Course Number 4099

Title
Undergraduate Research

Abbreviated Undergraduate Research
Course Title

Catalog

Description

This course provides ~~Designed for~~ the undergraduate student with experience ~~who wishes to engage~~ in conducting chemical research. Does not lead to the preparation of a thesis. Not more than eight (8) ~~six (6)~~ credit hours allowed for graduation credit. Subject and credit to be arranged with the instructor. Preparation of a written, detailed report is required of the student.

Prerequisites

Must meet departmental requirements for instruction in laboratory safety. Consent of instructor required.

Requested Fall ~~2021~~ 2024
 Effective Change
 Date
 Department Mathematics & Statistics
 Discipline Mathematics (MATH)
 Course Number 1215
 Title Calculus II
 Abbreviated Calculus II
 Course Title

Catalog Techniques of integration, sequences and series including power series, polar
 Description coordinates, polar and parametric equations. Applications in physical science and
 engineering. Credit will be given for only one of Math 1215 or Math 1221.
 Prerequisites A grade of "C" or better in ~~both Math 1160 and~~ one of Math 1208 or 1214; or a
 grade of "C" or better in both Math 1210 and Math 1211. ~~1211; or a grade of "C" or~~
 ~~better in both Math 1214 and 1211; or a grade of "C" or better in Math 1214 and~~

~~successful trigonometry placement.~~

Field Trip

Statement

Credit Hours	LEC: 3	LAB: 1	IND: 0	RSD: 0	Total: 4
--------------	--------	--------	--------	--------	----------

Required for Majors	Yes
------------------------	-----

Elective for Majors	No
------------------------	----

Justification for
change:

The previous prerequisite included either a "C" or better in Math 1160 (Trigonometry) or successful trigonometry placement along with Math 1208 or Math 1214. However, Math 1160 or successful placement is already a prerequisite for Math 1208 (Calculus With Analytic Geometry I) and Math 1214 (Calculus I), and successful completion of Calculus I is a prerequisite for this course. Therefore, the trigonometry prerequisite is not necessary for Math 1215 (Calculus II).

For reference, the previous prerequisite: "A grade of "C" or better in both Math 1160 and one of Math 1208 or 1214; or a grade of "C" or better in both Math 1210 and Math 1211; or a grade of "C" or better in both Math 1214 and 1211; or a grade of "C" or better in Math 1214 and successful trigonometry placement."

Note that 'a grade of "C" or better in both Math 1210 and Math 1211' remains the same in the proposed new prerequisite.

Students must complete a minimum of 121 credit hours for the bachelor of arts in chemistry degree. Students may have to take more than the minimum number of coursework hours to comply with the B.A. requirements due to variations in minor degree and foreign language requirements within an individual's program

of study.

Elective credits include a required minor in one of the following areas: English, economics, history, philosophy, psychology, sociology, communications, speech, media, political science, music, mathematics, statistics, foreign language, computer science, biology, or art. See Undergraduate catalog for courses required for specific minor. All chemistry majors are encouraged to do research through [CHEM 4099](#) . A total of 12 credits of a modern foreign language must also be taken as part of the electives above.

Chem Elective must be from one or more of the following: [CHEM 3310](#), [CHEM 3329](#), [CHEM 4099](#), [CHEM 4210](#) , [CHEM 4297](#) , [CHEM 4310](#), [CHEM 4410](#) , [CHEM 4420](#), [CHEM 4510](#) , [CHEM 4610](#) , [CHEM 4619](#) , [CHEM 4620](#) , [CHEM 4630](#), [CHEM 4810](#) , [CHEM 4819](#) , [CHEM 4850](#) . This program of study allows students to design, in conjunction with their chemistry advisor, a program for many disciplines including pre-law, business, pre-dentistry, pre-veterinary medicine, as well as pre-medicine. An example of such a program is shown for pre-medical studies:

BIO SCI 1113	General Biology	3
BIO SCI 1219	General Biology Lab	1
BIO SCI 2213	Cell Biology	3
BIO SCI 2219	Cell Biology Laboratory	1
CHEM 4610	General Biochemistry	3
CHEM 4619	General Biochemistry Laboratory	2

A grade of "C" or better is required for each Chemistry course counted towards the degree.

Students must complete a minimum of 133 ~~129~~ credit hours for the Bachelor of Arts in Chemistry degree with a Secondary Education Emphasis Area. The degree program is intended to culminate in a Certification Recommendation for an initial Missouri teaching certification. Students should also consult the Secondary Teacher Education Program section for Teacher Certification requirements through the Education department. A Bachelor of Science in Chemistry degree with a Secondary Education Emphasis Area may be obtained by taking an additional 40 credit hours of mostly upper level Chemistry courses (see your academic advisor for a schedule of classes or more information).

