer Relationship Management in ERP Environment
ERP 6220	Data Modeling & Visualization Prototyping for Enterprise Decision Dashboards
IS&T 6443	Information Retrieval and Analysis
IS&T 6445	Database Marketing
IS&T 5445	Course IS&T 5445 Not Found

Justification for request

Digital Supply Chain Management

Success in today's marketplace requires that organizations deliver products and services that provide easily identified value for their customers. This certificate draws on strengths within two departments to integrate source (strategic procurement and supply management), production (manufacturing and service operations), and delivery processes (demand fulfillment), with a focus on the use of information technologies as the critical enabler of supply chain efficiencies and responsiveness.

The certificate is designed to give students the tools and ideas that help shape and define the various components of value creation. Students can gain knowledge and skills in the full spectrum of supply chain activities: supplier relationships, purchasing management, operations and inventory management, logistics and transportation, quality management, and information technology.

A student admitted to this graduate certificate must complete four courses:

Required core courses:	
ERP 5110	Enterprise Resource Planning Systems Design and Implementation
ERP 5310	Supply Chain Management Systems in an ERP Environment
One course from the following list:	
MECH ENG 5708	Rapid Product Design And Optimization
ENG MGT 5614	Supply Chain Management Systems
BUS 6425	Supply Chain and Project Management
One course from the following list:	
ERP 5410	Use of Business Intelligence
ERP 6120	Enterprise Resource Planning: Systems Config and Integration
ERP 6610	Advanced Customer Relationship Management in ERP Environment
MECH ENG 5656	Design For Manufacture
MECH ENG 5757	Integrated Product And Process Design
MECH ENG 5760/AERO ENG 5760	Probabilistic Engineering Design
MECH ENG 5763	Computer Aided Design: Theory and Practice
BUS 5360	Business Operations

Justification for request

Adding relevant operations courses.

Electronic and Social Commerce

Social commerce is just one sub-set of e-commerce, however it is growing rapidly. The department of business and information technology (BIT) has leveraged its' strengths in both business and technology for this program, which is designed to create successful students by developing skills in technological business practices that will provide opportunities for succeeding in today's fast paced world. To that end, the program focuses on the following competencies:

- Management concepts applied to IT
- Management concepts applied to support of electronic commerce
- Use of business processes in IT integration
- Competitive advantage through IT
- Electronic commerce through collaborative shopping

A student admitted to this graduate certificate must complete four courses:

Required core courses:	
IS&T 6641	Advanced Digital Commerce and the Internet of Things
Core Courses (choose one or two):	
IS&T 5251	Technological Innovation Management and Leadership
BUS 6723	Artificial Intelligence, Robotics, and Information Systems Management
Elective courses (choose one or two):	
IS&T 5168/PHILOS 4368	Law and Ethics in E-Commerce
IS&T 5335	Course IS&T 5335 Not Found
IS&T 5445	Course IS&T 5445 Not Found
IS&T 5652	Advanced Web Development
IS&T 5885	Human-Computer Interaction
IS&T 5886	Prototyping Human-Computer Interactions
IS&T 6335	Mobile Technology for Business
IS&T 6445	Database Marketing
IS&T 6680	Advanced Web and New Media Studies
MKT 5310	Digital Marketing and Promotions
MKT 6580	Advanced Marketing Strategy

Justification for request

Entrepreneurship and Technological Innovation

Change and growth in Missouri and America require the training, nourishing, and flourishing of entrepreneurs. Many college students, however, do not yet recognize the entrepreneurial spirit in themselves. Recent entrepreneurship research indicates that many of the skills and much of the knowledge of successful entrepreneurs can be developed and taught in the classroom. The department of business and information technology has created this certificate to spark the entrepreneurial spirit in the students of Missouri S&T, and provide them with a solid foundation on which to build.

