

Minutes of the Campus Curricula Committee Meeting

October 21st, 2025

8:15 am, Parker Hall 203

(For Faculty Senate Meeting of November 20th, 2025)

Attendees: Cecil Eng Huang Chua, Katie Shannon, Michael Davis, Theresa Swift, Cihan Dagli, Kyle Perry, Alejandra Sobrado, Crystal Wilson, and Jade McCain.

The following curriculum forms were discussed and approved:

Course Change forms:

File: 507	BUS 5360 : Business Operations
File: 1759	CHEM 1310 : General Chemistry I
File: 1636	ENG MGT 6101 : Advanced Research Methodology

This course examines the concepts, processes, and institutions that are fundamental to an understanding of business operations within organizations. Emphasis is on the management and organization of manufacturing and service operations and the application of quantitative methods to the solution of strategic, tactical and operational problems.

Prerequisite(s):

BUS 1210 or ENG MGT 2211; at least Junior standing; and one of the following: STAT 1115, STAT ~~3111~~, STAT 3113, ~~STAT 3115~~, or STAT 3117.

The course explores the ecological knowledge needed for wildlife conservation, including how species behavior and ecology ultimately shape wildlife populations. Traditional wildlife management topics will be included, along with an added emphasis on ethological implications that affect biological diversity. In addition, human behavior and its impact on wildlife populations and diversity will be studied through hands-on experience, field observation, case studies, scientific literature, and assigned readings. This course is taught as part of a 3 week faculty-led South Africa study abroad program.

Stage Management will focus on the skills and mechanics necessary to contribute to a production process with a focus on organization, leadership, and communication. This course will also cover venue management and stage control automation trends. Students become familiar with industry standard safety procedures for various venues types, arts contract lifecycle and its applications.

Prerequisite(s):

Entrance requirements.

Justification

The course will expand student offerings at the lower level. Instructor: Taylor Gruenloh. We request the permanent number for this course because this course will be injected into the existing Theater Minor, and used later this semester in developing the undergraduate certificate in Entertainment Technologies. Students graduating from Missouri S&T with an engineering degree often have an interest in the entertainment industry.

Study of the evolution of entertainment from the 19th century to the present as an art form and as a science. From theater to theme parks to virtual reality, students will examine the work of designers past and present as well as entertainment venues through the last century.

Prerequisite(s):

Entrance requirements.

Corequisite(s):

Credit Hours

Credit Hours

Credit Type	Credit Hours
Lecture	3

Total: 3

Required for Majors No

Elective for Majors Yes

Communication No
Intensive

Communication Yes
Emphasized

Grading Basis Graded

Repeatable

No

Justification

The course will expand student offering at the lower level. Instructor: Taylor Gruenloh.
We request the permanent number for this course because this course will be injected into the existing Theater Minor, and used later this semester in developing the undergraduate certificate in Entertainment Technologies. Students graduating from Missouri S&T with an engineering degree often have an interest in the entertainment industry.

Minor in Artificial Intelligence and Machine Learning in Business

CIP Code

Program Requirements and Description

Minor in Artificial Intelligence and Machine Learning in Business

The Minor requires 15 credit hours, as follows:

<u>BUS 5730</u>	Machine Learning and Artificial Intelligence for Business	3
<u>IS&T 3420</u>	Introduction to Data Science and Management	3
<u>IS&T 5520</u>	Data Science and Machine Learning with Python	3
And two courses from the following list:		6
<u>STAT 1115</u>	Statistics For The Social Sciences I	
<u>IS&T 3333</u>	Data Networks and Information Security	
<u>IS&T 3343</u>	Systems Analysis	
<u>IS&T 5420</u>	Business Analytics and Data Science	
<u>IS&T 5450</u>	Introduction to Information Visualization	
<u>IS&T 5535</u>	Machine Learning Algorithms and Applications	
<u>ERP 5410</u>	Use of Business Intelligence	

Justification for
request

Removed stat courses the math department says is being inactivated per their email sent to departments on September 15.

Engineering Management MS

CIP Code

Program Requirements and Description

The M.S. degree program is offered on the Rolla campus and several locations including the West County Continuing Education Center in St. Louis, Fort Leonard Wood (restricted to Engineer Captain's Career Course), and by distance education throughout the United States and selected international locations. Distance course lectures are archived upon completion of the lecture and all lectures are available to students through streaming video during the semester for review. These courses can be reached from anywhere at any time. It is feasible to obtain a Missouri S&T non-thesis M.S. degree regardless of your location.