For this Bachelor of Arts degree program, the minor degree and foreign language requirements of the typical program of study are waived and there are other course substitutions in lieu of education coursework and requirements. A total of nine humanities credit hours are required to be selected from [ENGLISH 1221](#) or [ENGLISH 1222](#) ; [PHILOS 1105](#) ; and one of [ART 1180](#) , [MUSIC 1150](#) , or [THEATRE 1190](#) .

Four credit hours of Chemistry Elective must be selected from one or more of the following: [CHEM 4210](#) , [CHEM 4297](#) , [CHEM 4410](#) , [CHEM 4510](#) , [CHEM 4610](#) , [CHEM 4619](#) , [CHEM 4620](#) , [CHEM 4710](#) , [CHEM 4810](#) , [CHEM 4819](#) , [CHEM 4850](#) , and/or [CHEM 4099](#) . [CHEM 4099](#) may not count for more than 3 credit hours toward the degree. All chemistry majors are encouraged to do research through [CHEM 4099](#) .

A grade of "C" or better is required for each Chemistry course counted towards the degree.

Justification for request

Changes are made per renumbering of courses per the changes to the BS degrees. In addition, changes to the education emphasis are made with respect to the BS renumbering as well as for changes to DESE requirements for the teaching education emphasis.

Bachelor of Science Chemistry

A minimum ~~of 120~~ ~~of 127~~ credit hours is required for a Bachelor of Science degree in Chemistry and an average of at least two grade points per credit hour must be obtained. These requirements for the B.S. degree are in addition to credit received for algebra, trigonometry, and basic ROTC.

The Chemistry science curriculum requires ~~twelve (12)~~ ~~nine~~ semester hours in humanities and must include [ENGLISH 1120](#) and [ENGLISH 1160](#) or [ENGLISH 3560](#) . A minimum of nine ([9](#)) semester hours is required in social sciences, including either [HISTORY 1300](#) , [HISTORY 1310](#) , [HISTORY 1200](#) , or [POL SCI 1200](#) . Specific requirements for the bachelor degree are outlined in the sample program listed below.

Electives: ~~There are eleven (11) hours of electives, not to include Math courses that are prerequisite to calculus. The degree has three (3) Up to five (5) credit hours of general electives credit that may not include Math courses prerequisite to calculus. Not more than 1 credit hour of CHEM 4010 can be included for degree credit. taken of Chem 4099. Three (3) elective hours must be completed in the social sciences. Up to eight (8) credit There are eleven (11) hours may be taken of CHEM 4099. electives, not to include Math courses that are prerequisite to calculus.~~

~~Three (3) elective hours are required in the humanities.~~

Justification for request

We are reducing the required degree hours to 120 from 127.

Social science course hours total 9; total H-SS hrs = 21 minimum. We are combining three physical chemistry courses into 2 courses of reduced content to align our physical chem series with the other core disciplines of organic, inorganic, and analytical chemistry, 2 courses each. We are increasing the amount of research required by one to two credit hours for most degree plans and amount allowed to a total of 8 crhr. We have also removed a general elective hour. In addition, we are renumbering our inorganic and p-chem series to align them with the typical seniority year taken. New course chem 4650, the undergraduate version of 5650 required for the medicinal chemistry certificate, is required as part of the pre-medicine emphasis degree.

The Bioengineering PhD program combines existing expertise in Chemical and Biochemical Engineering with 10 allied engineering and science departments (Biological Sciences, Chemical Engineering, Chemistry, Computer Science, Civil Engineering, Electrical Engineering, Engineering Management, Materials Science and Engineering, Mechanical Engineering, and Math) spanning three colleges (the College of Engineering and Computing, the College of Arts,

Sciences, and Education, and the Kummer College of Innovation, Entrepreneurship, and Economic Development) at Missouri S&T to achieve the following objectives,

1. To attract a large and diverse set of students.
2. To build a highly skilled workforce in bioengineering to meet the current and emergent needs of industries, regulatory agencies, and NGOs.
3. To serve as an integrator and catalyst for faculty members at Missouri S&T to discover new ideas, develop collaborations, and increase scholarly productivity in the critically important bioengineering research domain.
4. To build research and educational collaborations with industry and other external partners, including those within the UM system. This includes supporting existing focus areas such as precision medicine.

The PhD is open to interested students from relevant engineering and science backgrounds, but is primarily focused on those with a BS or MS degree in Chemical Engineering, Biochemical Engineering, Biomedical Engineering, Biomolecular Engineering, or Biological Engineering. The successful applicant must have minimum undergraduate grade point average of 3.0/4.0 or equivalent and strong letters of recommendations.