To that end, the program focuses on the following competencies:

- Recognizing opportunity
- Assessing opportunity
- Planning under uncertainty
- Fostering innovations
- Mastering creativity
- Building and managing networks
- Leveraging resources
- Mitigating and managing risk
- Focus and adaptability
- Design thinking
- Implementing new ideas

A student admitted to this graduate certificate must complete four courses:

Required core courses:	
BUS 5980	Business Models for Entrepreneurship and Innovation
BUS 6622	International Marketing
Two courses from the following list:	
IS&T 5168	Law and Ethics in E-Commerce
MKT 5310	Digital Marketing and Promotions
BUS 5580	Strategic Management
BUS 6150	Advanced Customer Focus and Satisfaction
IS&T 5254	Technological Innovation Management and Leadership
IS&T 5886	Prototyping Human-Computer Interactions
IS&T 6335	Mobile Technology for Business
BUS 5150	Course BUS 5150 Not Found
IS&T 6251	Course IS&T 6251 Not Found
IS&T 6654	Advanced Web and Digital Media Development
IS&T 5335	Course IS&T 5335 Not Found

Justification for request

Course renumbering.

Advanced Materials for Sustainable Infrastructure Certificate

(Offered in Civil Engineering Discipline)

Choose four courses with a minimum of two courses from the first group of courses (advanced construction materials) and remaining courses from the second group of courses (electives).

I. Advanced Construction Material Courses (Choose two courses):

CIV ENG 5112	Bituminous Materials	3
CIV ENG 5113	Composition And Properties Of Concrete	3
CIV ENG 6801	Advanced Concrete Science and Technology	3

II. Related Topics (Choose two courses):

ARCH ENG 5448	Green Engineering: Analysis of Constructed Facilities	3
CIV ENG 5118	Smart Materials And Sensors	3
CIV ENG 5231	Infrastructure Strengthening with Composites	3
MECH ENG 5282	Introduction to Composite Materials & Structures	3

Justification for request

The purpose of the certificate is to provide graduate students in who are interested in careers that are based on sustainable building and transportation infrastructure materials with a formal recognition of accomplishment in this area. The certificate will help students to enter the CE graduate programs and to make students more marketable in this job sector. The students targeted for this certificate are primarily off-campus graduate students and be a pathway for the CE MS program within CArEE for students completing the certificate.

The graduate certificate in Chemical Process Engineering allows working professionals to add to skills relevant to their career while developing a deeper understanding of chemical engineering fundamentals.

The graduate certificate program is open to all individuals holding a bachelor's degree in chemical engineering or a closely allied discipline with an overall GPA of 3.0 or those holding a bachelor's degree in chemical engineering or a closely allied discipline with an overall GPA of 2.75 and having a minimum of one year of work experience.

Students admitted to the certificate program will have non-degree graduate status, but will earn graduate credit for the courses they complete. In order to receive a Graduate Certificate, the student must have an average graduate cumulative grade point of 3.0 or better on a 4.0 scale in the certificate courses taken.

If the four-course sequence approved by the graduate advisor is completed with a grade of B or better in each of the courses taken, the student will, upon application, be admitted to the Master of Science in Chemical Engineering program. The certificate courses taken by students admitted to the program will count towards the M.S. in Chemical Engineering program.