The M.S. non-thesis program requires completion of at least 10 three-credit hour courses approved by the academic advisor. The M.S. with thesis option requires 30 credit hours including the thesis. All students are required to take the following:

Core Courses

<u>ENG MGT 5111</u>	Management for Engineers and Scientists
<u>ENG MGT 5320</u>	Project Management
<u>ENG MGT 5412</u>	Operations Management Science
<u>ENG MGT 6211</u>	Advanced Financial Management
<u>SYS ENG 6102</u>	<u>Information Based Design</u>

Students are then encouraged to identify an emphasis area depending on their interests and to choose available courses from the selected area. However, courses can be chosen from more than one emphasis area. Students have the option to take up to two out-of-department elective courses.

Students must submit a typed Form I to the EMSE graduate office by the end of the fourth week of the second beginning of the semester of enrollment in the master's program. Links to forms are available at: ~~of their 9th credit hour. Links to forms are available at:~~ <https://grad.mst.edu/>. Thesis students cannot register for Graduate Research (ENG MGT 6099) until their Form I is on file. If students vary from Form I, they must file a Form I-A and have it approved by their advisor to update their plan of study. Non-thesis students must take three 6000-level courses. Thesis students must take two 6000-level courses (in addition to ENG MGT 6099). Students must meet all requirements for graduation as specified in the Graduate Catalog for engineering management. A graduate student already holding or completing a master's degree may obtain a second M.S. in engineering management by completing at least an additional 24 credit hours of work.

Justification for
request

Adding SYS ENG 6102 – Information Based Design to the Engineering Management M.S. core ensures all students gain exposure to modern, data-driven methods for designing and managing complex systems. The course complements the existing core by providing a systems-oriented foundation that reflects current industry practice.

Comments

Jade McCain (jm558v) (10/14/25 2:39 pm): Corrected the ESME Form 1 statement due to a Fall 2025 rule change requested by the office of Graduate Education via email on 10/14/2025.

Crystal Wilson (wilsoncry) (10/16/25 9:25 am): Per Dr. Raper and Sharon Matson, this form does not need to go through system level and can just go through campus CCC/FS process.

Global Studies Minor

CIP Code

Program Requirements and Description

Global Studies Minor

Global studies is a multi-disciplinary undergraduate minor program designed to aid in the preparation of Missouri S&T students to be successful in an increasingly global workforce. Students who complete the global studies minor will have an increased awareness of the society, culture, technical issues, and/or language of at least one country other than the United States prior to the completion of their Missouri S&T undergraduate experience. Any Missouri S&T student enrolled in an undergraduate degree program is eligible for the Global Studies minor program, which consists of 12 credit hours from an approved list of classes and at least 2 weeks (14 days) of experience in a foreign country acquired during an approved Missouri S&T class or research project, Missouri S&T extracurricular activity, and/or Missouri S&T study abroad activity. Courses must be selected from the list of approved courses maintained by the Global Studies Advisory

Committee. At least one three hour course must focus on the society, culture, and/or language of a foreign country. Approved courses that meet this criterion are from the arts, languages, humanities, or social sciences. In addition, at least one three hour course and no more than nine hours/three courses must come from approved courses that include at least 25 percent international studies content. "International studies content" is defined as course content addressing countries or regions outside of the United States. "International studies content" does not include content that is universal but rather that which addresses specific countries or regions outside of the United States. To satisfy the multi-disciplinary aspect of the minor, no more than six hours may be taken from a single Missouri S&T degree program.

The minor requires personal experience in a foreign country. Students will participate in one or more approved Missouri S&T-sponsored trips to a foreign country for no less than 14 days total. Examples of approved trips include, but are not limited to, those that may be a part of Missouri S&T classes and/or an OURE project-related trip, an extracurricular activity including Missouri S&T's Engineers Without Borders field trips, and/or Missouri S&T sanctioned study abroad. The list of approved activities is maintained by the Global Studies Advisory Committee.

The curricula criteria, including course lists and the list of approved activities for foreign country experience, are maintained by the Global Studies Advisory Committee and are available on the quick links section of the Missouri S&T Experiential Learning website at <https://experientiallearning.mst.edu/internationalopportunities/globalstudies/>.