Students who enter the program directly with a BS degree will need to complete a minimum of 72 credit hours beyond BS degree, which should include a minimum of 30 credit hours of 4000-, 5000-, and 6000-level lecture courses. A student entering with a MS degree will receive a block of 30 credit hours toward the total 72-hour program requirement and must complete a minimum of 24 credit hours of graduate research and a minimum of 12 credit hours of 4000-, 5000-, and 6000-level lecture courses. In addition, the PhD students are required to pass a PhD qualifying exam before their 5th semester and a PhD comprehensive exam after completing at least 50% of their required coursework for the PhD degree. They must conduct research, write a PhD dissertation, and successfully defend the dissertation in their final examination (defense).

Core Courses: select a minimum of 9 credit hours from the following courses			
BME 5100	Course BME 5100 Not Found	Drug and Gene Delivery	3
BME 6400	Course BME 6400 Not Found	Biomanufacturing	3
BME 6500	Course BME 6500 Not Found	Pharmaceutical Process Engineering	3
CHEM ENG 5250		Isolation and Purification of Biologicals	3
MS&E 5310		Biomaterials I	3
Ethics: required			
BME 5311	Course BME 5311 Not Found	Integrity and Ethics in Bioengineering	1
Lecture Series: enroll at least twice			
CHEM ENG 6015		Lecture Series	1

Elective Courses: select a minimum of 18 credit hours from the following courses			
Biomanufacturing and Biochemical Engineering Process Design			
BME 5100	Course BME 5100 Not Found	Drug and Gene Delivery	3
CHEM ENG 4210		Biochemical Reactors	3
CHEM ENG 4220		Biochemical Reactor Laboratory	3
CHEM ENG 5100		Intermediate Transport Phenomena	3
CHEM ENG 5120		Interfacial Phenomena In Chemical Engineering	3
CHEM ENG 5150		Intermediate Process Computing	3
CHEM ENG 5161		Intermediate Molecular Engineering	3
CHEM ENG 5210		Intermediate Biochemical Reactors	3
CHEM ENG 5211	Course CHEM ENG 5211 Not Found	Intermediate Bioreactor Laboratory	3
CHEM ENG 5220		Intermediate Engineering Thermodynamics	3
CHEM ENG 5250		Isolation and Purification of Biologicals	3
CHEM ENG 5251	Course CHEM ENG 5251 Not Found	Intermediate Bioseparations Laboratory	3
MS&E 5310		Biomaterials I	3
Biomaterials and Tissue Engineering			
CHEM ENG 5300		Principles Of Engineering Materials	3
CHEM ENG 5320		Introduction to Nanomaterials	3

CHEM ENG 6150	Molecular Modeling and Simulation	3
CHEM ENG 6300	Biomaterials II	3
ELEC ENG 5810	Computational Intelligence	3
ELEC ENG 6260	Integrated Microsystems Engineering	3
MECH ENG 5229	Smart Materials And Sensors	3
MS&E 5210	Tissue Engineering	3
MS&E 5460	Molecular Engineering of Materials	3
MS&E 6210	Advanced Tissue Engineering	3
MS&E 6460	Advanced Molecular Engineering of Materials	3
ENV ENG 6601	Biological Principles In Environmental Engineering Systems	3
ENV ENG 6612	Biological Operations In Environmental Engineering Systems	3
Data Analysis and Computational Modeling		
STAT 5346	Regression Analysis	3
STAT 6344	Design And Analysis Of Experiments	3
COMP SCI 5401	Evolutionary Computing	3
COMP SCI 5700	Bioinformatics	3
Biochemical Interactions and Applications in Medicine and Nanotechnology		
CHEM 5001	Special Topics Medicinal Chemistry	3
CHEM 5610	Biochemistry	3
CHEM 5620	Biochemical Metabolism	3
CHEM 5630	Biochemical Nanotechnology	3
BIO SCI 5533	Pharmacology	3
BIO SCI 6413	Molecular Cell Biology	3
BIO SCI 6523	Advanced Biomolecules	3
BIO SCI 6666	Advanced Nanotechnology in Biomedicine	3