Core Courses: Select two from the following courses		
CHEM ENG 5100	Intermediate Transport Phenomena	3
CHEM ENG 5110	Intermediate Chemical Reactor Design	3
CHEM ENG 5150	Intermediate Process Computing	3
CHEM ENG 5220	Intermediate Engineering Thermodynamics	3
Elective Courses: Select two additional 3-credit Chem Eng courses at the 5000 or 6000-level		
CHEM ENG 5120	Interfacial Phenomena In Chemical Engineering	3
CHEM ENG 5130	Risk Assessment and Reduction	3
CHEM ENG 5161	Intermediate Molecular Engineering	3
CHEM ENG 5170	Physical Property Estimation	3
CHEM ENG 5190	Plantwide Process Control	3
CHEM ENG 5200	Biomaterials I	3
CHEM ENG 5210	Intermediate Biochemical Reactors	3
CHEM ENG 5250	Isolation and Purification of Biologicals	3
CHEM ENG 5300	Principles Of Engineering Materials	3
CHEM ENG 5305	Hazardous Materials Management	1
CHEM ENG 5310	Structure and Properties of Polymers	3
CHEM ENG 5315	Corrosion and Its Prevention	3
CHEM ENG 5320	Introduction to Nanomaterials	3
CHEM ENG 5330	Alternative Fuels	3
CHEM ENG 5340	Principles of Environmental Monitoring	3
CHEM ENG 5350	Environmental Chemodynamics	3
CHEM ENG 6100	Advanced Chemical Engineering Thermodynamics	3
CHEM ENG 6110	Advanced Transport Phenomena	3
CHEM ENG 6120	Applied Mathematics In Chemical Engineering	3
CHEM ENG 6140	Applied Optimization In Chemical Engineering	3

CHEM ENG 6150	Molecular Modeling and Simulation	3
CHEM ENG 6180	Advanced Applications of Computational Fluid Dynamics	3
CHEM ENG 6241	Intermediate Chemical Process Safety	3
CHEM ENG 6300	Biomaterials II	3
CHEM ENG 6310	Nanomaterials	3
CHEM ENG 6330	Physicochemical Operations In Environmental Engineering Systems	3

Justification for request

CIP Code: 140701

The students targeted for this certificate are primarily early-career and mid-career working professionals who want to acquire a deeper understanding of chemical engineering fundamentals to enhance the essential engineering skills relevant to their careers. This certificate program will help not only the working professionals expedite and broaden their career advancement but also the Chemical and Biochemical Engineering Department recruit more graduate students as it can be used as a gateway into our MS and PhD programs. The Chemical and Biochemical Engineering Department will market this certificate to national and international students and this effort will increase the visibility of our department and our university.

Surface Water Resources CT

(Offered in Civil Engineering Discipline)

WATER RESOURCES ENGINEERING COURSES (Choose THREE courses from the following):

CIV ENG 5330	Unsteady Flow Hydraulics	3
CIV ENG 5331	Hydraulics Of Open Channels	3
CIV ENG 5338	Hydrologic Engineering	3
CIV ENG 6338	Advanced Hydrology	3
CIV ENG 6340	Urban Hydrology	3

RELATED COURSES (Chose ONE course from the following):

CIV ENG 5605	Environmental Systems Modeling	3
CIV ENG 5642	Sustainability, Population, Energy, Water, and Materials	3

Justification for request

The purpose of the certificate is to provide the students in CArEE who are interested in careers in surface water resources engineering a formal recognition of this accomplishment. A certificate in Surface Water Resources will facilitate students to enter the CE graduate program upon completion of the certificate and to give students and advantage when applying for careers in water resources engineering, environmental engineering, water resources management, and other fields. The student targeted for this certificate are primarily off-campus graduate students.

(tibbettsmg):

This certificate is designed to help make one an informed citizen, a reflective human being, and a potential difference-maker.

We live in a technological world, with rapid developments in emerging nano-, bio-, and information and communications technology taking place every day. But the very speed of these change can make it difficult to see how we are affected by them. How do new technologies impact our environments, our economies, our lived experiences, and our very selves? How can we, as users, cope with them? Perhaps even more importantly, what sorts of obligations and responsibilities do engineers and technicians, as makers, have to make sure they are safe, healthy, or liberating? Finally, how do we, as persons, understand ourselves as users, makers, and human beings?

These are precisely the sorts of questions that the Certificate in Technology, Philosophy, and Ethical Futures will help one address. Pursuing this course of study will familiarize students not only with the dilemmas, challenges, and opportunities that new technologies present but with the conceptual tools to navigate them, which will serve them well both in industry and in personal life.