Program Requirements and Description

Bachelor of Science

Information Science and Technology

In Information Science and Technology, the Bachelor of Science degree consists of 120 credit hours. All undergraduate students in Information Science and Technology are required to complete a General Education Requirements Core, including courses in Humanities, Social Sciences, Mathematics, Science, and Communication Skills.

A common departmental core of courses in Business and Information Technology helps provide students with skills to succeed in a fast-changing and globalized environment. Information Science and Technology (IS&T) Core courses and IS&T Electives provide students with comprehensive knowledge of information technology utilization in businesses. These courses include business analytics & data science, database management, systems analysis, introduction to data science and management, networks and communications, and cybersecurity. The electives for this degree consist of advanced coursework in the areas introduced by the required courses.

A minimum grade of "C" is required in the courses designated accordingly.

Students have 11 credit hours for free electives.

Freshman Year

First Semester	Credits	Second Semester	Credits

Program Requirements and Description

Theatre Minor Curriculum

A minor in Theatre requires a minimum of 15 hours comprised of the following courses:

Required Courses (6 credits):

<u>THEATRE 1150</u>	Theatre for Social Change	3
<u>THEATRE 2143</u>	Stagecraft	3

In addition to the courses listed above, students are required to choose 3 of the courses below (9 credits):

<u>THEATRE 2141</u>	Acting I	3
<u>THEATRE 2200</u>	<u>History of Entertainment Design</u>	<u>3</u>
<u>THEATRE 2400</u>	<u>Principles of Stage Management</u>	<u>3</u>
<u>THEATRE 3241</u>	Acting II	3
<u>THEATRE 3243</u>	Entertainment Design	3
<u>THEATRE 4243</u>	<u>Entertainment Design II</u>	<u>3</u>
<u>THEATRE 4341</u>	Directing	3

Emerging Technologies in Semiconductors

Experimental Emerging SemiTech

Abbreviated Course

Title

Co-Listed Course

Instructors

Zhao, Feng

Experimental

Catalog Description

Explore the forefront of innovation in Emerging Technologies in Semiconductors. This interdisciplinary course introduces students to cutting-edge advances in semiconductor materials, chip fabrication, and computing paradigms that are shaping the future of electronics. Topics include 2D materials, quantum and neuromorphic devices, chiplet architectures, and sustainable manufacturing. Students will examine applications in AI, IoT, automotive, biomedical, and space technologies. Through lectures and guest speakers from industry, students will gain a comprehensive understanding of the semiconductor ecosystem and its global impact. Ideal for students from engineering, physics, computer science, and related fields.

Repeatable No

Justification for
experimental
course:

The semiconductor industry is undergoing a transformative shift driven by innovations in materials, fabrication techniques, and computing paradigms. As global demand for advanced electronics accelerates - especially in AI, IoT, autonomous systems, and biomedical devices - there is a critical need for engineers and scientists who understand emerging technologies shaping the future of semiconductors. This course fills a vital educational gap by equipping students with interdisciplinary knowledge and supporting workforce development, aligns with national priorities in semiconductors, and prepares students for careers in high-impact sectors. The course also complements existing curricula in semiconductor engineering, electrical engineering, materials science, and chemical engineering.

Co-Listed Course

Instructors

Dr. Venkat Allada

Experimental

Catalog Description

This course explores how innovation ecosystems form, evolve, and create value across industries, regions, and institutions. Students will examine the roles of universities, startups, corporations, governments, venture capitalists, and communities in shaping collaborative environments that foster innovation. Through case studies, current readings, and hands-on projects, students will apply theory to practice—learning tech transfer basics, benchmarking regional hubs, managing internal and open innovation, and auditing innovation districts. Topics include the triple helix model, regional innovation engines, funding, inclusive governance, and intrapreneurship, and ecosystem key performance indicators (KPIs).

Prerequisite(s)

Graduate standing or senior undergraduate.

Corequisite(s)

Field Trip

Statement

Working on the possibility of having field trips to 1-2 innovation ecosystems in St. Louis and/or Kansas City regions.