Justification for request

CIP Code: 140501

Bioengineering is one of the fastest-growing sectors of employment and has seen significant increases in R&D investments by governmental agencies, foundations, and industry. Inspired in part by the recent performance of pharmaceutical and healthcare biotechnology in vaccine development and manufacturing to combat the COVID-19 pandemic, increasing numbers of students have become interested in bioengineering graduate research and career pathways. This multidisciplinary PhD program will span all the relevant aspects of bioengineering, from upstream research to downstream processing and from characterization of individual biomolecules to design of an entire process, and will develop a workforce for bioengineering jobs that will contribute to the growth and economic development of Missouri and the nation. Additionally, it will help grow student enrollment and provide a platform to spur new ideas, develop collaborations, increase scholarly productivity, and build partnerships with industry and other external partners

A student holding a B.S. degree and pursuing a Ph.D. in biological sciences will complete a total of 72 credit hours including a minimum of 30 credit hours in graduate course work and a minimum of 30 hours of research credit. There are three alternative tracks for doctoral students: 1) Bioinnovation, 2) Biomedicine, and 3) Environmental Biology. Students will begin the program by enrolling in one of three topical introductory courses, Advanced Principles of Biodesign

([BIO SCI 6603](#)), Current Topics in Biomedical Sciences ([BIO SCI 6613](#)), or Current Topics in Environmental Biology ([BIO SCI 6623](#)). Required courses include Problems in Applied and Environmental Biology ([BIO SCI 6202](#)) and Research Proposal Writing ([BIO SCI 6223](#)). Ph.D. students are required to enroll in Data Analysis and Presentation ([BIO SCI 5020](#)) for two semesters during their program of study. At least 6 credit hours of mathematics, statistics or computer science course work is required. The remaining 14 credit hours may include any additional graduate courses offered in BIO SCI or any additional graduate courses in other programs (e.g. CHEM, CHEM ENG, BIO ENG, IS&T, STAT, MSE, COMP SCI) with approval from the student's advisory committee. Students are encouraged to pursue graduate certificates in other programs that are relevant to their program of study. Note that no course below the 5000-level may be applied to the degree requirements.

A student entering with an M.S. degree will complete a total of 42 credit hours including a minimum of 12 credit hours in graduate course work after meeting all degree requirements through transfer course credit, and a minimum of 30 credit hours of research.

A qualifying exam based upon a research proposal written and defended by the student will be successfully completed no later than the end of the fifth semester of enrollment, and a plan of study will be approved by a student's advisory committee by the end of the semester in which the qualifying exam is passed. A comprehensive exam will be completed after the student has completed their coursework. Upon conclusion of research, the student will complete a written dissertation and successfully defend the dissertation in their final exam (defense).

Justification for request

program has been approved by UM system board of curators

Requested	Fall 2024
Effective Change Date	
Department	Physics
Discipline	Physics (PHYSICS)
Course Number	5001
Topic ID	003
Experimental Title	Physics of Quantum Information
Experimental Abbreviated Course Title	Quantum Information
Instructors	Yew San Hor

Experimental Catalog Description	This course introduces the fundamental concepts of quantum information and their application in computing and communication. It starts with quantum theory as the basis for information processing and introduces quantum concepts such as quantum states, dynamics, and measurement. The course explores quantum computing and communication, focusing on entanglement as a crucial aspect of quantum information processing.

Justification for
new course:

In recent years, quantum physics and, more broadly, quantum science has transformed from an area of fundamental research to the center of a technological revolution that promises break-through advances in computing, cryptography, sensors, atomic clocks and other technologies. It is crucial that S&T students are exposed to this field.

The proposed course introduces the basic concepts underlying this quantum revolution.

Last edit: 01/26/24 11:52 am

Changes proposed by: sgao

Request Type Name Change

Title

Earth Sciences and Engineering

Description

Our department, originally established as "Geological Sciences and Engineering (GSE)" in the early 2000s through the merger of three individual departments, underwent a name change in 2013, becoming "Geosciences and Geological and Petroleum Engineering (GGPE)." While the latter name does highlight all the programs that comprise the department, including Geological Engineering, Geology and Geophysics, and Petroleum Engineering, it poses some serious challenges. The length and complexity of the GGPE name is unappealing, particularly to prospective students. In response to these concerns, we propose the new name "Earth Sciences and Engineering (ESE)."

We believe that this new name is more concise, covers the breadth of instruction and research going on in the department, and is more relatable to high-school students. Despite the absence of "Petroleum Engineering" in the proposed new name, it does align seamlessly with our goal to expand the scope of the Petroleum Engineering program, encompassing cutting-edge fields like carbon sequestration, hydrogen storage, and geothermal energy, which are broadly categorized under earth sciences and engineering, diverging from traditional petroleum engineering. Furthermore, we are retaining the current academic program names to maintain marketing and branding flexibility for diverse audiences. This approach allows us to highlight the department name when engaging with high school students, while focusing on specific program names for potential graduate students and engaging with alumni.