REQUIREMENTS:

Required Capstone Course:			
PHILOS 4666	Course PHILOS 4666 Not Found		
3 credits from:			
PHILOS 1105	Introduction To Philosophy		3
PHILOS 1130	Introduction to Ethics		3
6 credits from:			
PHILOS 3225	Engineering Ethics		3
PHILOS 4320	Minds And Machines		3
PHILOS 4350	Environmental Ethics		3
PHILOS 4665	Course PHILOS 4665 Not Found		
PSYCH 4710	Human Factors		3
PSYCH 4720	Psychology of Social Technology		3
HISTORY 3510	Twentieth Century Technology And Society		3
POL SCI 4320	Course POL SCI 4320 Not Found		

Justification for request

The original justification for this request is below. Here I respond to comments from the Curriculum Committee on the first submission.

- 1) The committee requested we change the title from all caps; we've done so.
- 2) The committee requested we submit a permanent course proposal for what was originally submitted as Pol Sci 3001; we've done so, as Pol Sci 4320.

3) The committee requested we use the course box format; we've done so, as best as we understood. Because this proposal is accompanied by both several new course proposals, and several coincidental course name changes, we are including the following info about these:

PHILOS 4666 - Technology, Ethics, and Philosophy - this does not show up in the course box because it is a new course designed both for this certificate and to serve the needs of students wanting ethics in training in CS and ECE. The proposal for this course has been submitted along with this proposal.

PHILOS 4665 – Creating Future Cities - this is a new course being created specifically for this certificate. The course proposal has been submitted along with this proposal so it does not show up in the course box yet.

POL SCI 4320 – Policy for Science, Technology, and Innovation - this has been offered as an experimental course twice, though with different prerequisites. The proposal for a permanent number is now being submitted along with this certificate and another proposal for a certificate in Science, Technology, and Society, for which it will also be a requirement.

4) The committee requested clarification on PHILOS 4666; if it was a requirement, why was it not included under the requirement? It was always included, and we've reordered the requirements to make that clear. In the original version, it was placed at the end of the requirements to signal that it is intended to be a capstone course, ideally taken at the end of the certificate sequence. The confusion might have arisen because it was labelled "required capstone course" - this was to signify that this specific course is required, while the other requirements are "distribution requirements", allowing students choice between several courses.

Hopefully this clears up any issues. Thank you for your consideration. The original (and enduring) justification is below.

The purpose of this certificate is to demonstrate to employers and others that the student or recipient has a solid background in both applied ethics and normative theory. Demand for excellence, or at the very least competence, in ethical decision-making is increasing, both in the tech and corporate worlds:

<https://qz.com/work/1793582/why-you-should-hire-a-moral-philosopher/>

<https://qz.com/1734381/why-tech-companies-need-to-hire-philosophers/>

<https://www.theguardian.com/business-to-business/2018/mar/29/i-work-therefore-i-am-why-businesses-are-hiring-philosophers>

Allowing students from STEM disciplines the chance to take a manageable 12-credit certificate in philosophy that will hone these skills will ultimately make them more attractive candidates, standing

apart from those who have focused only on technical and/or management skills; moreover, for students primarily studying in the humanities, it provides an explicit area of emphasis on values, tying their studies to concrete cases in the real world.

Pending CCC
Agenda post

In this course, you will learn key insect characteristics, common forest insects, insect life history and ecology, and entomological collection techniques. This course will be taught at the Ozark Research Field Station and will consist of several field trips to collecting sites and laboratory identification of insects.

Prerequisites

BIO SCI 2263

Field Trip

Statement

This course will be held at the Ozark Research Field Station in Newburg, Missouri. Students are expected to arrange their own transportation to and from the Station.

Credit Hours

LEC: 0

LAB: 2

IND: 0

RSD: 0

Total: 2

Justification for

new course:

Gives students field experience and utilizes field station.

Agenda post

The course will cover techniques in solving convex optimization problems emerging in engineering and computer science. Topics covered include convex functions, convex sets, optimization problem formulation, duality and Karush Kuhn Tucker (KKT) conditions, and convex optimization problem formulation and solving.