AI in Popular Culture

Experimental AI Pop Culture

Abbreviated Course

Title

Co-Listed Course

Instructors

Daniel Reardon

Experimental

Catalog Description

This course explores how artificial intelligence is imagined, represented, and critiqued across contemporary popular media, including film, television, video games, literature, and digital platforms. Students will analyze evolving portrayals of AI as creators, threats, tools, and companions, and consider how these narratives reflect cultural hopes, fears, and ethical dilemmas. Emphasis will be placed on storytelling, genre conventions, and the interplay between emerging technologies and human identity.

Prerequisite(s)

English 1120 or its equivalent.

Corequisite(s)

Field Trip

Statement

Credit Hours

Credit Type	Credit Hours
-------------	--------------

Credit Type	Credit Hours
Lecture	3

Total: 3

Required for Majors No

Elective for Majors Yes

Grading Basis Graded

Repeatable No

Justification for
experimental
course:

As artificial intelligence becomes increasingly integrated into daily life—from generative tools like ChatGPT and DALL-E to autonomous vehicles and algorithmic decision-making—students need critical frameworks for understanding how these technologies are represented, mythologized, and interrogated in popular media. AI in Popular Culture addresses this need by examining how stories about artificial intelligence reflect cultural anxieties, ethical debates, and shifting definitions of humanity.

This course directly supports the department’s strategic emphasis on technology-forward humanities offerings. It also aligns with Missouri S&T’s institutional mission by providing humanities-based perspectives on emerging technologies, thus appealing to both ETC majors and STEM students seeking electives that connect technical innovation with cultural analysis. With wide relevance across media studies, digital rhetoric, science fiction, and narrative theory, this course will help equip students with the analytical tools to navigate and critique the rapidly evolving AI landscape.

Biomechanics

Experimental Biomech

Abbreviated Course

Title

Co-Listed Course

Instructors

Dr. Fateme Fayyazbakhsh

Experimental

Catalog Description

Biomechanics is the analysis of kinematic and kinetic analysis of human motion to enhance performance, rehabilitate injuries, understand disease, and reduce injury risk. This course will explore mechanical properties of hard tissues (e.g., bone and tooth), hard tissue/soft tissue interface (e.g., tendon, ligament, and heart valve), soft tissue (muscle, skin, gastrointestinal tissue, nerve, blood vessel, and heart), fluidic tissue (e.g., blood and lymph), as well as biological materials (e.g., implants, food, and wearable gadgets).

Prerequisite(s)

Mech Eng 3131 and Mech Eng 3313.

Corequisite(s)

Field Trip

Statement

Credit Hours

Credit Type

Credit Hours

Credit Type	Credit Hours
Lecture	3

Total: 3

Required for Majors No

Elective for Majors Yes

Grading Basis Graded

Repeatable No

Justification for
experimental
course:

This will be an excellent elective course for ME undergraduates to see how principles of statics, dynamics, machine dynamics and fluid mechanics is applied to a human body.

Professional Development non-thesis Grad Students

Experimental Prof Dev non Thesis

Abbreviated Course

Title

Co-Listed Course

Instructors

Andreas Eckert

Experimental

Catalog Description

This course covers all necessary core competencies for a non-thesis based M.Sc. student to be successful in graduate school and transition into the post-graduate workforce. Course modules include career planning with a focus on the non-academic job world, writing & communication skills, research & data analysis, leadership & service. Students will receive hands-on experiences including career planning as a non-thesis graduate student, setting career goals and expectations, resume/CV preparation, interview practice, assessing and developing professional skills that translate to the job world, professional personality assessment, and oral and written communication training.

Prerequisite(s)

Graduate standing (non-thesis option).

Required for Majors No

Elective for Majors Yes

Grading Basis Graded

Repeatable No

Justification for
experimental
course:

Non-thesis based graduate students need a thorough understanding of the requirements and expectations with respect to professional skills that translate to a successful graduate and post graduate career. This course will particularly focus on the transition to the non-academic job world, and provide hands-on, practical experiences for a variety of professional skills required in the modern job world.

Instructors

Chakraborty

Experimental

Catalog Description

Concentration inequalities and their relationships with norms are studied. Topics from uncertainty quantification are studied, including (but not limited to): resampling methods, conformal predictions, and robust inference techniques under model misspecifications. We also discuss the framework of reproducing kernel Hilbert spaces and its applications to certain machine learning problems. Finally, we survey estimation and regularization methods for high-dimensional data.

Prerequisite(s)

Math 3108, Stat 3115 or Stat 3117 or Stat 5643.