Prerequisites

Sophomore standing. Prerequisite Math 3108.

Agenda post

This course deals with fundamental concepts, theory and practice of cyber-physical systems (CPSs). Students will learn key design principles, models, and research trends in analysis, control and optimization of reliable and secure CPS infrastructures with interdisciplinary applications to smart city, smart grid, smart transportation, and smart healthcare.

Prerequisites

A grade of "C" or better in both Comp Sci 5200 and Math 3108.

Field Trip

Statement

Credit Hours	LEC: 3	LAB: 0	IND: 0	RSD: 0
Total: 3				

Justification for new course:

Cyber-physical systems (CPSs) are emerging interdisciplinary topic with numerous real-life applications. They integrate cyber capabilities, such as sensing, communication, and computing, with physical capabilities. Examples of CPSs include electric power grid, automobiles, self-driving cars, aircrafts, advanced manufacturing, or pacemakers. Their operations in the physical world are determined by control algorithms on sensed data analytics. Additionally, humans could also be part of the CPS decision-making loop.

Designing solutions, algorithms and models for cyber-physical-human systems is extremely challenging due to their tight coupling and interdependence among

physical, cyber and human worlds governed respectively by natural laws, computational models and abstractions, and human behaviors. Moreover, the designed solutions must be correct to ensure reliable and safety-critical operations of CPSs on which our daily lives have a stake.

Offering a course on CPSs is timely and cutting-edge. This is an ideal course for graduate students in computer science and most other engineering disciplines, as well as for practitioners using CPSs in mechanical and aerospace engineering, automotive and transportation engineering, civil and environmental engineering, mining engineering, medical technology, and large-scale infrastructure operations, etc. Thus, this course will help develop an excellent foundation for students seeking industry jobs and/or higher studies.

Justification for the prerequisite CS5200:

To handle this advanced course on CPS, students need to have CS5200. Many undergrads take 5200 to satisfy 5XXX level course requirement for BS degree. After two offerings, when CPS course will have a regular course number, it would be higher than 5200.

Agenda post

Derivation, implementation, and theoretical analysis of finite difference methods for approximating solutions of partial differential equations.

Prerequisites

Math 5325 or Math 5603; and Math 5601 or any instructor-approved 4000-level or higher course from another discipline with a significant computational component.

Field Trip

Statement

Credit Hours

LEC: 3

LAB: 0

IND: 0

RSD: 0

Total: 3

Justification for

new course:

This course is intended to modify the existing experimental course Math 6001.002 "Finite Difference and Spectral Methods for Partial Differential Equations." The existing Math 6001.002 course included too many topics for a one-semester course, so we are modifying the course to remove spectral methods (which will be taught in a separate course to be added at a later date) and to change the prerequisite, making the course more accessible to a wider variety of students.

We are listing Math 5601 as a prerequisite. Math 5601 has been offered experimentally twice, and I just submitted a CC form to obtain a permanent course number. If there is an issue with listing Math 5601 as a prerequisite at this time for a Spring 2021 experimental course, then please process the prerequisite at this time as follows:

"Math 5325 or Math 5603; and any instructor-approved 4000-level or higher course with a significant computational component"

If this alternate prerequisite is necessary, we will go back and change the prerequisite again before the next time the course is offered.

Hopefully this isn't too confusing! We're excited about offering this course in Spring 2021.

Agenda post

The course provides a comprehensive overview of the principles and practices of advanced well and drilling engineering. Advanced drilling technologies covers topics including casing drilling technology and casing fatigue, remedial cement, fluid migration, and aspects wellbore construction and wellbore integrity, drilling problems and their solutions.

Prerequisites

Pet Eng 4210.

Field Trip

Statement

Credit Hours	LEC: 3	LAB: 0	IND: 0	RSD: 0
Total: 3				

Justification for new course:

There is no 6000 grade level in petroleum engineering syllabus covering these topics in drilling and well technology class. Also, Dr. Imqam requires to teach 6000 level as recommended in his tenure plan.
